What to Do if You Have Catarrh.
If you suffer from chronic catarrh of the head, nose, throat or lungs, you must get down to some treatment more reasonable than sprays, douches, blood remedies, ointments and inhalations, for all of these have proven failures.
A treatment entirely different from any of the above consists of a warm medicated smoke vapor, which being inhaled reaches directly every affected spot. This is certainly the most practical and reasonable method, for as catarrh gets into the air passages by the inhalation of cold or raw air, dust, etc., so it can be reached by medicine in the same manner.
Dr. J. W. Blosser, who originated this new form of treatment, has made catarrh a specialty for many years and his remedy has been so successful in the cure of catarrh, bronchitis, catarrhal deafness, asthma, and all catarrhal affections, that it is now being used in all parts of the country.
If any reader who suffers from catarrh would like to give this remedy a test, and will write to Dr. J. W. Blosser, 400 Walton street, Atlanta, Ga., he will send by mail a free trial sample of the remedy, and also a free booklet telling all about the treatment.
