Our Trip to Jamestown--And What Interested Us.

Another Member of The Courier Contest Party Tells of Things that Impressed Her Most At the Great Exposition.

As you all know there were several that entered the Asheboro Courier Contest that won the much Conrier Contest that work trip. Where desired Jamestown trip. Where we had fancied and dreamed of the beautiful sites and grand scenes of beautiful sites and grand scenes of Best Record Each Month. compared with the real to the majority of us. Our chaperone gave us note-books and asked us to take note of the things of most interest to us but friends let me tell you, I knew we would not have long to stay there, and there were too many knew we would not have long to stay there, and there were too many things for me to ree to stop looking long enough to take notes. I just saw so much (but I am going to saw so much (but I am going to tall you about some things). I that helped the love of our nation and promotion of Justice, Law and Order.

The banner is expected to stimmation in these principles.

During the day we visited the Government buildings. Among the things of interest here were the old time war implements, the cannons mounted on rude wagons, the horses and mules arrayed with the barness of that day and packed ready for travel. The soldiers in their uniforms, and showing how they cooked their food. In one of these buildings who should we come in contact with but Capt. John Smith and his crew trading. John Smith and his crew trading with the Indians. This illustrates white indians. This illustrates their generosity in dealing with the whites who were kind to them. One Indian has presented an Englishman with a plate of persimmons and they all seem amused when he tests them and leaves the impression on his face they are not a very palatable dish.

In the Maunfacturer's Building we saw the Waltham Watch Company's department, where every thing that it takes to make the thing that it takes to make the wonderful little piece of machinery to keep the time as expected. In this is a glass case containing 9,000 Waltham watches ruined by the San Francisco fire. Here was also exhibited a silk thag made and presented to the United States by Turkish Orphans, also another silk flag of a beautiful color presented to the United States by France in sympathy at the death of President Lincola. Another interesting and antique exhibit was a real Hine oo Temple, carved and built of pure Mahogony wood that cost \$40,000. I do not remember the height, but I do not remember the height, but there was a small room down stairs with the furniture in it, then two the accident, winding statiways (where you would

with a small room at the head.

We then visited the Fish building, where all kinds of fish were exhibited in different apartments with rocks, sand, shells and pleuty of clear water to swim in. I am sure this would be very interesting to some of our famous Randolph anglers. Our next move was to the State Buildings. These are magnificent buildings, well furnished, some with ancient furniture and tapestry, all had comfortable and inviting parlors, but you all know we fell most the state of the sta inviting parlors, but you all know we felt most at home when we reached the Old North State Building. There we could sit on the arm instead of 11 s. m., and at Careaches the reaches the distance across the beautiful bay Fortress Monroe and Old Point Comfort. The Kennal Old Point Comfort. The Kennal Old Point Comfort of the 22d, at 11 o'clock, and at Tabor a solder in the afternoon. and our Point Comfort. The Ken-tucky Building was a reproduction of Daniel Boone's home, surrounded by a rustic f-nee and small cabins, this reminds one of the early Pioneer days. The Rhode Island building Sunday in September. was also very interesting. Another building of very great interest was the Pure Food Establishment, where you find everything good to eat in the different stages of preparation.

At night we visited the War Path, I will only speak of a few of the most interesting attractions Paul Revere was very impressive and am sure stirred every patriotic heart. Princess Trixic amused all by her tact and skill. She spelt words correctly, told the time ex-actly to the minute and selected colors remarkably. During the

GRADED SCHOOL BANNER.

each month to the grade showing by requiring a condepart of the best average. The banner will within ten days after marriage, and be provided at a cost of not less der penalty of \$100. than \$25.00. The Junior Order w. u. u. r. stance first for the advancement of the public schools of the country, in

late interest in these principles. The climax of the contest will be reached at commencement, when the banner will be awarded to the class making the best general average for the term. The banner will be hing on the walls of the room of the winning class.

The classes will be graded as

Attendance Deportment Scholarship Neatness of class room 16 2 3 "

Every one cannot be a bright scholar, but every one can be punctual; every one can conduct himself or herself as a little lady or gentle

man, and every one can assist in keeping the class room neat and clean. These go a great way in planting seed for good citizenship.

Already a great rivalry has spring up among the pupils and the movements of the banner will be closely watched by every patron and friend of the school.
