

Properly Stowed Bags Add to Comfort

Comfort, pleasure, and safety on a tour depend largely on efficient loading of the luggage, and modern body designs have done much to ease the problem, as these views of Chevrolet models reveal. In the upper left view, the suitcases have been fitted in snugly, the adjustable front seat having been moved forward to allow extra leeway, and the driver is now pushing back the seat to clamp the bags in place for the day. Upper right, the tourist is utilizing the baggage space back of the rear seat. The two lower pictures show the loading of a coupe compartment and a sedan trunk.

Lespedeza growers who are planning to produce seed on a commercial scale have been busy in August mowing weeds in their fields.

J. F. McGraw, of Mooresville, Iredell county, has had 2½ miles of broadbase terrace built on his farm this summer by the county soil erosion unit.

Twenty-six farmers in Stanly county are raising colts as a part of the county-wide program of producing work stock at home.

Yadkin county bee men report harvesting from 50 to 100 pounds of honey per colony this season.

Fifty-one Watauga county sheep growers shipped 373 lambs to the Jersey City market last week where a majority of the animals graded "choice" or "good."
