AT THE GRADED SCHOOL

For the past two weeks different grades of the Asheboro Graded School have taken charge of the morning

exercises.

The first grade started this and the other grades have come in order closing with the Senior Class Tuesday morning, which had a special Christmas program. This class did unusually well and showed very careful training on the part of their very efficient instructor, Prof. C. E. Teague. Rev. J. E. Thompson opened the ex-reises with a prayer.

Banks Richardson, President then gave a brief history of the class from the start in the old school building to the present, the year of graduation. Following this was a concert reci-tation, L. Envoi, by Kipling.

Bennett, Jr., Norwood, and two daughters, Mrs. George W. Stinson of this place and Mrs. C. A. Henderson, of Birmingham, Ala.

CHRISTMAS

As the Greensboro News would say, "J. Pluvius was on the job" in Asheboro Christmas Day and saw to it that plenty of rain was furnished to keep the majority of the people indoors throughout the day. A very cold and disagreeable rain began falling in the morning and continued all day and on into the night, with very few "slack ups", making it one of the most disagreeable Christmases ever experienced in Asheboro. The streets were unusually deserted and dreary-looking, there being few people who dared leave their warm firesides for the outdoor cold. The weather conditions were almost an exact duplication of those of the Christmas of 1913.

The cold and stormy weather was general throughout the South. In Raleigh, Asheville, Greensboro and other places the streets were made so slippery by the sleet that all traffic was practically stopped and it was almost dangerous to go on the streets. In Danville snow fell to a depth of five inches. In Raleigh over two inches of rain fell.

The American note pretesting against the British treatment of American commerce and insisting on American commerce and insisting on early improvement overshandowed a the minds of the British public all was rews when it was published in the papers with larger headlines than any was now within the last month. The note could not be dealt with acfore today, as Siv Edward Grey, Secretary of Foresan Adults, has yes away for the Carstman anoids as Problem Wilson in referring to the note insisting on better treatment for American commerce, declared that large damages would eventually have to be paid by England for unlawful

A VALUABLE SUGGESTION

It is impossible to develop a county without good roads. A failure to recognize this fact means to remain in the background. Let us put good roads all over this county as early as possible—the quicker the better, but in in our hurry we should build no roads not properly located, and above all let them have proper grades suffaced with the right kind of material and with enough of it to make a road bed that will wear for years. We have the material at hand and in sufficient quantities to make the best of roads.

IMPORTANT TALK WITH OUR SUBSCRIBERS

Almost everything used in the mak-

Almost everything used in the making of a newspaper costs more than it did a few years ago.

Machinery, type, ink, paper and wages have all advanced, and the war in Europe has caused a rise in the price of everything the editor eats and wears except cotton goods. Personal and household expenses are more than heretofore.

Look at the other side if you please. Nothing produced in the printing office has advanced in price. The subscription remains a dollar a year. The price of advertising remains the same, a ridiculously low rate considering the large circulation. The price per thousand circulation of The Courier is not half what is charged by the other local papers in our territory, therefore the price of advertising in The Courier is not half what is charged by the other paper when you consider the number of copies printed and circulated. Job printing is at the same old prices.

The Courier is not in business to make money but it would like to me expenses, a thing it has not done in years.

It has come to that it looks like we

it has come to that it looks like wa

would have to advance prices or go out of business. There is one other plan we are goout of business.

There is one other plan we are going to give a trial first, and that is closer attention to getting the money due us. The subscription list shows so many dollars due. The truth is the amount received by The Courier is nearly one thousand dollars less than the amount due The Courier. Most of those who are behind on their subscription will pay up this year or next, but there is a considerable leak owing to the fact that there are a considerable number who ultimately forgot the indebtedness entirely.

So before raising the subscription price we are first going to try to see that every subscriber pays his dollar in advance before the expiration of the year. Why should a subscriber wait a whole year or longer to pay his subscription which was due at the teginning of the year? It is like buying rations by the week and eating them up weekly and waiting for fifty-two weeks and longer to pay for them. The purpose of this article which is written for every subscriber is to say that we shall expect fairly prompt payment from every one. Those who overlook the matter and get behind will be gently reminded of their delinquency. If they still neglect the second reminder will be less gentse.

And we shall confidently expect to collect every dollar due us on subscription.

After it is earned by us, it belongs to us—every cent of it.

Drink lots of water and stop eating ment for a while if your Bladder troubles you.

When you wake up with backache and dult misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys in their effort to filter it from the bleed and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sours, tongue is conted, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four cunces of Jad Salte; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act time. This famous sults is made from the seid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irritates, thus ending bladder weakness.

weakness.

Jad Salts is a life saver for regular ment caters. It is inexpensive, cannot injure and makes a delightful, effer-vescent lithia-water drink.
