SHALLOTTE TRADING CO. HOBSON KIRBY, Prop. SHALLOTTE, N. C.

The feed that keeps poults putting on pounds and growing into full-breasted premium birds. Supplies just the right balance of nutrients to help you get bigger gains from every pound of feed.

Cuts Feeding Costs - by promoting rapid growth. Increases Profits-by building turkeys that bring premium

prices.

Headquarters for CERTIFIED and VIGORENE Feeds The Country Store LONGWOOD, N. C.

the New Earthmaster "C" Series Tractors

Repeat orders piling up from Farmers all over the country prove the sales appeal of Earthmaster's outstanding design and construction. Satisfied farm users prove its freedom from service needs, its adaptability to many uses on large and small farms.

New from the ground up, the Earthmaster takes full advantage of modern materials . . . war-developed manufacturing and construction techniques. This new Earthmaster fully meets the needs you Farmers have set forth for postwar tractors.

Features Sell Tractors-Look At These Earthmaster Features

Safety Brake Control . . . two differential brakes stop wheels separately or can be operated simultaneously by clutch pedal for emergency stops and easy maneuvering.

Rocking Chair Ride. . . Top comfort and stability with a new seat spring arrangement which adjusts to bumps and tilts. Built-up steel . . . for extra strength, replaces traditional castings in main frame, front axle, rear axle housing and drop axle housing.

Power takeoff . . . for mechanical driven equipment belt drive for all belt jobs-smooth streamlined design. . . enclosed stack and radiator cap-full line of heavy duty implements, hydraulic controled.

Highest power for weight ratio gives ample power to pull 14" plow and other implements.

Maximum clearance and adaptability for Row Crops special 241/2" clearance on model CH, 20" clearance on model C. Easy tread adjustment from 36" to 64" . . . either model can be set at a lower position for hill or orchard work.

Duomatic Hydraulic Controls . . . 4-way valve gives precise implement control to raise, lower and hold implements at desired working depth. . . separate hydraulic cylinder for each bottom on 2-way plows to control either one or both plows as desired.

You will quickly see why only Earthmaster tractors combine all these features and sales pulls-why Earthmaster is already the profit leader.
