Physical Culture Needed By Children

Children need physical culture. The very idea seems absurd, with all the exercises secured at play, but it is a fact.

There comes a time when the natural activity of a child lapses into sedate behavior. We frequently actice and comment upon the child being so lady like or manish. This is dangerous and may permanently impair the childs health. The first step in this direction is taken at school. The habit unconsciously grows on the child when her mind is engrossed in study. A certain amount of exercise should be required each day at school, and also made a duty of the afternoon at home. During the summer daily walks and the use of dumb bells, indian clubs, calesthenics, etc.
ahould be regularly indulged in. In
this way the beauty and health of
youth is sustained and perpetuated after maturity.

Artists have no trouble in securing models.

The Foremost Task.

The chief political task for North Carolina is to bring about effectual thems of expressing popular opinion.

That is the essential task of every opinion is agreed upon by a few handed down in conventions to the people. We shall not have true democracy
