To The Creditors of the Jefferson
Furniture Company, a Corporation. TAKE NOTICE

The Jefferson Furniture Company, a corporation, on January 4th, 1916, made a Deed of Assignment, to the undersigned of its entire assets, for the purpose of paying up its affairs: All creditors of the Jefferson Furniture Company, a corporation, are hereby notified to file their claims itemized, and duly verified, with the undersigned, or with George A. Paul, Clerk Superior Court of Beaufort County, Washington, N. C. within sixty days from this date. Upon failure to do so, said creditors will be forever barred from participating in the proceeds of this assignment. This January 20th, 1916. NORWOOD L. SIMMONS, Trustee for Jefferson Furniture Company, a corporation, Washington, N. C. 1-23-16.

NOTICE OF SALE.

Under and by virtue of a Deed of Assignment made by the Jefferson Furniture Company, a corporation, to the undersigned Trustee, dated January 4th, 1916, and of record in Beaufort County Records, the undersigned Trustee, will on Monday, February 14th, 1916, at the hour of 12 M. at the store of the Jefferson Furniture Company, a corporation, on Main Street in the City of Washington, N. C., offer at public sale, to the highest bidder for cash, the following property: All of that stock of furniture, stoves, merchandise, fixtures, supplies, and all stock of said corporation located in said store building, and also all stock of said corporation located in the warehouse on the North side of Third street, in the City of Washington, N. C., together with all team, accessories, and fixtures, together with all book accounts, notes, choses in actions and titles retaining contracts of the said corporation. The right is reserved to fix a first bid, and to reject any and all bids made, and to sell the stock in part, and in bulk, and to accept that bid aggregating the most, whether it be in parcel or in bulk. The purchaser will be required to deposit 10 per cent of bid at time of sale, in cash, or bid will be rejected, and next highest bid accepted. Balance will be payable upon delivery of bill of sale. Time of sale Monday, February 14th, at Twelve M., at the store of the Jefferson Furniture Company, on Main Street, Washington, N. C., terms of sale cash. This January 31st, 1916. NORWOOD L. SIMMONS, Trustee.

JEFFERSON FURNITURE CO.
NOTE—A complete and detailed inventory of all stock in store and warehouse of all accessories and fixtures, and a complete detailed statement of all book accounts, contracts, and other evidences of indebtedness with the names of debtors, post of due, balance due and how secured, is on file with George A. Paul, Clerk of the Superior Court or can be examined or copies obtained from the office of Simmons & Vaughan, Attorneys, Washington, N. C. 1-13-16

SHORT ITEMS FROM Neighboring Cities.

Pleased With Fire Engine.
Belhaven—The new fire engine recently purchased by the Board of Town Aldermen from the Waterous Engine Works Co., of St. Paul, Minn., was given a try-out Tuesday and was put through a thorough test in throwing water through hose several hundred feet in length and also through three sets of hose of shorter lengths. The engine proved to be all that was claimed for it by the company and everyone who saw it work were greatly pleased.

Braswell is Home from Hospital.
Rocky Mount—Friends in the city will be glad to learn that Mr. J. C. Braswell, the president of the Planters National Bank, was last night able to return to his home here from Richmond, where he went on Sunday morning, last, for a minor operation. Mr. Braswell, according to reports, is convalescing rapidly, and this morning, he was able to be in his office for a short time.

To Take Insane Person.
Belhaven—Chief of Police J. Mack Paul went to Washington last week for the purpose of taking to the county jail one Robert Miller whose mind it is claimed is unound. Application will be made for him in the Insane Asylum at Goldsboro.

Shad Season Here.
New Bern—The shad season has arrived, but up to the present time there have been but very few specimens of this variety of the funny tribe on sale here and they have been commanding a pretty good price. Not only is the local demand for shad very large but the dealers here are receiving many requests from the dealers in the North asking that they use every available method in order to ship them as many as possible. The supply of oysters on the local market for the past few days has been large and the quality of the bivalves has been far superior to any previously brought here this season. Among the oysters now coming in are many "green gilled" ones. This variety of bivalves, say experts, are the finest in the world. The green color is attained by the oyster as it lies on beds of sea grass.

Roasted Alive.
Wilson—Unknown parties went to the home of Willie Hinnant, an industrious negro, who farms in Spring Hill township, on last Friday morning just before day and after placing hay in and around a pen in which three hogs were being fattened, fired and burned the pen and cremated the hogs, which would have "dressed" five or six hundred pounds.

Want Light Plant.
Greenville—Mr. T. J. Bland, Secretary of the Washington Lighting Commission, appeared before the board of aldermen last week and made application for a franchise for erection of a gas plant in Greenville. Aldermen Wilson, Hooker and Ferguson were appointed to investigate and report as to the advisability of granting the franchise.

His Throat Cut.
New Bern—A report reached New Bern today from Allsbrook, S. C. telling of an assault made a few days ago near that place on Burl Reaves, a former employee of the Norfolk Southern shops in this city. According to the information received here, Mr. Reaves was attacked by an unknown negro, presumably for the purpose of robbery, and during the encounter his throat was cut from ear to ear.

Iron in the Ocean.
A piece of iron will sink to the bottom no matter how deep the water is because water is only slightly compressible. If water were highly compressible, as air is, the water at a great depth would be much denser and therefore heavier, and an object would sink until it reached a point at which its weight would be less than that of the water which it displaced, and there it would float, as clouds float in the atmosphere. But a cubic foot of iron weighs more than a cubic foot of water at a depth of two miles, just as it does at the surface, and therefore continues sinking until it reaches the bottom.—Christian Herald.

Presenting It.
"I see you are presenting 'Hamlet' to the public this week."
"Presenting is the right word," answered the manager. "Nothing but deadheads in the house."—Louisville Courier-Journal.

The Health Alarm

often sounds first in the doctor's office when some healthy looking specimen of humanity, undergoing examination for life insurance, is told that his blood pressure is too high.

Increased blood pressure is no longer confined to old age; it is frequently found in men in their 40's who are otherwise healthy. In such cases it points to approaching degeneration of the arteries—a condition which in turn indicates those errors of diet that often end in various diseases of the stomach, kidneys, liver, nerves and heart.

Among these errors of diet is coffee drinking, because of the drug, caffeine, in coffee, the constant use of which weakens the walls of the arteries. Medical authorities now insist that in all cases of high blood pressure there must be total abstinence from coffee, tea and other harmful beverages.

Hard to give up coffee? Not at all, when one uses instead the pure food-drink

Instant Postum

This delicious beverage is made of wheat, roasted with a little wholesome molasses. It is then reduced to a soluble powder, a level teaspoonful of which with hot water makes a perfect cup instantly.

Instant Postum tastes much like mild Java coffee, but is absolutely free from the drug, caffeine, or any harmful ingredient. It does contain those vitalizing elements of the grain which make for normal balance of the system.

"There's a Reason"

Send a 2-cent stamp to Postum Cereal Co., Ltd., at Battle Creek, Mich., for a 5-cup sample of Instant Postum.

ANIMAL INDUSTRY DIVISION ACCOMPLISHING GOOD WORK

According to Director Kilgore, of the North Carolina Agricultural Extension Service, some good work has been accomplished by the Animal Industry Division in promoting the livestock industry of the State. This division is doing extension work with the dairy and beef cattle farmers of the State, as well as giving technical instruction in the Pig and Poultry Club work with the young people.

In forming cow testing associations 326 cows were tested for one year and 43 were found to be unprofitable and were sold. During this period the cost of producing a pound of butterfat was reduced from 39.6 cents to 27.1.

During the year a creamery was built at Mooresville and assistance was given in building the one at Lincolnton. Another was erected at Lexington with the assistance of the division. The plans of creamery promoters were frustrated at Grover, Essex City, Burnsville, and Rutherfordton. The old creamery at the college was worked over and an up-to-date creamery established for the territory surrounding Raleigh. Thirty dairy barns and ten cooling tanks were established over the State. Personal supervision was given in the building of 15 silos, and

County Agents working under instructions from the Dairy Office constructed 100 more. Four cheese factories were installed during the year.

Forty-five dairy schools were held during the year, with an attendance of 5,485 pupils.

Four thousand head of beef cattle were examined and graded at Clyde for consignment to Northern markets.

In the Pig Club work 156 addresses were made before 56 gatherings, and 14,000 children and grown people were in attendance. Two hundred and fifty members of the club were paid personal visits. The total membership of this club was 783 during the year.

The membership of the Poultry Clubs during the year was 1,046. This work is largely accomplished by personal visits to the homes and schools, and was found to be a means of reaching pupils who could not be reached before.

WON'T IMPROVE NEUSE RIVER

Unfavorable Report Made by War Department on Deepening River Up to Goldsboro.

(By Eastern Press)
Kinston, Feb. 7.—The War Department, says a report from Washington, reported to Congress Friday adversely on the project for improvement of Neuse river between Goldsboro and New Bern.

Such action had been expected, since a report of the Board of Engineers who investigated the project some months ago indicated that a favorable report would not be forthcoming. The engineers did not think the benefits that would accrue from a deeper, straighter and wider channel would be compatible with the expense of the undertaking.

The improvement of the upper part of the Neuse was Congressman Geo. Hood's pet scheme. The new Representative from the Third district hoped to see steamer competition with the rail lines running into Kinston and Goldsboro, and river transportation afforded the small places along the stream. The Kinston and Goldsboro Chambers of Commerce backed the Congressman and furnished the district engineers with a mass of data and lots of argument.

DIE'S SUDDENLY AT VANCEBORO

Vanceboro Citizen Dies in Store of That City While Making Some Purchasing.

(By Eastern Press)
New Bern, Feb. 7.—Samuel Ellison, whose home is located about one mile from Vanceboro, and who was one of the best known citizens in that section, died suddenly this morning while he was in the Farmers Supply Co.'s store at Vanceboro doing some trading.

Mr. Ellison was apparently in good health this morning, and his sudden demise came as a shock to his many friends. Dr. Johnson, of Vanceboro, was in the store at the time and gave all possible medical aid but this proved of no avail.

The deceased is survived by one sister who resides at Kinston and whose name could not be learned this morning.

To Find the Water Level in Soil. In the Farm and Fireside is the following advice to the farmer who is about to plant his crops:

"The water level is a term used in speaking about soils. It means the depth in the ground where the soil is saturated with moisture. To find it simply take a post hole digger and dig down until water stands at the bottom of the hole. Do this in an ordinary season when the ground has about the average amount of moisture. For most crops the water level should be about three feet below the surface, for alfalfa at least five feet. A water level two to three feet deep is excellent for the majority of farm crops."

FOUND! The Best Protection Against Poverty in OLD AGE

A steady increasing bank account with the undersigned. What could be more sensible? What is more satisfying? NOW is a good time to begin. Tomorrow may bring heavier expenses or a smaller pay check.

Bank of Washington Washington, N. C.

THE WIFE
"Collier's Weekly" says: "A wife should never stand in the way of that life insurance which is her only protection from privation and poverty. On the contrary, she should demand it. She should insist that it be regarded not as an extravagance nor as an investment, but as a necessity. It must come before luxuries, such as supermillinered bonnets for the wife and cigars for the husband. In fact, it should arrive with the wedding presents. A husband who cannot afford to put a policy of insurance upon his life in the hands of his bride is too poor to buy a marriage license or to pay a wedding fee." Let us write your Life Insurance in the Mutual Life of N. Y., the oldest and largest in the United States.
