### A WARNING TO MANY

### Some Interesting Facts **About Kidney Trouble**

Few people realize to what extent their health depends upon th condi-tion of the kidneys. The physicians in nearly all cases of serious illness, make a chemical anal-ysis of the patient's urine. He knows that unless the kidneys are doing their work properly, the other organs can-not readily be brought back to health and strength. and strength.

When the kidneys are neglected or When the kidneys are neglected or abused in any way, serious results are sure to follow. According to health statistics, Bright's disease, which is really an advanced form of kidney trouble, caused nearly ten thosand deaths in 1913 in the state of New York alone. Dr. W. S. Rankin Onlines New Meta-ods of Health Work That public health work should be standardized for the greatest efficien-cy of service is the new and progress-ive opinion of Dr. W. S. Rapkin. He believes this principle, that is as old as the knowledge of weights and meas ures, is the fundamental basis upon which rests the success of all future public health work. As similarity of conditions determines more or less the feasibility of such a method, he rec-ommends that the county be taken as a unit and as an initiative point. As the county is the field of elec-tion, the first essential toward stand-ardization, then, is necessarily an ef-ficient health official—a health work specialist—havi g practice and skill. Dr. Rankin in recommending a course of practical training for health of-ficials, gives the tentative plan of the North Carolina State Board of Health to illustrate the principle. To the new health officers a course of practical training consisting of six or seven months will be given. The course is as follows: (a) State Health Administration National Ownership Makes Headway. Three general plans of land reform have been seriously considered, and asch, to a degree, has been adopted. The three plans are nationalization The three plans are nationalization of the land, the small holdings policy, and taxation. Tweaty years ago the great Gladstone said: "If the time comes when the British nation finds that the land should be nationalized, and it is wise to do it, they have a perfect right to do so." Nationaliza-tion, which means the ownership by all the people of all the land, is open-ly taiked. Indeed, it is put into prac-tical effect to a degree in government great Gladstone sold: "If the time corres when the British nation finds is follows:
that the land should be nationalized and it is wise to do it, they have a perfect right to do so." Nationalized in the land, is open or State Health Administration or State Health Laws and Policies, four weeks. During this course the apprentice is assistant to the executive officer of the Board, answers as much of the official mail as he can, it al effect to a degree in government purchase and ownership in the land is referred to and quizzed upon purchase and ownership in the land is referred to and quizzed upon the proper literature.
(b) Vital Statistics, four weeks. Ouring this time the apprentice is feeted without compensation and by the state of ecconomic rent, has many strong advortes. Rent being a value created by the state of ecconomic rent, has many strong advortes. Rent being a value created by the state of ecconomic rent, has many strong advortes. Rent being a value created by the state, but the rent. Compulsory Sale and Leasing.
Another form of land nationalization is considered, though not seriousy. This involves the taking over of all the land by the state, with compensation to the landlord. Small holdings by compulsory purchases and amantionalization and by the state, with compensation to the landlord. Small holdings by compulsory parchases and small holdings by compulsory leasing are of all the interment.
