

**AVAILABLE PUBLICATIONS.**

The following bulletins may be obtained free of charge by writing the director of the North Carolina Experiment Station, Raleigh, N. C.:

228—Air-Cooled Apple Storage Houses.

229—Fertilizer Experiments With Corn on Piedmont, Cecil Sandy Loam Soil and Varieties, Culture and Fertilization of Corn on Piedmont, Cecil Sandy Loam and Red Clay Soils.

230—Variety Tests of Corn for 1914.

232—Results of Variety Tests of Wheat, Oats and Rye.

233—Common Diseases of Poultry.

The following circulars are also available:

24—Soy Bean Pastures for Hogs.

25—Feeding the Sow and Suckling Pig.

26—Pig Club Manual.

27—The Limitations of Cotton Seed Meal Feeding to Poultry.

28—Use of Lime on the Farm.

29—Feeding Skim Milk, Buttermilk and Whey to Hogs.

40—Oats for North Carolina.

31—Soy Bean Growing in North Carolina.

32—Increasing Our Crop Yields by Seed Selection On the Farm.

**DENTON ITEMS.**

Mr. and Mrs. Jonathan Tucker, of Riley's Store, visited in Denton Sunday.

Sheriff C. C. Shaw and family, of Lexington, stopped here awhile Sunday on their way from visiting relatives at New Hope Academy.

A force of hands are at work this week graveling the road from Denton to the Randolph line at Slocum Church. The road commission recently appropriated \$600 to do this work.

Mr. and Mrs. Baxter Riley, of High Point, spent the week-end here with her parents, Mr. and Mrs. M. C. Cranford.

Mr. G. T. Co. Evans, of Thomasville was a business visitor here Monday.

Mrs. J. W. Hanner, of High Point, spent Sunday in Denton.

Mrs. J. W. Cashatt is visiting relatives in Randolph county this week.

The two-year-old son of Mr. and Mrs. Pink Grubb, of Denton, R. 1, died Monday the 18th, of whooping cough.

Miss Bettie Harris returned Sunday from High Point where she had been visiting for the past week.

Mr. and Mrs. Irving Bryant are visiting in Thomasville this week.

**THE LOCAL NEWSPAPER**

This is the way it looks to a writer who has traveled some, and watched for reasons why a town prospers. He says this about the town newspaper, which you should reprint for the benefit of your readers:

"Stand by your town newspaper. If there is anything in your town worth talking about, ten chances to one your little town paper had a hand in putting it there, and if there exists any unsightly or unsavory nuisance, twenty chances to one it will stay there until your town editor sees it or smells it and wipes his pen on the town board's breeches. If anybody beyond the walls of your little burg ever learns that there is such a place as Peaceville, it will be through the town oracle.

"Every village gets its money's worth in the village newspaper. It's the wagon that carries all your good things to market. It ought to be kept in good repair. In many cases it would pay to grease it, paint it, keep its running gear in shape and shelter it at the public expense.

"Stand by your local newspaper. It's the guardian and defender of every interest, the forerunner and pioneer of every advance movement and the sturdy advocate of law and order. Take it away, and it would not be six months before the town would look as if it had been doped. Business would drag, society would yawn and grass would grow between the cobles."

**A LONG WAY TO GO IN THRIFT.**

Eleven million one hundred thousand thrifty people had nearly five billion dollars in the 2,100 banks of the United States on June 30, 1914. That is to say, one person in every nine had something laid away against a rainy day. The average savings deposit was \$444.96.

In North Carolina 86,199 people, or only person in forty, had money on savings account in our 28 Savings Banks, the average account being \$183.96 and the total \$10,338,466.

The increase over 1913 in the number of savings banks in North Carolina was 2; in the number of depositors, 12,138; and in the number on deposit, \$2,775,000.

In the number of savings banks, North Carolina ranked 12th, in average account.

Caleb A. Robinson has been elected chief of police for Concord.

**GIRLS! DRAW A MOIST CLOTH THROUGH HAIR, DOUBLE ITS BEAUTY**

Try this! Hair gets thick, glossy, wavy and beautiful at once.

Immediate?—Yes! Certain?—That's the joy of it. Your hair becomes light, wavy, fluffy, abundant and appears as soft, lustrous and beautiful as a young girl's after a Danderine hair cleanse. Just try this—moisten a cloth with a little Danderine and carefully draw it through your hair, taking one small strand at a time. This will cleanse the hair of dust, dirt or excessive oil, and in just a few moments you have doubled the beauty of your hair. A delightful surprise awaits those whose hair has been neglected or is scraggy, faded, dry, brittle or thin. Besides beautifying the hair, Danderine dissolves every particle of dandruff; cleanses, purifies and invigorates the scalp, forever stopping itching and falling hair, but what will please you most will be after a few week's use, when you see new hair—fine and downy at first—yes—but really new hair growing all over the scalp. If you care for wavy soft hair, and let's of it, surely get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter and just try it.

**VACCINE FOR HAY FEVER.**

The up-to-date plan of escaping hay fever is through vaccination. The pollen of the flower that makes a person with hay fever sneeze is used. It has been tested and found that a person who is susceptible to golden rod, if vaccinated with the pollen, can gather the flower without the slightest inconvenience, and so with "ragweed" and other flowers causing hay fever. Hay fever is a baffling malady to doctors, and it is hoped that the vaccine will prove entirely successful.

**TELL THE SALESMAN**

With the approach of the fall season, the big jobbers and manufacturers will begin to send out their salesmen. Many of these salesmen are going to call on you, Mr. Retailer. Here are a few suggestions by which you might open the conversation with them:

Ask them what they will do to help you sell the goods they want you to buy.

Ask them if their firm is going to advertise their goods in the newspapers of your city. If they reply No, ask them why not?

Tell them that it is necessary for them to create the demand in your city, among your customers, for their line of goods; otherwise you cannot push their line in preference to those manufacturers or jobbers who do create this demand.

Tell them the best way to create the demand is to advertise in the local newspapers; that your customers read the newspapers published here; that you yourself advertise in them; and that you are not willing to spend your money to make their particular brands popular in this town and later have them take the line away from you and give it to your competitor.

Tell them that you favor goods that are advertised in the local newspapers because you find it more profitable to do so.

This is a mighty good hand to hold. It should be a stand-pat one.

**MISTAKEN IDEAS.**

No public school system can succeed or ever has succeeded that depends solely upon state appropriations for its maintenance. Our legislators might as well understand this now and for all time.

The only successful public education that we can acquire comes and must always come through local option.

Our people might as well learn this now before they waste more time trying to build up an educational system at the expense of the state at large. Also, there can be no marked decrease in our illiteracy until we get the children in school. So long as there is a large percentage of our boys and girls straggling about the State without ever entering the class room so long will our illiteracy remain as it is.—The Educational Monthly, Georgia.

"I have used Chamberlain's Tablets and found them to be just as represented, a quick relief from headaches, dizzy spells and other symptoms denoting a torpid liver and a disordered condition of the digestive organs. They are worth their weight in gold," writes Miss Clara A. Driggs, Elba, N. Y. For sale by all dealers.

**RUB-MY-TISM**

Will cure your Rheumatism, Neuralgia, Headaches, Cramps, Colic, Sprains, Bruises, Cuts and Burns, Old Sores, Stings of Insects Etc. Antiseptic Anodyne, used internally and externally. Price 25c.

You will find the shirt you want at Wood Cash Clothing Store.

**HOW TO COOK A HAM.**

The Treatment Begins Long Before the Fire Is Built.

To the Editor of the New York Sun: Some days ago you published an interesting article from a \$10,000 chef as to how to cook a ham. It was rather astonishing to read of the various methods employed by foreign chefs to roast or broil or hush the flesh of king porker.

If I were to give any suggestion in this matter which may be beyond my knowledge as compared to that of a \$10,000 specialist, I would say "first catch your hog."

That is, after he had been treated from the time of a suckling up to the time he was ready for the sacrifice; and in regard to the treating, I quote from the experience of "Old Black Joe," a Long Island colored man of all work and especially of plain toothsome cooking, who has been over forty years in my family.

First, be very careful, very careful, of the kind of piglet you pick out, not too old, but with a straight back and snout and a curled tail; if he has any black spots on him that makes no difference. Feed him well, but not too well, so that he will not rot for his living, the usual way a pig is fed, not too many slops, but plenty of vegetables, and about one or two months before the sacrifice corn and plenty of milk.

Don't allow the hog to get too large, for then, as in the case of an old chicken, the flesh would be coarse and gristly, but a fair size in regard to weight; keep him and the pen as clean as possible.

When M. or Mlle. Hog is sacrificed and cooked by a native chef, either roast or broiled, when the slices are cut from it for eating or broiling, there will be found the greatest difference in the flesh of common picked out and common fed hogs. Champagne sauce, properly applied, would make a dish of ham a dish for the gods.

No foreign treatment could improve on the native treatment for American palates.

EDWIN BARRY WILCOX.

**RANDEMAN R. 3 ITEMS.**

Mr. Vedeton, who has been farming on Mr. John York's farm, moved to Greensboro last Friday, and Mr. John York has gone to Randelman where he will conduct a meat market.

Miss Clara Prichard, of Asheboro, spent last Sunday evening at Mr. Rom Buha's.

Mrs. Anne Millikan is spending some time with her daughter, Mrs. Bud Pentress, at Wortville.

Cottage prayer meetings in this neighborhood are progressing nicely.

Several of the friends and relatives of Mr. Ben Millikan, of this community, attended his funeral at Marlboro last Saturday.

**How To Get Rid of a Bad Cough**

A Home-Made Remedy that Will Do It Quickly, Cheap and Easily Made

If you have a bad cough or chest cold which refuses to yield to ordinary remedies, get from any druggist 2 1/2 ounces of Pinex (50 cents worth), pour into a pint bottle and fill the bottle with plain granulated sugar syrup. Start taking a teaspoonful every hour or two. In 24 hours your cough will be conquered or very nearly so. Even whooping cough is greatly relieved in this way.

The above mixture makes a full pint—a family supply—of the finest cough syrup that money could buy—at a cost of only 54 cents. Easily prepared in 5 minutes. Fill directions with Pinex.

This Pinex and Sugar Syrup preparation takes right hold of a cough and gives almost immediate relief. It loosens the dry, hoarse or tight cough in a way that is really remarkable. Also quickly heals the inflamed membranes which accompany a painful cough, and stops the formation of plugs in the throat and bronchial tubes, thus ending the persistent loose cough. Excellent for bronchitis, spasmodic croup and winter coughs. Keeps perfectly and tastes good—children like it.

Pinex is a special and highly concentrated compound of genuine Norway pine extract, rich in guaiaic, which is so healing to the membranes.

To avoid disappointment, ask your druggist for "2 1/2 ounces of Pinex,"—do not accept anything else. A guarantee of absolute satisfaction, or money promptly refunded goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

**BEST DATE TO SOW WHEAT.**

As an average of two years results in sowing wheat at different dates at the Iredell Test Farm near Statesville it has been found that seedlings made during the latter part of October yielded 52 percent greater yield of grain than did seedlings made during the first of December when other conditions were made the same as nearly as possible. This percentage in yield was equivalent to an average increase of the two years tests of 8.7 per bushels per acre. These results certainly emphasize the importance of sowing wheat in the Piedmont section during the latter part of October or as soon as possible after a light frost has occurred.

**A Touch of a Match Brings a Touch of Spring**

Touch a match. In five minutes the Perfection Smokeless Oil Heater is spreading comfort and warmth.

chill-free and cosy. Pick it up—and take it wherever you want extra heat. Light and easily carried. Smokeless and odorless. Ten hours glowing warmth on a gallon of kerosene oil.

The Perfection keeps any room

Sold in many styles and sizes at all hardware and general stores. Highest Award at Panama-Pacific Exposition. Look for the Triangle Trademark. Use Aladdin Security Oil or Diamond White Oil to secure best results in Oil Stoves, Lamps and Heaters.

HANDLON SUPPLY CO., Asheboro, N. C. THORNTON & CO., SEASBROVE, N. C. SHAW, New Hope Academy. J. M. RUSSELL & CO., Sophia. J. D. BRAME, Trinity. ELLIS & JORDAN, E. A. BEAN, C. P. FOX & CO.

**NO HURRY ABOUT THE TARIFF**

Like all other instructors in the protectionist school, our neighbor the Sun believes that there is only one way to revise the tariff, which is upward, and only one acceptable time, which is now. No matter if all industrial Europe is at war and is doomed to remain so, perhaps, for two years more, there will be peace eventually, and then "our manufacturers, merchants and workers will be at the mercy of the most skillful and desperate competitors the world has ever known."

Probably no well-informed person will deny that after the close of the war there will arise economic conditions in Europe that may demand important changes in our tariff. Good reasons may appear for increasing some of the schedules, but it is quite as likely that common sense will dictate decreases in others. With due respects to the protectionist school, it must be said that the American tariff is going to be adjusted to revenue as well as protection for many a day.

Existing customs duties have failed as revenue-producers because the war has reduced imports. The war, therefore, has given most of our manufacturers and merchants the advantage that they would hope for under a prohibitive tariff. To increase rates up on a traffic that does not exist would be useless, and experimentation in other directions, except for the one object of revenue, would only invite jobbery and disaster.

It is not in the mind of any disinterested man to say precisely what kind of tariff we shall need when Europe relinquishes the sword. But the very worst of all tariffs in that emergency would be one under which a few favored interests could perpetuate in time of peace the obstructions from which we have suffered in time of war.—New York World.

**BANK OF RAMSEUR**

**THE IMPORTANCE OF DOMESTIC SCIENCE IN SCHOOLS.**

Domestic science should be taught in the schools as an important subject, for such it is. In college it is taught to prepare teachers, but only a minority of women go to college, therefore it is to be ranked with or above arithmetic and other equally important subjects. Private classes are very good for those who attend, the ones who need training of this kind most do not go to the private classes.

Our men are trained for their business, should not our girls be as well? The public school is the place for this training—so let us push it.

**Every Home Needs a Faithful Cough and Cold Remedy.**

When seasons change and colds appear—when you first detect a cold after sitting next to one who has sneezed, then it is that a tried and tested remedy should be faithfully used. "I never wrote a testimonial before, but I know positively that for myself and family, Dr. King's New Discovery is the best cough remedy we ever used and we have tried them all." 50c. and \$1.00.

**FELLOWSHIP, FUN, AND PROFIT.**

Friday, October 29th, is the annual Rally Day in Chapel Hill—a day set apart for comradeship with our neighbors in Orange, Chatham, and Durham counties, under the auspices of the Chapel Hill Board of Trade, the Community Club Women, and the University.

It is the occasion conceived by Dean Noble and kept alive by him for the last three or four years.

The events will be: singing contests by the country Sunday schools; a musical entertainment by the University students; potato races, three-legged races, and other athletic events; a domestic science exhibit; a barrier babies contest; brief addresses, and an old-fashioned picnic dinner on the campus.

The general committee arranging the event is Mayor W. S. Roberson, Messrs. Lucio Lloyd, M. C. Blackwood, R. L. Stroud, Paul C. Lloyd, A. E. Cole, W. B. Thompson, and Professor M. C. S. Noble.

James L. Harbin, aged 17 years, died at his home in Statesville Friday from the effects of a pistol shot wound which occurred May 22.
