Children Cry

FOR FLETCHER'S CASTORIA

Church Quiz Card.

The following is a card containing questions which a Presbyterian minister distributed among his members preparatory to an evangelistic service which was to begin within a few days after the distribution.

1. Have you a prayer-list of the unsaved?
2. Have you a prayer-list of professing Christians who are living in sin?
3. Have you a prayer-list of trunk members?
4. Have you a prayer-list of special objects?
5. Do you pray privately at least once a day?
6. Do you read a chapter in your fible at least once a day?
7. Are you getting rid of your badhabits?
8. Are you forming any good habits?
9. Do you show your love for the members of your family?
10. What kind of influence are you exerting in your family?
11. Are you training your children for the service of God or the Devil?
12. Do you have family worship at least once a day?
13. Do you have family worship at least once a day?
14. Are you talking to the unsaved about their need of salvation?
15. Are you trying to get the unsaved do tomfess Christ?
16. How many people professing Christians or unsaved, did you get to come to church, to prayer-meeting, to Sunday school, to missionary meetings, tothe socials and all the other services of the church?
17. Are you showing your love for the services of the church?
18. Have you gome to that person against whom you have something, or whom you think has something against you?
19. Are you continually looking for slights and insults?
20. Ave you chains the words at the services and elsewhere?
30. Are you continually looking for slights and insults?
31. Are you continually looking for slights and insults?
32. A promit the curch of the unsaved in the newspapers and magazines recently about the curity powers of radium that we publish the following article taken from the current issue of The Youth's Companion:

4. Have you a prayer-list of professing that the service of God or the Devil; yand Bazil; and as monazite is much less.

Apparently, it has the same cural we properties as radium and a singletube or plate can be used for The following is a card containing questions which a Presbyterian minister distributed among his members preparatory to an evangelistic service which was to begin within a few days after the distribution.

Are you living such a life that example is always a witness for

INTERNATIONAL SUNDAY SCHOOL R LESSON

LESSON FOR MARCH 1

TRUSTING IN RICHES AND TRUST-

LESSON TEXT—Luke 13:13-24. GOLDEN TEXT—"Where your treasure a there will be your heart also."—Luke

of the multitude" desired to bolster his claim to a portion of an inheri-tance. He was sure that his brother needed admonition from Jesus, the result of which would accrue to his advantage. Jesus made a sharp, quick reply. He had been teaching about the sin of covetousness, but by his answer he intimates that his mission was not to judge men of that or any other sin. His work as a judge was to come later, John 5:19-32. There are thousands who for the prospect of personal gain would strictly enforce the ethical principles of the gospel though at the same time they are not willing themselves to abide there-under. Covetousness is a desire to secure more and it is not confined to the rich nor to the poor. There-fore Jesus sounds a warning. "take fore Jesus sounds a warning, heed" (v. 15) e.g., beware. This itch-ing is so gradual and often begins with a desire to possess things that are good of themselves and frequent But as it creeps in we find it becom-ing a great sin. A desire to build up a church, or even to compass the sal-vation of a loved one, may be animated by a selfab, covetous motive, see I Cor. 5:10, 11; 6:10, and Eph. 5:3, 5. A man's life consists not of the things possessed and the desire to get should be lost in the desire to for the glory of God.

Lighten Other's Burdens

II. The illustration, vv. 16-21. This warning of Jesus against wrong sense valuations and his suggestion as to the true source of life, are empha-sized by his illustration from life. All material values come from the earth.
Mine, forest and field are the sources
of all wealth. But in this illustration
the ground yielded "plentifully." He
took great counsel with himself. In these three verses are twelve personal pronouns. Prosperity is heaped upon prosperity, yet his enterprises were lawful and legitimate for there is no suggestion of wrong methods. The trouble was that in his self-centered pride he saw only the gratification of his material appetites. Any human activity, even the highest, may beactivity, even the highest, may become grossly self-centered. His plans of enlargement were wise in the sight of men, but he left God out of his calculations, and this is the common mistake worldly men are making, Jas. 4:13-15. His anxiety, a characteristic of those who trust in riches, was uncalled for, and the folly of that course was revealed in a flash when he was called into the presence of God: "The things which thou hast prepared, whose shall they be!" prepared, whose shall they be?"
Jeaus reveals the worthlessness of such motives, the uselessness of such anxiety, and its unworthiness in view of what God is in himself, vv. 20, 21. He who can array the lily and clothe the grass of the field. The place to lay up goods is not in barns, Mark 10:21; the right way to be merry is to lighten the burden of another. and the way to satisfy the soul is not to pamper the body. Read John 4:13, 14; John 7:37-39; I. Tim. 5:6; Jas. 5:5; Rev. 18:7.

True Way of Life.

III. The application, vv. 22-34. Jesus then proceeds to set before his disciples the true way of life from the positive side, just as in the illustration he had set before them the negative side. Those who are living in right relationships with God are not to seek satisfaction in the things of time and sense, those things of which their father knows they have need, and which he will supply. Phil. 4:19. They are, however, to seek his kingdom and to rest in confidence in the knowledge that it is his pleasure to give to them that kingdom (v. 32). The way to get is to give Prov. 11:24, 25. This is laying up rrow. 11:24, 25. This is laying up treasure in heaven. Every man is the judge of his own acts. If they be ac-cording to divine standards, his de-cision is wise, if not, the Bible char-acterizes that man as a fool. It is our sense of values which determines our wisdom.

IV. The teaching. Jesus does not begin in his dealings with the sub-lects of his kingdom by making compulsory division of their posse pulsory division of their possessions. In this lesson we can see the false and the true method by which to establish right social conditions. This man's idea was to "divide"; Christ's idea is expressed in the words, "sell and give alms." The passion of this man was to possess, the sion of this man was to possess, the passion of Christ was to give, Matt. 20:28. In the mind of Christ, life does not consist of the things pos-sessed, John 6:27. Things have a value only as life is strong.

RELOCATING THE OLD ROADS

Average Life of Horses and Automo biles May Be Increased and the Cost of Hauling Reduced.

The average life of horses and auto-The average life of horses and automobiles may be increased and the cost of hauling reduced, according to the office of roads, department of agriculture, by relocating many old roads and the more scientific laying out of new ones. The natural tendency in road building is to build a straight road whether it goes over steep grades or hills or not, and pulling over these grades naturally adds to the wear and tear on horses and The section before us has a very logical progression from the introductory request to the words of Jesus which constitute the golden text to the wear and tear on horses and vehicles. The doctrine of the office of roads is that the longest way around parean ministry. This leason occurred in the most seconomical way home, and that freeconomical way home, and that economical way nome, and that fre-quently by building a highway around a hill of grade but little appreciable distance is added and this is more than offset by the reduced strain of banding.

The chief drawback from the farm owner's point of view is that the lay-ing out of road on this principle of avoiding grades necessitates in some cases running the road through good farm land or orchards of pastures instead of going around the farm line and building the road through old worn out fields and over rocky knolls. This of course must raise a question in the mind of the individual landowner as to whether the cutting up of his property by a road yields him inhis property by a roat yields him in dividual advantages and so benefits his community as to offset the use of such land for a road or to overcome the inconvenience of having his land divided. In this connection the office

of roads points out that the running of a road and the resulting traffic through a good farm where there are good cattle, horses, sheep, grain fruit or vegetables has a certain ad vertising value and in many instance makes the land more valuable. other cases the importance of such

Five-Ton Tandem Road Roller in

level road to the community is so great that it will repay those using the road to give the farmer the equivalent in land equally good in place of what he has sacrificed to the com-

At any rate the office of roads is now taking special pains to make clear the economic advantage of avoiding steep grades in their roads. even at some sacrifice of better land investigations shows that the laying of such roads over hills has resulted more from the attention to the preservation of farm lines than from scientific attention to the problem of mony of farmers consulted where a horse might be able to pull 4,000 pounds on a level road it would have difficulty in pulling 3,000 pounds up a steep hill. The size of the load therefore tends to be measured by the grade of the largest hill on the road to market. In a number of cases actual experiment shows that the locating of roads around hills has been accomplished either with no adstances, and with the adding of only a few feet to the highway in others.

The office knows of no case where a properly relocated road which has cut out grades has led to any question as to its material reduction of hauling costs.

Future Good Roads

Good roads in the future should b built on the signag plan for the avoid-ance of hills and steep grades, the federal officer of good roads an-nounced in declaring that the lives of perts contend that the "longest way around often may be the most eco-nomical and shortest way home," and decry the national tendency to build straight roads whenever they

Get Busy With Road Drag.

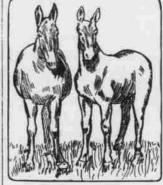

There never was a better time than right now to use the road drag. Try to get the neighbors to join you if you can, but if they will not, a couple of days spent improving the road from your farm to town will pay big when the bad weather comes on. Of course, it goes a bit against the grain to make good roads for pebple who are too lazy to help, but who use them just the same. However, it is better to do that than to suffer the inconvenience and loss of good marketing through

PAYING QUALITIES OF MULE

Three-Year-Old Span Will Be Good for Twenty Years' Service-Always in Demand.

Much has been said and written about the Missouri mules. Envious residents of other states have even intimated that the Missourian and the mule were so closely allied that there is a marked resemblance in looks and disposition, says an editorial in the Missouri Ruralist. This of course is a stander, but we are proud of our long-eared hybrid just the same. It is noth-ing unusual for a good team of mules to sell at \$200 and upward, but when they double up on that figure there is comment, even in Missouri. A span of raw three-year-olds sold at the American Royal for an even thousand dollars. This was a record for Kan-

Hardier Than Horses.

sas City, but had been topped at other places. Before the show was over a world's record had been established A yearling mule sold for \$550, more money than had ever been paid for a mule of that age before.

Probably just as valuable animals are raised.

Good Results Obtained at Missouri and Nebraska Stations—Strength-ening to the Bones.

Good Results Obtained at Missouri and Nobraska Stations—Strengthening to the Bones.

All kinds of bonemeal are used in the manufacture of fertilizers, but not all kinds are suitable for feed for swine. Bonemeal from a glue factory which has gone through the process in which acid was used is not suitable feed. But any bonemeal, especially green bone that is ground finely enough, may be fed. Steamed bone meal is good.

At the Missouri station bonemeal was fed with good results. About an ounce of meal was fed to each hog per day.

This, tehn, is the outcome of the second heroic attempt to overhaul and repair the Republican party "Revise the rules and all will be well"—after more than a year this is all that the best minds in the Republican party cannization.

So long as the Republican party one political party in the South Everybody admits that it is unnatural and hurtful for one great section of a common country to have only one political party. Yet that is the situation in which the American Republic finds itself.

ounce of meal was fed to each hog per day.

At the Nebraska station four lots of pigs were fed to determine the value of wheat short, tankage and steamed ground bone as supplemental to cornemeal. The hogs were pastured on alfalfa, and for this reason the lot fed on corn alone made about as satisfactory gain as any, although the lot which was fed bonemeal in addition to the corn had the strongest bone.

Shorts strengthen the bone some, and tankage with corn produced much stronger bone than corn alone. Where mixed rations were given, or skim-milk or good pasture, all of which supply ash material, it is contained to the very bewhich supply ash material, it is contained to the very bewhich supply ash material, it is contained to the very be-

No other preparation will do the work of Piner in this mixture, attended the concentration of the significant of the

A Party Afraid of Itself.

By Ex-Senator Albert J. Beverage, in Collier's.

How can a party that cannot trust itself expect the people to trust it? How can a party that dares not say what it stands for expect the people to stand for it? Yet just this is the situation of the Republican party today. Just this is the whole result of more than a year of earnest effort and careful thought by Republican leaders to set the Rpublican party right before the country.

Never before in the history of political parties in America did any party ever find itself in such a plight.

An Impossible "Amalgamation"

Myearling mule sold for \$550, more money than had ever been paid for a mule of that age before.

Probably just as valuable animals are raised in other states, but they lack the prestige, and the Missouri farmer gets the cash. Imagine a Kansan, or a man from low or Illinois selling a yearling inule for over half a thousand dollars. The idea is preposterous.

A mule buyer purchased these fancy songsters. He expects to make money on his investment, and it is reasonable to suppose that he knows his business. When you come to think the matter over the price is not exported as a will earn many times over the original sum paid for them.

BONEMEAL GOOD FOR SWINE

Wery well. Let us add them together, then.

It was a wenderfully simple idea. Exactly the same plan was tried by the Whig politicians when that party the dark politicians when that party had broken up. Lincoln denounced it and it fell through. For the same reasons the amalgamator's advice for reviving the Republican party do not believe in the same things, as is proved by their respective national platforms; and also because the voters do not happen to be more shares of stock to be pooled as their owners decide to pool them. After a while this became plain even to the amalgamators failed. They were foredoomed to failure because the impart of the manifer plan was to make hostile principles work together. They were attempting to unite into a single force men who held opposite faiths.

This, tehn, is the outcome of the sec-

Where mixed rations were given, or oppressed the Russian people—all this skim-milk or good pasture, all of skim-milk or good pasture, all of which supply ash material, it is can through the fiber of the very bedoubtful that bonemeal is of much value other than for the purpose of strengthening the bones.
