WINTER COVER CROPS IMPROVE SOIL

The farmers' co-operative demonstration work, conducted jointly by the United States and State departments of agriculture and the A. & M. College, is now planning winter cover crops for this state. Efforts put forth in this matter last season resulted in the adding directly of 42,300 acres of such crops. The management will make an effort to double the acreage this season. Every farmer, merchant, banker and all who are interested in promoting better farming are asked to join in the movement.

The crops advocated for this state are: Rye, for very poor soils, crimson, burr and red clover; vetch, with a support crop, and grasses of various mixture. Last year a hundred acres of grasses, scattered well over the state, produced an average of 5,600 pounds of cured hay per acre, at a net profit of \$31 per acre. This shows that we have splendid conditions for growing all the hay and grazing crops needed in the state and some to sell.

CANCER SHOULD BE TREATED EARLY

According to Curtis E. Yakeman, Executive Secretary, American Society for the Control of Cancer, cancer can be prevented or cured and the needless sacrifice of thousands of lives can be stopped by educating the public as to the facts about this disease. The cause of cancer is not under which it develops, and it is certain that safety lies only in early recognition of the symptoms and prompt operation. Radium is useful in some cases but it is not to be relied upon as a substitute for surgical treatment—the only sure cure known.

The general state of ignorance, delay and neglect in regard to the early signs of cancer is shown by actual statistics which cannot be disputed.

The foremost surgeon of the world recently said in a public address that people on the average wait a whole year after discovering some suspicious symptoms before they go to the operating table. Delay means death, in regard to cancer. Early treatment is the only cure for cancer.

LIFE WHISTLES ON THE WAY

Ready for the joy and strife of calm or stormy day,
And ever keepin' of his life a-whistlin' on the way.

In the valley low,
Or where the summits glow,
Thankful for the joy of it, shine-time or snow.

Where greater grace is comin' for each blessin' that you miss,
What privilege of livin' in a world as sweet as this.

Joy in the lark-winged leam,
Rose-riches where you roam—
What wonder that the heart of you is evermore at home!

—Frank L. Stanton.
