Mack Newbury, a colored man who lives in the north eastern part of town, has found the greatest hot spring that has ever been discovered in this part of the State or perhaps anywhere. In a small scope of 50 feet square there are 25 springs, and one is real warm. Another some six feet from the warm spring is as cold as ice water. A company of capitalists is being organized to develop the valuable waters. This company is arranging to build a bathing or seining pool. By piping this water just a few yards you can have a pool of either hot or cold water. It is expressed by many that this will be a better place for bathing than the Pool of Siloam, which the Bible tells us about.
