

WEST CONCORD NEWS.

Mr. and Mrs. Thomas Hall visited Mr. W. H. McLeod last Saturday. Mr. McLeod is very feeble we are sorry to note.

Mr. and Mrs. Carl Bescher visited Mr. and Mrs. S. L. Vasser last Sunday.

We understand that Davidson county will, in the near future, build a good road from Denton to county line on Farmer road. We hope it will soon be completed then from county line to connect with good road at Farmer.

We hear that Paul and Robert Kearns, of Norman, Richmond county, have sold out and will locate in Denton, N. C.

Mr. Arthur Mackey has been making his saw mill hum for the last few days.

Mrs. Martha Sexton, of Denton, visited her old home a few days ago.

Mrs. A. V. Varner, of Fullers, N. C., spent a few days last week in Denton, the great of her brother, Mr. G. W. Williams, of that place.

M. W. M. Lofin has sold out and gone to West Virginia.

Mr. Fred Loftin, one of the teachers elect at Bombay, died last Tuesday. The bereaved ones have our sympathy.

We certainly recommend the Moonlight School and think it a very generous offer made by the newspapers. Let the good work go on.

Success to the Courier and its many readers.

UGH! CALOMEL MAKES YOU DEATHLY SICK

Stop Using Dangerous Drug Before It Salivates You! It's Horrible.

You're bilious, sluggish, constipated and believe you need vile, dangerous calomel to start your liver and clean your bowels.

Here's my guarantee! Ask your druggist for a 50-cent bottle of Dodson's Liver-Tone and take a spoonful tonight. If it doesn't start your liver and straighten you right up better than calomel and without griping or making you sick I want you to go back to the store and get your money.

Take calomel today and tomorrow you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Dodson's Liver-Tone tonight and wake up feeling great. It's perfectly harmless, so give it to your children any time. It can't salivate, so let them eat anything afterwards.

WAGING A LOSING BATTLE.

Six counties of the State during the last census lost a part of their hope in the war against white slavery.

In spite of the activity of teachers, school officers, and tax payers, there were 1705 more white illiterates in these counties in 1910 than in 1900, as follows:

Calhoun in 1900, white illiterates 2275 in 1910, 4911.

Camden in 1900, white illiterates 14,219 in 1910, 15,219.

Chatham in 1900, white illiterates 12,100 in 1910, 13,100.

Effingham in 1900, white illiterates 10,100 in 1910, 11,100.

Georgetown in 1900, white illiterates 8,100 in 1910, 9,100.

Johnston in 1900, white illiterates 6,100 in 1910, 7,100.

Waynes in 1900, white illiterates 4,100 in 1910, 5,100.

But these six counties are instead of making ground in the war upon white illiteracy, and a knowledge of the fact may serve to stir the people of these splendid counties to greater efforts than ever before.

During the last five years of the last census period, the total school fund of these six counties was nearly doubled. In 1913-14, the total school fund was \$587,411, or more than double the total in 1904-5.

MORE CRIMSON CLOVER.

The crimson clover seed imported into the United States in 1910, mainly from France and Austria, amounted to one and a half million pounds. This year the amount imported was twelve million pounds.

The cost of crimson clover seed is high. From thirty to seventy per cent of it will not germinate. Good seed, by the way, are a bright greenish yellow; poor seed are brownish in color.

The price, and the difficulty of securing good seed and good stands, keep our farmers from growing this valuable forage crop more extensively.

Clover hedges are too expensive for the individual farmer to own individually.

Here is a chance of bunch up, buy and use a machine co-operatively; secure abundant home-grown seed cheaply; and increase our clover acreage at a rapid rate.

MOTHER! GIVE CHILD "SYRUP OF FIGS" IF TONGUE IS COATED

If cough, feverish, sick, bilious, clean little liver and bowels.

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely.

A child simply will not stop playing to empty the bowels, and the result is they become tightly clogged with waste, liver gets sluggish, stomach sour, then your little one becomes cross, half-sick, feverish, don't eat, sleep or act naturally, breath is bad, system full of cold, has sore throat, stomach-ache or diarrhoea. Listen, Mother!

See if tongue is coated, then give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well, playing child.

Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Beware of counterfeits sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.

A SKETCH OF THE LIFE OF THOS. L. RUSSELL.

Seventy-four years, one month and sixteen days covers the human life of whom we write today.

Thomas L. Russell was born in New Hope Township Aug. 6, 1841, and died in Denton Sept. 19, 1915. Mr. Russell was married to Amanda J. Wood, daughter of the late Spencer Wood, of Davidson county, in 1878.

From that union were born six children, one of whom died in infancy; the other four are living. Cora Russell married a Mr. Kinney, and lives in Davidson county. Tyson C. Russell, Thomas N. Russell, W. W. Russell and Joseph L. Russell are the other children. The three last named live in Davidson county, and Tyson is living in Concord Township in Randolph county.

Mr. Russell was educated at New Hope Academy, under the tuition of the late L. D. Andrews, who was a noble specimen of humanity, and one of the ablest teachers of his day, and it can be safely said of him that his equal is seldom found. Before completing his education Mr. Russell volunteered under South King, and was put in Company N., 24th Reg. N. C. Troops, and was one of the brave boys who were active in the war against white slavery.

PASTURES NEEDED FOR PROFITABLE STOCK

Fine Type for Plowing.

(Prepared by the United States Department of Agriculture.)

The southern farmer who appreciates the advantages of raising himself much of what his family needs, is certain to be confronted at the outset by the problem of pastures. It is almost impossible to realize a profit upon any kind of stock without good pastures and even if the stock is raised primarily for home consumption rather than for market, the first thing to be done is to establish one.

Hitherto the South has been sadly deficient in this respect because all the attention has been given almost entirely to cotton. The southern farmer, however, can, if he will, have as good a pasture as was ever seen in Kentucky or Missouri; and have it available more months in the year than is possible in those states. For a permanent pasture a combination of bur clover and lespedeza and Bermuda grass will afford good grazing for at least ten months out of the twelve, for the Bermuda and lespedeza can be grazed throughout the summer and the bur clover from January until the Bermuda comes on again. On light, sandy soils near the gulf coast carpet grass may do better than Bermuda. In any case, however, every permanent pasture should have a good proportion of some legume—either one of those already named or melilotus, vetch, white clover or alsike clover.

No matter what combination is selected it takes time and work to provide the farmer to study this question thoroughly.

With a little forethought it should be possible for the farmer in the central and southern parts of the South to have fresh pastures for cattle and hogs throughout the entire year. From the following list a selection should be possible which will meet conditions on almost any farm.

January and February—Wheat, oats and vetch, artichokes, rape, bur clover, velvet beans.

March—Oats and vetch, artichokes, rape, bur clover, crimson clover.

April—Oats and vetch, rape, bur clover, alfalfa, crimson clover.

May—Oats and vetch, rape, red clover, alfalfa, crimson clover.

June and July—Sorghum, cowpeas, red clover, alfalfa.

August—Sorghum, cowpeas, soy beans, alfalfa.

September and October—Sorghum, cowpeas, soy beans, chufas, sweet potatoes, corn, peanuts.

November—Cowpeas, soy beans, chufas, sweet potatoes, corn, rape, peanuts.

December—Cowpeas, chufas, sweet potatoes, corn, rape, velvet beans.

Through the use of such pasture crops as these pork can be made more cheaply in the South than in the corn belt. It costs, it has been calculated, from one-third to one-half less to raise hogs when pastures are used than with concentrated feeds alone. Moreover the hogs harvest the crops without danger of loss from rain and without expense, and finally both the soil and the hogs gain. The soil is enriched by the legumes and the health of the hogs improved.

WHEAT BRAN IS EXPENSIVE

Southern Farmers Can Increase Profits by Growing Every Possible Pound of Feed for Stock.

There is no doubt that wheat bran is one of the best feeds that can be used to produce a large flow of milk, yet it is about the most expensive feed the dairyman can use. One pound of wheat bran has a feeding value equal to one and one-half of wheat bran, but of course it will not do to replace the wheat with bran.

Cowpeas hay has value almost equal to that of bran, the cost ratio being 1,800 pounds of bran to 2,000 pounds of hay.

Many farmers believe that alfalfa is fully equal to that of bran, pound for pound, and if the bran was to be bought in the open market the value of alfalfa is certainly greater, because the growth of alfalfa or any other good crop always improves the land, while feed brought in from the outside only adds its manurial value to the soil.

Farmers in the South can hardly afford to buy bran; being so far from the big markets the price is generally high—from twenty-five to thirty dollars per ton. In any other country where the soil is poor and commercial feed high, effort should be made to grow every pound of feed possible upon the land itself.

Southern farmers are beginning to appreciate the value of this practice, and more stock feed is being grown in that country than ever before.

While it is a gratifying fact, also, that more livestock is being raised in the South, there is no doubt that the amount of stock food per head grown on southern farms is steadily increasing.

Cottonseed meal is a favorite feed for the cows in the South and a good many farmers feed too much of it. If they would grow more cowpeas, hairy vetch, clover and alfalfa, and buy less prepared feeds, their profits would be larger and their soil greatly improved.

COTTONSEED MEAL FOR COWS

It is Very Rich in Protein and Animals Easily Get Too Much of It—Makes Butter White.

Dairymen in some localities have made much use of cottonseed meal, and have found it good feed. It should be used with care and not too much fed at a time, for it is very rich in protein and cows easily get too much of it. It is also thought that it has a bad effect on color in butter, making it much whiter than where corn is fed. But the buying of cottonseed by our dairymen is at an end for now all have from fifteen to thirty acres of alfalfa, most of which has been sown within the last two years.

LAND SALE
