Dan River Cotton Mills, Danville, Virginia

What a Good Engine Gives You

Plenty of power, smooth running, small repair bills, low operating cost.

RUMELY-OLDS ENGINES

1 1/2 to 65 horsepower

One of the most serviceable and economical farm power-plants made. The patented mixer operates automatically, gives maximum power and does not depend on heat. Will start easily winter or summer. Cylinders emery ground to exact size. Automatic governor—simple, adjusts to any load instantly. Gasoline tank a solid box of cast iron, in the sub-base, clean and safe. Furnished hopper or tank cooled. Removable breaker plates, easily replaced in case of freezing. The Olds is furnished portable, semi-portable or stationary, or combined in handy outfits with such machines as balers, saws and pumps. Rumely service is back of every Rumely machine—49 branches and 11,000 dealers—supplies and repairs on short notice. Ask for Olds catalog No. 344.

Names Historical Liar.
The one hundred and twenty-fifth anniversary of the inauguration of George Washington as first President was celebrated by the Sons of the Revolution at Delmonico's last night. On April 30, 1789, Washington was inaugurated at Wall and Broad streets in the then Federal Hall, now the United States

Sub-Treasury building.
Albert Bushnell Hart, professor of Government at Harvard University, read a paper on "Some American Historical Liars," in which he enumerated and exposed historical fakers of the early years of the Republic. (Including as chief liar Parson Mason Weems, inventor of the cherry tree myth.

Spring Overhaul for Creameries.
As soon as the ground is free from frost, the various tools and other parts adjacent to the machinery should be cleared up and substituted thoroughly cleaned. As the drive is in poor condition, repairs should be made without delay. Ornamental trees and shrubbery, which add so much to the attractiveness of the creamery, should be set out at this time and the flower beds put in order. The machinery should be subjected to a thorough overhauling and if new apparatus is required, it should be ordered and installed before the arrival of the busy season.

A new floor is needed. It should be put in at this time. It is also the proper time for painting the walls and ceiling, if it is necessary, and there are few creameries at this season where such treatment would not be beneficial. More time is now available and can be better spared than at any other season for any necessary repair work. In short, spring is the time to give attention to all matters affecting the efficiency of the plant.

One of the most important things in the management of a creamery is to adjust conditioners and milk mixers that they are at all times in harmony with the requirements of the prevailing season. An incompetent manager makes no chances, as a rule, until compelled to do so by force of circumstances, while an able manager anticipates the seasonal requirements and prepares himself to meet them as soon as they appear.

The spring of the year there are many things which should be given special attention by the butter-maker and the creamery manager. If the spring cleaning has not been done it should be attended to without delay, for the busy season will be here—the season of long days and hard work when there will be no chance to attend to anything but the regular everyday duties. The surroundings of the creamery should be cleared of all rubbish, drives, flower beds, etc., should be put in proper order so that the factory may present a tidy and attractive appearance. In the creamery proper the walls, ceilings and the windows generally need washing and refrigerator requires thorough cleaning. Perhaps the entire building needs painting both inside and out. The doors, windows and receiving room or intake should be properly screened. If the receiving room is left open thousands of flies will enter the building, though the doors and windows are screened; hence, where the building is so arranged that the intake cannot be screened it should be changed without delay. Flies are filthy, unsanitary insects and should never be tolerated in a creamery.

As the weather becomes warmer it will generally be necessary to reduce the ripening temperature of the starter and of the cream, especially during months of May and June.

Who Will Run Reserve Banks?
With the Federal reserve bank districts laid off subject to revision which will probably not be until after the Federal Reserve Board all but appointed, our new currency system is almost under way. The next question arising, apparently, concerns the administrative plan of the various reserve banks. What official will run the bank at Richmond, for example? Will the actual operating board be the Federal reserve agent, who is ex-officio chairman of the board of directors, or will he be the president of the bank, elected by the board of directors? Some contend that a chairman of strong personality could easily make himself the dominant factor. Others believe that the president will be free to conduct the institution without interference from the chairman except for the latter's functions as auditor or comptroller representing the Federal Reserve Board.

Charles A. Conant, the well-known New York banker and economist, who was consulted by the framers of the law, declares that the plain intent is to make the president and not the chairman the active head. It is provided that the Federal reserve board shall have power "to appoint by its board of directors such officers and employees as are not otherwise provided for in this act." On the board of directors six are selected by the bankers and only three by the Federal Reserve Board. There is nothing to indicate that the directors are restricted to choosing one of their own number as president any more than as man whom they elect president will be if matters go right, the active head of the bank. His functions could not be usurped by the chairman or Federal reserve agent without causing preposterous situations. The head of the bank would occupy the position of applying to himself as Federal reserve agent for notes, and offering as head of the bank to turn over collateral acceptable to himself as Federal reserve agent. Moreover, if the law contemplated banking administration by the chairman, why should it require him to maintain "a local office of the Federal Reserve Board on the premises of the Federal Reserve Bank?" He is evidently a Government representative somewhat in the nature of a resident bank examiner, not the working president of the bank. He will no doubt require a separate vault for his use. Mr. Conant concedes that with an aggressive chairman and a weak president the former might indeed become the dominating factor. But he does not believe that this will be the rule in practice any more than it is in contemplation of the law. Still less does he think, with reference to representation on the Federal Advisory Council, that the chairman and not the president will represent the reserve bank; for the Advisory Council is designed to set forth the distinctive banking attitude of the Government and Government officials on it would therefore be out of place.

The lesson of it all seems to be that the bankers in every district should select their strongest available men as directors and that the six out of nine directors so chosen should vote for their strongest available man as president, whether or not he be one of their number. Thereby they can assure themselves that the large measure of control by actual bankers which they desire and which they have been conceded by the law will not be taken out of their hands. And it is particularly important that they all pursue this course from the start, to prevent the contrary practice and precedent from becoming an established thing.—Charlotte Observer.

Whooping Cough.
"About a year ago my three boys had whooping cough and I found Chamberlain's Cough Remedy the only one that would relieve their coughing and whooping spells. I continued this treatment and was surprised to find that it cured the disease in very short time." writes Mrs. Archie Dairyman, Cronksville, Ohio. For sale by all dealers.

Sick Headaches.
Mrs. A. L. Luckie, East Rochester, N. Y., was a victim of sick headache and dizziness, caused by a badly weakened and irritated condition of her stomach, when she began taking Chamberlain's Tablets. She says, "I found them pleasant to take, also mild and effective. In a few weeks' time I was restored to my former good health." For sale by all dealers.

Mexican Troops in the Flesh.
Venturing out from Vera Cruz to a conference between the French consul and General Mas, Richard Harding Davis has seen some of the troops in the Mexican Federal service and described them for The New York Tribune. He notes the surprise which he usually feel upon finding that people look like their photograph. It was as though these men had dressed for the part or made up for the movies. Each wore a felt sombrero trimmed with silver, and a uniform of calico pajamas, while over his shoulder was slung a belt of cartridges, and, for good measure, the saddle blanket was strewn covered with cartridges. Each sat in his saddle with utter indifference, while with gaping interest the trash guard surrounded them. "These, then," muses the writer in historical perspective, "were the men they had come to fight: these cowboy Indians, ferocious-looking, savage, unwashed, unkempt. In comparison, our own infantrymen, clear-eyed, clean-shaven, with white skins showing below the collar line, and with red and sandy hair, looked like young Vikings in khaki. Three hundred years ago Hans and Noreman touched this continent. Slowly he drove him the Anglo-Saxon has driven to the Spanish and today his descendants, came to native Mexico, the Indian still savage and ignorant and as yet un subdued." It is a vivid touch, a convincing picture of contrasts painted from life.—Charlotte Observer.

YOUR MONEY BACK IF YOU WANT IT

Leading Druggist Will Refund Purchase Price of Dodson's Liver Tonic if You're Dissatisfied.

The Ashboro Drug Co. may not be willing to guarantee the safety and reliability of calomel for constipation and sluggish liver, but this store will stand back of Dodson's Liver Tonic with an unconditional guarantee to refund the full purchase price (50c.) instantly without question if you are not satisfied in every way with Liver Tonic and its results.

If you take calomel, perhaps you will seem to get temporary relief, but it often happens that the after-effects are at least unpleasant and sometimes dangerous. Calomel in large doses is a poison and actually deadly to some—perhaps to you—and hence its use means taking chances.

With Dodson's Liver Tonic you are always safe. Its reliability is so certain that it can be sold with the money-back guarantee. It is a vegetable liquid, pleasant to take, and it cannot harm. It clears up the dulled and aching head and cleans out the clogged system in what many have found to be a wonderful way. Dodson's Liver Tonic will do for you what it has done for thousands—and you run no risk in trying it. Ask the Ashboro Drug Co. about Dodson's and the guarantee.

Sweet Clover.
The Kansas Experiment Station in a recent publication makes it plain that sweet clover, a hitherto neglected plant, despised as a pernicious weed, has very considerable agricultural value. It is stated that "a soil improver it is well adapted for pasturing purposes it has considerable value; and as a forage crop it can be utilized to good advantage where alfalfa or red clover can not be successfully grown."

Attention is called to the fact that there are several varieties of sweet clover, of which the common white sweet clover and the large biennial yellow sweet clover are the most important. The white variety is generally to be preferred for farm purposes, although the biennial yellow is sometimes preferred where hay production is desired. Sweet clover is adapted to a wide range of soils, and while it does best on good soil, it will make a satisfactory growth on very poor soil.

Grown on good soil and properly handled it makes a fair quality of hay which may in many cases be substituted with advantage for the more valuable alfalfa and clover hays. In actual nutritive constituent it is practically equal to these. It makes an excellent pasture for cattle, sheep, horses and hogs and for this purpose may be grown profitably on very poor and rough land.

For quick results in improving the soil sweet clover is superior to most other crops. Its ability to thrive well on soils lacking a humus or otherwise badly run down makes it especially adapted for this purpose. Like alfalfa, clover and other legumes it has the ability to obtain nitrogen from the air by means of the nitrogen-fixing bacteria which live in tubercles on the roots of the plants, thus adding much nitrogen to the soil in which it grows. When plowed under for green manure or allowed to remain on the land this crop is a very efficient one in building up the humus content of the soil. The large roots, which penetrate deeply, break up the lower layers of the soil and add much humus thereto when they decay, thus improving the physical condition of the soil to a considerable depth below the depth of plowing. Sandy as well as heavy clay and hardpan soils, which would not otherwise produce satisfactory crops, may be so improved in texture by growing sweet clover in a few years that they become quite productive.

A weed has been defined as a plant which has not yet found its proper use. In view of present knowledge of its possibilities sweet clover can no longer be regarded as a weed.

Wood's Seeds

Soja Beans

THE COMING FORAGE AND SOIL-IMPROVING CROP.

Farmers everywhere are enthusiastic in their praise. Contains more oil, milk and fat-producing qualities than any other forage crop; at the same, are one of the surest-cropping and largest-yielding crops grown.

Wood's 1914 Descriptive Catalog gives full descriptions and information about all the best varieties of

Soja Beans, Cow Peas, Velvet Beans, Sorghums, Ensilage Corn, Millets, and all other Seasonable Seeds.

Write for **Wood's Descriptive Catalog** and prices of any seeds in which you are interested.

World's Largest Freightliner.
What purports to be the largest freight boat in the world is now under construction for the Canadian Steamship Lines at Port Arthur, Ontario. It will handle cargoes of grain from the upper lakes to the lower ports and has a capacity of 20 trainloads of 20 cars each. The actual room for cargo will accommodate 585,000 bushels of oats. The steamer carries a crew of 31 men and has every facility for quick loading and unloading. Cargo space is divided into 15 watertight compartments. Steering appliances are geared in duplicate, and the whole equipment is made to respond to the expeditious service which must be crowded into six months of open navigation. The lake lines are aware of the possible competition for Canadian wheat by way of Pacific ports and the Panama Canal and are preparing to meet it.—Wall Street Journal.

Warms the Cause of Your Child's Pain.
A foul, disagreeable breath, dark circles around the eyes, at times feverish, with great thirst, cheeks flushed and then pale, abdomen swollen with sharp cramping pains are all indications of worms. Don't let your child suffer—Kickapoo Worm Killer will give sure relief—it kills the worms—while its laxative effect acts gently to the health of your child by removing the dangerous and disagreeable effect of worms and parasites from the system. Kickapoo Worm Killer as a health producer should be in every household. Perfectly safe. Buy a box today. Price 25c. All druggists or by mail, Kickapoo Indian Med. Co., Phila. or St. Louis.

PREMIER "Non-Puncture Auto" Tires
Guaranteed 7,500 Miles Service

These tires bear the greatest known mileage guarantee, yet are sold at a price even less than tires of ordinary guarantee. This guarantee covers punctures, blow-outs and general wear. Guarantee covers 7,500 miles service against everything except abuse. These tires are intended for most severe service.

Orders have been received for these tires for us in United States Government Service.

As a SPECIAL INTRODUCTORY offer, we will allow the following prices for the next ten days.

TIRES—TUBES		
Tire	Tube	Tube
28x3	\$ 9.20	\$ 2.00
30x3	10.25	2.30
30x3 1/2	13.50	2.80
32x3 1/2	14.05	3.00
34x3 1/2	15.25	3.20
31x4	17.00	3.25
32x4	18.00	3.30
33x4	19.50	3.40
34x4	20.40	3.60
35x4	21.00	3.80
36x4	22.00	3.90
35x4 1/2	26.00	5.00
36x4 1/2	27.00	5.10
37x4 1/2	27.50	5.15
37x5	32.00	5.40

At other prices. Non-Skids 20 per cent extra. 5 per cent discount if payment in full accompanies order and if two are so ordered, shipping charges will be paid by us. C. O. D. on 15 per cent of amount of order. Our output is limited, so we suggest early ordering. We sell direct only, giving purchaser the advantage of all middlemen's profits.
