<h4>A BOY MURDERER</h4> <p>Boys who ruthlessly destroy bird life and break up happy families like those of red-headed woodpeckers, are murderers. The Journal of Clarinda, Ohio, tells the sad story of how a mother woodpecker met her death—a tragedy which we are sure would not have happened had the boy been a member of the Band of Mercy:</p> <p>A red-headed woodpecker and his mate spent many busy days this spring preparing a home for themselves in an old tree limb on Eighteenth street. Later on, after days of care and watching, the four eggs that were laid in the nest hatched and four baby woodpeckers would stick their bright little heads out of the hole that was the door of their home, whenever the father and mother bird came with bugs and worms. One sad day a boy happened along with a gun and, after he had passed by, the mother woodpecker was found on the ground, dead, with a shot through that pretty red head of hers. Since then it has been pathetic to watch the father bird in his efforts to provide food for the young ones. He works incessantly from sunrise until dusk—Our Dumb Animals.</p>	<h4>ITEMS OF INTEREST</h4> <p>Russia requires all professional photographers to be licensed.</p> <p>Umbrella ribs will last longer if their joints are oiled occasionally.</p> <p>In proportion to its area, Belgium has more railroads than any other country.</p> <p>Malaria causes more sickness and deaths than any other single disease in India.</p> <p>Two thousand feet above the surface of the earth the air is free from germs.</p> <p>A new match box is provided with a shield to protect lighted matches from wind.</p> <p>Italy now has seventeen motion picture manufacturers with five more in prospect.</p> <p>Barbs on the point and shaft of a new nail makes it hold as securely as a screw.</p> <p>After an interval of nineteen years Argentina began taking a complete census in June.</p> <p>London's largest electric sign, recently erected, contains about 1,000 incandescent lamps.</p> <p>A new container for cigarettes is so arranged that only one can be withdrawn at a time.</p> <p>For children a plate has been invented with wire clamps to prevent it slipping on a dinner table.</p>	<h4>THE DOG AND HIS MASTER</h4> <p>By H.
