than last.
Hundreds of acres of this crop
have already been cultivated and
the plants are thriving. Young
corn usually makes fine headway
even in dry weather, and thus
far the crop has seen very little
rain.

The peak of the work of trans-
planting tobacco plants has past.
It appears that this season is
one when no grower will be
troubled by a scarcity of plants.

Farmers who grow strawber-
ries, and a considerable number
who handle this crop on a small
scale are said to have been hav-
ing some excellent picking. The
production is good and the quality
is said to be the best in several
years. The price is also excep-
tionally good.

Turning from field crops,
Brunswick county farm women
and many living in towns, are
said to have some of the nicest
gardens they have had in years.

Both County Agent J. E. Dodson
and Miss Corinne Greene, the
home agent, have recently com-
mented on the excellent garden
prospects.

A great many home owners at
the beach, some from distant
points, came down during the
week, planning to spend the week
end, summer or to get ready for
the summer. Unable to get across
the waterway except in a row
boat, some of them were rather
indignant at what they termed
lack of effort to maintain ser-
vice.
