Little Miss Emily Blair, of High Point, is visiting her grandparents, Mr. and Mrs. Addison Blair.
A little daughter arrived recently at the home of Mr. and Mrs. B. L. York.

H. M. Cranford and family spent Sunday evening in Trinity.
The Trinity township Sunday school convention will be held at Fairview church Saturday, July 17th. Come.

RESOLUTIONS OF RESPECT

Whereas, our Heavenly Father in his infinite wisdom has seen fit to take unto himself the beloved wife of our pastor, and a dear sister and co-worker of our society, Mrs. G. H. Christenberry, be it resolved:

First, That we, the members of the Ladies' Aid Society of St. Paul's and Naomi Methodist churches, of Randleman, N. C., bow in humble submission to Him who doeth all things well.

Second, That in her death our society has lost one of the truest and most faithful members and our pastor and family a sympathetic and loving companion and mother.

Third, That we earnestly endeavor to emulate her example in reverence for the Father and for the Holy Bible, and also her beautiful Christian graces and virtues.

Fourth, That a copy of these minutes be sent to the Christian Advocate, a copy to our county paper and one to our pastor, also one spread upon the minutes of our society.

MRS. W. A. WOOLEN,
MRS. E. P. HAYES,
MRS. T. O. BOWDEN,
MRS. A. N. BULLA,
MRS. W. T. FERGUSON,
Committee.

Children Cry FOR FLETCHER'S CASTORIA

RESOLUTIONS OF RESPECT

Whereas, God in His infinite wisdom has seen fit to call to reward Sister Mary Alice Turner, a former member of our Society and church and whereas she was an ideal Christian, priceless as a church member indispensable to the community, and ever ready to lend a helping hand in anything that was for the good of humanity, be it resolved:

First, That we, the members of the Ladies' Aid Society of St. Paul's and Naomi Methodist churches, of Randleman, N. C., bow in humble submission to Him who doeth all things well.

Second, That we earnestly endeavor to emulate her sweet and unselfish Christian example.

Third, That we extend to her loved ones our deepest sympathy, praying that God may ever help and bless them.

Fourth, That a copy of these resolutions be sent to the Christian Advocate, one to our county paper, and one spread upon the records of our society.

MRS. W. A. WOOLEN,
MRS. E. P. HAYES,
MRS. T. O. BOWDON,
MRS. A. N. BULLA,

Committee.

AFTER SEVEN YEARS

Asheboro Testimony Remains Unshaken

Time is the best test of truth. Here is an Asheboro story that has stood the test of time. It is a story with a point which will come straight home to many of us.

Mrs. R. E. Woodell, Salisbury St., Asheboro, says: "I suffered a great deal from a lame and aching back. My kidneys were weak and I had dull headaches. Being told that Doan's Kidney Pills were a good kidney medicine, I got some from the Standard Drug Co. Two or three boxes fixed me up in good shape." (Statement given January 2, 1908).

OVER SEVEN YEARS LATER Mrs. Woodell said: "I still hold a high opinion of Doan's Kidney Pills. I have never found anything equal to them for backache and other kidney disorders."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Woodell had. Foster-Milburn Co., Props., Buffalo, N. Y.

EX-PRESIDENT DIAZ IS DEAD

General Porfirio Diaz, former president of Mexico, died in Paris July 2, after an illness of about three weeks. His son said that he was unable to state the nature of the malady, but thought that a complication due to advanced age was the cause. He had been in failing health for about three weeks, and although his death was not unexpected the crisis came suddenly.

Owing to the troubled state in Mexico it has been judged impossible to send the body home with all the ceremony which would have befitted one of the figures of American history. Not one of those whom he raised up as his assistants in governing Mexico and who prospered and grew rich in the shadow of his greatness were with him when he died. Two of his sisters, Senors Ignacio de La Torre and Rincon Gallardo, now in Mexico, could not be informed of their father's death.

Diarrhoea Quickly Cured.

"About two years ago I had a severe attack of diarrhoea which lasted for over a week," writes W. C. Jones, Buford, N. D. "I became so weak that I could not stand upright. A druggist recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. The first dose relieved me and within two days I was as well as ever." Obtainable everywhere.

ALFALFA EQUAL TO OATS OR WHEAT BRAN

Your farm demonstrator will send you a bulletin on alfalfa if you will ask for it.

Alfalfa is well adapted to this section and our farmers should know the value of alfalfa hay. We give it below according to the United States and the State Agricultural Departments. Read and think of this:

Alfalfa hay is, pound for pound, equal to threshed oats.

It is better to grow alfalfa than to buy wheat bran. They are equal in food value, ton for ton.

It requires less work to grow alfalfa than to grow other field crops.

Growing animals and dairy cows need lime, and alfalfa furnishes most lime.

Alfalfa is the most drought-resisting farm crop.

Alfalfa does the most to improve the soil: (a) It roots deepest; (b) It gathers most nitrogen from the air.

According to figures made public at the treasury department, the corporations of North Carolina during the fiscal year just closed paid into the Federal treasury taxes aggregating \$257,905.38. Individuals in the State paid an aggregate of \$125,473,96 into the treasury under the income tax law.

A Doctor's Prescription for Cough—An Effective Cough Treatment

One-fourth to one teaspoonful of Dr. King's New Discovery, taken as needed, will soothe and check Coughs, Colds, and the more dangerous Bronchial and Lung Ailments. You can't afford to take the risk of serious illness, when so cheap and simple a remedy as Dr. King's New Discovery is obtainable. Go to your druggist today, get a bottle of Dr. King's New Discovery, start the treatment at once. You will be gratified for the relief and cure obtained.

ALFALFA AS A REMEDY

Dr. Alexander Blackwood, of Chicago, recommends alfalfa for mental depression and indigestion. At a meeting of the American Institute of Homeopathy recently he told of experiments made with the new remedy at a Chicago hospital.

"During the past year observations were made of the action of alfalfa on 17 persons," he said, "all of them noted that they grew so hungry they could scarcely wait for their meals. Their minds were clear and bright, all bodily functions were stimulated and it was impossible to have the blues."

Alfalfa is converted into a tincture, known as Medicago Sativa, and used internally.

Plant Wood's Seed Potatoes In June and July For Fall Crop.

Potatoes planted now mature in the cool weather of the Fall when they can be harvested to best advantage for use or sale during the winter.

Wood's Seed Potatoes are choice selected seed, put in cold storage early in the season, so as to keep in first-class, vigorous condition for late planting.

Write for "Wood's Crop Special," giving prices and information about Potatoes for late planting, Cow Peas, Soja Beans, Millet, Crimson Clover, etc.

T. W. WOOD & SONS, SEEDSMEN, - Richmond, Va.

WHAT TO DO BEFORE THE SCHOOL OPENS

First of all, the building should be thoroughly cleaned and put in the best condition possible. The floors should be oiled and disinfectants used in every room in the building. Any missing or broken window panes should be replaced, all hinges and locks should be well oiled to prevent any unnecessary noise. Desks and other furniture should be carefully examined for any needed repairs, and should be well dusted; transoms cleaned, etc., etc. Any weeds which may have grown up around the building should be cut, and if not already provided, sanitary privies should be built.

We cannot look too closely after the health of the children in our schools, for from these must come the future citizens of our republic, and no little of their success in after life necessarily depends upon the health of their bodies. I have often thought that some people really gave more thought and attention to the comfort and well-being of their livestock, to their horses, cows, pigs, etc., than to their own children. It is true beyond question that many parents never visit the school room where their boys and girls spend five days in the week, to see whether it is comfortable, sanitary well-equipped or properly lighted, leaving these things to be looked after by other people, if looked after at all, while they, or at least many of them, persist in looking after their livestock themselves.

A water cooler should be provided for each room, and unless fountains are installed, each pupil should be provided with an individual drinking cup. How very often do we see a cold in school which rapidly spreads until practically every pupil in school and the teachers are effected with the disease. This comes largely from the practice so prevalent in many communities of all the children drinking from the same cup or dipper. A pan and at least a couple of towels should be provided for each room, together with a mirror, comb and duster. In buildings supplied with running water some of these things might be eliminated.

Then, when the schools open in the fall the patrons should see to it that fuel is prepared, and that the stoves are all set up and everything in readiness for the convenience and the comfort of both pupil and teachers.—C. C. Wright, in Progressive Farmer.

BACK CREEK ITEMS

(Delayed from last week.)
Mrs. J. H. Pritchard and children, of High Point, are visiting their parents, Mr. and Mrs. E. B. Henley.
Mrs. T. V. Bulla and little son, Zeb, visited her father, Mr. H. T. Vuncannon last week.

Mr. Clyde Routh and family, of High Point, visited his brother, M. M. Routh, last week.

Mr. W. O. Bulla and family spent Sunday in Asheboro visiting.

Miss Mattie Lamb is spending some time with her sister, Mrs. Malcolm Routh.

Mr. D. A. Highfill, pastor of Charlotte church, preached last Sunday morning, and visited in the community the first of the week.

Mr. and Mrs. S. E. Henley spent last Saturday in Asheboro.

STAY-IN-SCHOOL WEEK

In New Orleans a Stay-in-School campaign has been organized to be conducted during a stated week in the school year. Not only are the schools and school officials called upon, but the press, civic associations, board of trade, alumnae associations of the high schools, and all citizens are urged to participate actively in stimulating interest and desire on the part of the boys and girls in school.

Whether or not more children are kept in school because of the campaign it is certain that the citizens of New Orleans know more about their schools and are more vitally interested in them than ever before. Why not do something similar in North Carolina?

WINSTON-SALEM MAN SAVED FROM DEATH

J. E. Erwin Says Wonderful Remedy Brought Him Astonishing Relief
J. E. Erwin, of Winston-Salem, N. C., was for a long time the victim of serious disorders of the stomach. He tried all kinds of treatment and had many doctors.

One day he took a dose of May's Wonderful Remedy and was astonished at the results. The help he sought had come. He wrote: "I am satisfied through personal use of the life-saving powers of your Wonderful Remedy. You have saved my life. I could have lived but a few weeks more had it not been for your remedy. I am enclosing a list of friend sufferers who ought to have some of your remedy."

May's Wonderful Remedy gives permanent results for stomach, liver and intestinal ailments. Eat as much and whatever you like. No more distress after eating, pressure of gas in the stomach and around the heart. Get one bottle of your druggist now and try it on an absolute guarantee—if not satisfactory money will be returned.

HOW TO MAKE AND KEEP THE ROAD DRY

Water, plus clay or ordinary dirt, when mixed invariably forms mud. On ordinary earth roads the rains and melting snow furnish the water and the passing traffic the mixing. The result is muddy roads. Take the water away or prevent it from mixing with the clay or earth and but little or no mud results. In other words, keep your road dry if you wish it to remain hard, smooth and free from mud.

Except in very sandy or arid regions good drainage is the cardinal principle in the maintenance of gravel or earth roads. Get the water away from the roads as quickly and as completely as possible. Water naturally seeks the lowest level and you cannot keep the water from falling on the road but you can assist its natural inclinations to get away. Keep the ruts filled and the crown with a slope towards the side ditches of from three fourths to one inch to the foot. The water will not collect to soak in and be mixed to mud by the passing traffic. Keep the side ditches clean and with frequent outlets to get the water away from the road completely. Do not let the culverts clog up or the material accumulate in the ditches and hold back pools of water to soak in and soften the foundations of your road. Water is an enemy that will run away if you will give it a chance. Do not neglect to give it every chance. It will pay and pay well.

Like most other enemies, water is not very dangerous or destructive until it collects in force. Therefore, get the water away from your road at every available opportunity and before it has sufficient time to collect in volume to be dangerous to the road and do not invite certain disaster by making your culvert too small to care for the largest possible storm. Furthermore build the culverts so that the water will of necessity flow through them and not find a way around them or under them. Properly designed substantial wing and end walls are the fortifications which protect the culvert from attack and destruction during severe storms. Do not build dry weather culverts; build them with a view to taking care of and protecting the road during the worst possible storms.

Make your road dry; build it hard and compact with a crown sufficient to shed water rapidly to the side ditches and with ample culverts and drains. To keep your road dry maintain the drainage in good condition. Drag your roads after each rain; dragging fills in the ruts, smooths the surface and maintains the crown. On a road which has been dragged the rain finds no place to collect and soak into and soften the surface. Unless the rain is of long duration the surface is softened but very little. As soon as the rain has ceased and the road has dried so the clay surface is not sticky but while it is still plastic, drag the road over. Any depression or ruts which have formed during or after the rain are thus filled and the surface smoothed up and plastered over with a thin coat of clay or earth that packs and becomes very hard under passing traffic. Therefore, in order to make and keep your road dry, first provide for good drainage and then maintain the good drainage by systematic dragging after each rain. Diligent attention to these points will in general insure an earth road fairly passable at all times and very good most of the time.

WHAT BILL DID

Taylor County (Ky.) Enquirer.
Bill Turner was a farmer, he labored all his life. He didn't have no schoolin' and neither did his wife. But Bill was built for business and made the wheels go round, and left a healthy fortune when they put him under ground. He was always taking chances, paid a hundred dollars for a bull. His neighbors called him crazy, but he left a stable full of cows that broke the record, making butter by the ton, an' Bill had his picture printed in the Squeedunk Weekly Sun. He had new-fangled notions of making farming pay. He even bought a fool machine to help him load his hay. The neighbors fairly snorted when they saw the bloomin' thing; said Bill would never make it work, it wasn't worth a ding! Bill didn't say a single word, an' didn't care a darn 'bout what they said, fer slick as grease, his hay went in the barn an' hour before a thunder storm came sailin' out that way and caught his neighbors in a pinch and spoiled their new mown hay. Bill's neighbors put their milk in cans, and set 'em in a tank. Bill skimmed his milk with a machine and turned it with a crank. Smith chops his firewood with an axe. Bill used some gasoline and saws a hundred cords a day with another blade machine. Today Bill's wife rides in a car and dresses up in silk. Smith's wife rides a wagon and keeps on skimming milk.
