ry on the undertaking may be the money that wins all, your failure to invest and do your part may result in the loss of all.

It is now or never—it is everything if we win—it is nothing now or ever if we lose.

Editor State Port Pilot, Southport, N. C., Dear Mr. Editor:— I am sending herewith a copy of a front page article...

"Boys and Girls Wanted— Mr. Farmer explains—Brother Thad K. Jones, of Timberlake, N. C., copied the following article from the Pentecostal Herald and sent it to us for reprinting:—

"We can use your boys in our business now and at any time during this generation. Two million of your neighbor's boys and girls are wanted. They are as necessary in our line of business as saw logs are to a sawmill or wheat to a flour mill."

Good Dairy Cows Pay Best Profit

Low Producing Cows Prove Expensive Rather Than A Profit, According To R. H. Ruffner Of State College

Ten good cows are more profitable than 20 low producers. In fact, low producers are often an expense rather than a profit, declared R. H. Ruffner, head of the animal husbandry department at State College.

A cow giving six quarts of milk a day just about pays for her feed, Ruffner said. She pays nothing for stable rent or for the labor required for her care and milking.

But a cow giving 10 quarts of milk daily will yield a net profit of \$40 a year. Ten such cows will produce a clear profit of \$400 a year. Cows giving more milk produce an even larger return.

The exact figure, of course, will vary with local conditions, the price of milk, and the cost of feed, Ruffner added.

Many dairymen who did not make money last year are thinking of buying high priced cows. In many instances they would do better to sell their lowest producers and endeavor to raise the efficiency of their better animals.

Every dairyman should seek to develop a herd whose average production is at least 8,000 lbs. of milk a year, Ruffner pointed out. Top quality cows frequently produce 9,500 pounds a year or more.

our record in the United States: 160,000 persons drop into a drunkards grave every year; 50,000 are suicides; 10,000 babies less than a week old are murdered, and 60,000 who are never born are murdered; 60,000 mothers' girls die each year as prostitutes; 50,000 mothers' girls are seduced every year. Last year there was an increase of 3,900 murders and homicides and 3,000 suicides.

Proper feeding and management of the herd will do a great deal to stimulate milk production and keep it at a high level, Ruffner added. And good feed, much of which can be produced at home, need not cost more than the wrong kind of feed.

Another important step in herd improvement is the breeding of cows to bulls which can transmit to their daughters a capacity for heavy milk production.

As these calves mature, they may be kept in the herd while their somewhat lower producing dams are sold.

TREAT CEREAL SEEDS TO CONTROL DISEASE

Smut diseases on wheat, barley and oats can usually be controlled by treating the seed just before planting in the fall.

The following treatments have been found effective by Dr. S. G. Lehman, professor of plant pathology at State College.

First of all, clean the seed. Run it through a fanning mill, if possible, to remove large clumps of smut and unbroken wheat grains containing smut spores.

Covered smut on wheat may be treated with copper carbonate or ethyl mercury phosphate. Put two or three ounces of the former, or one-half ounce of the latter, on the seed in a closed barrel, or like container, and roll it around on the ground until each seed is covered with the dust.

When copper carbonate is used, the seed may be stored or planted at once. When ethyl mercury phosphate is used, the seed should

Second Week Of Radio Programs

Carolina Farmer Features, The Daily Presentation From WPTF, Raleigh, Sponsored By Extension Division Of State College

Carolina Farm Features, the daily radio presentation of the State College Agricultural Extension Service Station WPTF, Raleigh, began its second week Monday.

Special attention has been called to addresses by E. Y. Floyd, director of the tobacco program in this State; D. S. Weaver, agricultural engineer; and J. F. Criswell, director of the cotton program.

Floyd's talk concerns the new tobacco contracts, which are now being signed by growers over the State. This will be of particular interest to weed growers.

Criswell will speak on the new cotton contracts, explaining the future of the cotton adjustment program, and Weaver will tell about the rural electrification program.

The programs for this week, which open each afternoon at 2 o'clock, are as follows: Monday, John A. Arey, "Winter Hays for Dairy Cows"; Tuesday, E. Y. Floyd, "Tobacco Contracts"; Wednesday, Dr. J. V. Hofmann, "North Carolina Forests"; Thursday, J. F. Criswell, "New Cotton Contracts"; Friday, D. S. Weaver, "Developments in the Rural Electrification Program"; and Saturday, Miss Mary Thomas, "Foods."

Folger Johnson of Chatham county is conducting a demonstration in raising capons for the market. He has a flock of 150 of these birds.

SUPPLY NEWS

Miss Ida Sellers has returned to Wilmington after spending several days with her brother-in-law, Mr. F. T. Clemmons.

Mr. and Mrs. George H. Hewett, of Wilmington, visited relatives and friends in Supply Tuesday.

Mr. A. S. Hewett had the misfortune to get one of his negro men hurt at his saw mill Wednesday.

Grover Sellers, of Supply, made a business trip to Southport on Monday and while down there he saw his cousin, Elton Hewett, who is home visiting his parents, Mr. and Mrs. J. W. Hewett, of Southport.

Friends of Mr. D. H. Caison are glad to hear that he is improving from a recent stroke.

Farmers are having quite a time gathering their hay owing to the wet weather.

Captain A. W. Clemmons, of Shallotte, stopped in, to tell friends this week that he is fixing to open up the Mid-Way Filling Station on the Southport road.

Currituck farmers report an unusual amount of "horse trouble" due to mouldy feed and impure water.
