President Names Day For Nation To Pray For End of European War

By the President of the United States of America

A PROCLAMATION

Whereas great nations of the world have taken up arms against one another and war now draws millions of men into battle whom the counsel of statesmen have not been able to save from the terrible sacrifice:

And whereas in this as in all things it is our privilege and duty to seek counsel and succor of Almighty God, humbling our-selves before Him, confessing our weakness and our lack of any wisdom equal to these things;

And whereas it is the especial wish and longing of the peo-ple of the United States, in prayer and counsel and all friendli-

Therefore, I, Woodrow Wilson, President of the United States of America, do designate Sunday, the 4th day of October next, a day of prayer and supplication and do request all God-fearing persons to repair on that day to their places of worship, there to unite their petitions to Almighty God that, overruing the counsel of men, setting straight the things they cannot gov-ern, or alter, taking pity on the nations now in the throes of conflict, in His mercy and goodness showing a way where men can see none, He vouchsafe His children healing peace again and restore once more that concord among men and nations without which there can be neither happiness nor true friendship nor any wholesome fruit of toil or thought in the world; praying also to this end that He forgive us our sins, our ignorance of His holy will, our wilfulness and many errors, and lend us in the paths of obedience to places of vision and to thoughts and counsels that

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this 8th day of September, in the year of our Lord one thousand nine hundred and fourteen. and of the independence of the United States of America the one hundred and thirty-ninth.

Landlords should see that their tenants follow instructions and grow as much as possible of their supplies as suggested above. Next year is the important year for all farmers in the cotton territory to make up their minds to "Live at Home" as nearly as possible. Every dollar saved on advances will be so much gained at the end of the year; every dollar borrowed on advance has to be paid back out of the cotton crop.

Landlords should see that their tenants follow in the farmer shave agreed to produce how supplies and do god farming and bau warners by insisting that the farmer make way for the necessary fod crop and little of that same co-operation will help the whole cotton territor next year. Will our bankers an merchants be co-operators?

The same general principles apple to the tobacco crop. Make your plan how to meet the situation. Diversification and the production of home supplies is the only safe plan to follow. Suggestions and instructions on all successions are successed in the succession of the cotton crop.

WHAT THE DEPARTMENT OF A GRICULTURE THINKS SHOULD GOVERN NEXT YEARS CROP.

In every emergency a plan of action is a great help. The prices of food products are high and there is every indication that they will remain so during the next year. The war in Europe has disturbed production abroad and has interfered with consumption and with markets and financial conditions in this country. This state of affairs, familiar to every one, makes it imperative that every finder of years work accordingly.

The Department suggests to to consider for the next year:

1. A home garden for every family.—The home garden is one of the most important means of cutting down expenses and producing the living of the family on the farm.
