## TOBACCO GROWERS ARE OFFERED NEW CONTRACTS BY AAA

(Continued from page 1.) lished with such downward and upward adjustments as will result in more equitable bases. 2. Provide for one adjustment payment at the end of each contract year. 3. Set a limit of 35 per cent. of the acreage and production reduction which may be required in any one year. Those eligible to sign the new contracts will be persons who are operating farms as owners or cash standing rent tenants. In the event a landlord does not supervise the operation of his farm and the entire farm is operated by one share-tenant or share-cropper, either the landlord or the tenant may sign the contract. The contract further stipulates that a payment will give growers a return "not less than the difference between the average farm price and the average parity price" for the part of the crop which is equal to domestic consumption. Or, to put it more plainly: Amount of Payments The payment will make up any difference between actual farm price received and parity price of the domestic portion of the crop. A little more than 40 per cent. of the AAA reports, if the flue-cured crop is domestically consumed. Adjustment rates for each of the three years will be determined after sale of the crop. Around 137,500 growers in North Carolina, Virginia, South Carolina, Georgia and Florida are now signers of flue-cured con-

## Checking Over School Trucks

John G. White, county mechanic, has been busy for the past few days checking over the Brunswick county school buses, getting them in condition for the coming school year. The trucks are taken from their storage place at Southport to Shallotte for any necessary repairs. Forty buses were in operation in this county last year.

## INFANTILE PARALYSIS (Continued from page one.)

The second case was that of the three and one-half year old baby of Mr. and Mrs. Ernest Watson of the Battle Royal community. This child, too, was taken to Dr. Crouch in Wilmington but has since been quarantined. Public gatherings in the two communities where the disease appeared have been discontinued for a time in compliance with the recommendation of Mrs. Smith.

The case of typhoid fever reported last week is getting along nicely, according to Mrs. Smith, and no other infectious diseases have been reported in the county since last week other than the two above-mentioned cases of infantile paralysis.

tracts which covers about 98 per cent. of the total acreage of this type of tobacco, representing about half of the United States' tobacco production. Of this, about 60 per cent. of the crop usually is exported every year. Under the terms of the 1934-1935 contract, growers were permitted to establish base acreage and production for their contracts from production in any one of 1930, 1931, 1932 and 1933. The special base contract of this year provided for establishment of bases for growers who could not obtain an equitable base under the regular contract. But bases already established will be adjusted in the new program to obtain more equitable bases as between all classes of growers. If he plants less than 50 per cent. of his acreage allotment for two years, special provision is made for cancellation of a producer's contract. The contract, in such cases, will be cut off as of the first year and will not affect payment for that year. Hutson Discusses Program Discussing the new contracts Mr. Hutson said that provisions of the new contract already had been discussed at great length with tobacco growers, representatives of the various Extension Services in States all over the country and numerous other persons, adding: "We think that the provisions represent the views of the tobacco growers to the fullest possible extent. Growers who have helped in developing the program requested that the fullest consideration be given to small growers who customarily plant three acres or less of tobacco. "This request is in line with the policy adopted in connection with the 1934-1935 program and it will be given consideration in the administration of the new program." The contract will cover four years. The new contract also provides that the number of tenants and share-croppers on the farm and the percentage of the tobacco acreage grown by tenants and share-croppers may not be reduced below the number and percentage of this year's contract.
