To get rid of the flies and stay rid of them, clean up the premises and the flies will have no place to breed.

If you don't know how to rid yourself of the fly get the information from the Health Department at Raleigh, which will furnish the information for you, which if followed, will rid you of the flies in hot weather as well as cold.

Ask every one whom you meet if they read the Health Bulletin, and talk it over with them, and then go and take a look at your back yard, not at your neighbor's or visit your neighbor and take a look at your own yard from her view point.

A recent issue of the Stanley Enterprise has this to say of one of the substantial farmers, of Randolph. "A. H. Crowell, of Farmer, Randolph county, was a recent visitor in town. Mr. Crowell was formerly of this county, and we are glad to see him 'making good' in Randolph."

The honest sons of toil have made Asheboro what it is. Among our citizenship we have had no rich philanthropists to establish public libraries, endow institutions of learning, establish hospitals or other institutions.

Did you ever think, it takes money to run a newspaper just as it does fuel to fire an engine, so it is necessary to make payments. We greatly appreciate the patronage given us and those who wish us success only need to be informed on this matter. It is too expensive to send out a collector, so please call and pay, or mail us your subscription.

The case was tried before Judge Brown of the city court. Miss Riley was in the employ of the Ellis-Stone Company for several years. Her parents, Mr. and Mrs. Bob Riley, once lived in Asheboro, but are now living in Sanford.

Sometimes people get it in their that they have settled. About the that they have a settled. About the only way men of that type have settled for what they have done is to get all they can out of the public. Without our farmer friends grass would grow in every street. So why not begin by establishing hitch racks for horses and providing drinking troughs. The business men can provide and hitch racks, and the town the drinking troughs.

TO OUR SUBSCRIBERS

One subscriber writes he wants his paper discontinued at the expiration of the paid up period, another who does not want to pay until the end of the year, writes that he does not want to pay until the end of the year; in other words he wants to get every one of the fifty-two issues before he pays. This might be well if The Courier and its force could get those who furnish supplies for the paper and our homes, to wait with us for the supplies for each week until fifty-two weeks had expired; and if the office force could be induced to wait for each week's pay until the end of the year, we might be able to wait with our subscribers until the end of the year.

Our labor bill has to be paid, now not at the end of the year. Our paper bills for this week have to be paid now, not at the end of the year, our grocery bills, etc., have to be paid now, not at the end of the year, and we, therefore, call upon all subscribers to pay their subscriptions now, and not at the end of the year. The price is one dollar a year, payable at the time you subscribe, not at the end of the year. This course is necessary for the reason that The Courier is not full enough handed to pay these bills and wait on subscribers to pay later. It costs several thousand dollars to operate The Courier plant a year, and our past experience has proven conclusively that it is necessary to operate The Courier on business principles.

The Courier is attempting to perform a public service, and unfortunately it has not met expenses and it is quite necessary that all subscriptions be paid as promptly as possible. We offer this as the one important reason for calling the matter to your attention at this time, and beg to take occasion to thank you for your support and express a desire for its continuance.

The account of each is small but in the aggregate it amounts to several thousand dollars to us.

Yours truly,
THE COURIER,
Asheboro, N. C.

Men Never Really Experts. In the game of love, all women are born experts, whereas most men remain mere novices all their lives.—From "The Wisdom of the Foolish."

He Believes in Dreams. Never be vindictive, even in your sleep. Mr. Miggs, a well-known citizen of the North End, was chased by a bull in his dreams the other night. Across the pasture dashed Miggs, the bull gaining at every jump. Breathlessly Miggs reached the fence at last, and, safe astride the top, turned and kicked the bull in the nose, breaking one of his toes on the wall beside the bed. He is out on crutches this week.—Newark News.

Inherited Character. It has been explained that character and behavior of all organic matter, plants as well as animals and human beings, is determined by what are known as character units. Thus in taking a hypothetical case of the shrewd, cruel father and the shiftless, kind mother, we have four distinct character units, which through inheritance reappear variously grouped in the offspring.
