

RUSSIAN'S QUEER RUSE.

Escaped Notice and Deportation by Landing in America in a Barrel.
Hyman Mosowitch, a Russian Jew who fled to America from the outrages in his country, has had the unique experience of landing on the shores of America nailed in a light barrel, says a Waterbury (Conn.) special dispatch to the New York Times. Mosowitch left his country rather suddenly and while on his way to the United States met with an accident in which he lost an eye. He was informed that he would be deported.
Mosowitch called his friends together, and a sum of money was made up and offered to one of the petty officers of the crew to land the man. The officer, knowing the circumstances, prepared a barrel, and as the steamer was plying New York lay a boat was lowered containing a barrel in which Mosowitch was safely stowed away.
The sailors pulled in on the Holoken shore and rolled the barrel off. A few days later Mosowitch appeared in Waterbury, Conn., where his friends were wondering about his safety.
On the same vessel with Mosowitch was Max Goldman, who was informed that he would not be allowed to land because of his defective eyes. He would not take a chance in the barrel, however, and was promptly deported.

BAD FOR WILDCATTERS.

Order of "Stopers" Will Organize Lodges Throughout Mexico.
The Stopers, a new organization which is attracting wide attention among mining men, is preparing to establish a number of lodges in Mexico. In addition to embracing the usual fraternal features such as sick and accident benefits, insurance, etc., the Stopers expect to join forces in promoting in every way possible the best interests of the mining industry, while all wildcat schemes will be exploded, says Modern Mexico. Legitimate mining is a business that is growing every day, and the fact that it has been a favorite prey for the illegitimate schemer has had much to do with the inception of this organization, as it is hoped that by the organization of those engaged in the legitimate exploitation of the industry mining may be placed upon a higher plane.
The scope of this unique organization is liberal, in that it admits to membership miners and men engaged in legitimate mining. This includes mining engineers, owners, mining brokers, managers of mines, stockholders in mines, etc., and in fact all reputable men who are identified with the great mining industry.

WOMAN'S HAIR AS THREAD.

French Dramatist Treasures Trousers Mended With Actress' Locks.
M. Georges Duval, dramatist and author of "Les Petites Michu Veronique," has a pair of trousers which he will not give away, though they have been mended," says a Paris special cable dispatch to the New York Herald. The reason is that the thread which served to repair them is hair from the head of Mlle. Marcelle. The lender is one of Paris' most charming actresses.
During a rehearsal at the Nonvauter theater M. Duval tore his trousers to such an extent that it was impossible to go out. In a short time a theater dresser was found who had a needle, but by strange chance not a thread. Accordingly the leader plucked some hair from her head, threaded the needle with it, and summary repairs were accomplished.

Elephant Fire Brigade.

Buell, an elephant over 20 years old, said to be the mother of the famous Jumbo, owned by a circus company, saved a man from death the other day, says a Wheeling (W. Va.) dispatch to the New York Tribune. A freight train on the Baltimore and Ohio railroad had been wrecked near Mountaintown, and the engineer was caught underneath. The wreck caught fire, and it seemed that the man was doomed. Two sections following the wrecked train having aboard the circus coming-up, Buell lifted the wreckage with her trunk from the body of the engineer, and he was taken out just as the flames reached him. Eight other elephants were organized into a fire department and, going to the Monongahela river, filled their trunks with water and extinguished the burning cars.

Speeches, Heard Funeral Details.

Apparently dead and unable to move or speak, Bishop C. Hooper, a miner of Meadow Creek, Mont., heard his friends prepare for the funeral, says the New York Evening World. Only the distance at which the undertaker lived prevented his being buried alive. He suffered agonies while valiantly trying to indelicate to the mourners that he was alive and not ready for the obsequies. After twenty-four hours he recovered the power of speech just as the undertaker appeared to embalm him. The shock of his fright was so great that he has gone to his former home in the south.

Fall Styles in Shoes.

Women's shoes are going to pinch this fall, according to the styles shown at the second annual shoe and leather fair, which was recently opened in Chicago, says a special to the New York World. They are to be pointed more sharply than in many seasons and on far from common sense principles. Masculine leather wear runs to graces rather than comfort, too, but the need effect is not quite so pronounced. Buckles are decreed by fashion for autumn. Some patterns for men show two buttons and one buckle. Women's pumps are mostly of the strap variety.

Making Homemade Ice Cream.

(By Sara Cranford)

When giving an entertainment at which refreshments are served it simplifies matters greatly to have the ices prepared at home. The following are some general suggestions for making simple ices:
First, place the ice in a thick bag and hammer till all the pieces are small, the finer the better. Put three bowls of this ice into a pail and so on, mixing with a long handled iron spoon. Put the covered can into its bucket and fill in the spaces with the ice and salt, press it down well. Let it stand in a cool place with a piece of heavy cloth wrapped over it till the inside is very cold, then wipe off the top carefully so no salt can get in, and pour in the cream, which must also be cold, or it will melt the ice. Put on the top and turn smoothly until the cream is stiff, which should be in five minutes. Draw off the water from the bucket, wipe off the top again, and take out the dasher, pressing down the cream and scraping it from the sides. Put on the cover and insert a cork in the dasher hole. Pack again with ice and salt, using one part salt to four of ice. Dip the heavy cloth in salty water and cover the freezer tightly, and let stand in a cool place until time to serve it.

Plain Ice Cream.—Three cupsful of cream, one cupful of milk, one scant cupful of sugar, two teaspoonfuls of vanilla are the proportions. Put the cream, milk and sugar on the fire and stir until the sugar dissolves and the cream wrinkles on top; do not let it boil. Take it off, beat it until it is cold, add the vanilla and freeze.

Coffee Ice Cream.—Make as above but flavor with half cupful of black coffee instead of the vanilla.

Chocolate Ice Cream.—Make plain ice cream; melt two squares of chocolate in a little cream or in the teakettle. Mix a little of the milk or cream with this and stir it smooth, then put it in with the rest. Use a heaping cupful of sugar.

Lemon Ice.—For this use one quart of water, four lemons, two and a half cupfuls of sugar and one orange. Boil the sugar and water for ten minutes; strain it and add the juice of the lemon and orange; cool and freeze.

Orange Ice.—One quart of water, six oranges, one lemon, two and a half cupfuls of sugar; prepare as lemon ice.

Small Boy's Essay on Newspapers.

Here is a small boy's essay on newspapers. He ought to make a good editor when he grows up:
"Newspapers are sheets of paper on which stuff to read is printed. The men look over it and see their names in it. I don't know how newspapers came into the world. I don't think God does. The Bible says nothing about editors, and I never heard of one being in heaven. The first editor I heard of was a fellow who wrote up the flood. He has been here ever since. Some editors belong to the church and some try to raise whickers; all of them raise Cain in their neighborhood. Sometimes the paper dies and then people feel glad, but some one starts it up again. Editors never went to school because editors don't get licked. Our paper is a mighty poor one, but we take it as ma east use it on her panty shelves. Our editor don't amount to much, but pa says he had a poor chance when a boy. He goes without underclothes in the winter, wears no socks and has a wife to support him. Pa has not paid his subscription in five years and I don't intend to do it."

THIS MOVING PICTURE MACHINE IS A GREATER INVENTION THAN THE PHONOGRAPH

The films which reproduce the wonderful pictures shown by this machine are fifty-two pictures to the foot, popular standard size. This is the size endorsed by the leading moving picture entertainers who make thousands of dollars a year showing excited and amusing pictures of momentous events. The films are all contained on a 16-foot endless chain. These films are taken one after the other and catch the moving objects in the different stages of action, thus presenting them to the eye as if the objects were really alive before you.

You don't need to do much traveling when you have a good moving picture machine in the house. You can sit right in your own parlor and look at scenes from all over the world just as if you had traveled thousands upon thousands of miles and were looking at the real scenes themselves. The moving picture machine keeps the most interesting and continual round of laughter when the funny pictures are shown. Mail the coupon.

For instance when you are looking at a hunting scene and the horse on which a hunter is riding takes a tumble when he jumps the fence, it is funny to see the rider fall over and over on the ground and then get up and feel the lump on his head. The machine is very popular when there is a party at your house.

Every home may be turned into a regular picture show. For instance there is no one who would not be willing to pay to see President Roosevelt delivering one of his speeches. It is so real you can almost hear the words and all one has to do is to read the speech he is delivering and you
