

HANDY METHOD OF RAISING WAGON BODY

Easy Way of Loading and Unloading Wagon Body.

(By J. B. MILLER, Lexington, Ky.)

The windlass illustrated is secured on the side of shed where wagon is stood and may be all made of wood. The rope from the windlass runs to a pulley attached to the rafters and has a ring at the lower end to which four chains are attached. Hooks on these

chains are caught in staples on the wagon body or hay frame. One man can lift it off. After it is drawn up high enough a pin is stuck in behind the crank on the windlass and two supports are placed under the wagon body or frame and it is allowed to rest on these.

TO INVESTIGATE DEATHS FROM TYPHOID FEVER

Deaths From Typhoid Fever No Longer Pathologically Warranted

Not until recently, says the State Board of Health, has typhoid fever as a cause of death been at all questioned, whereas many other causes of death have been given searching investigations. But now when a death from typhoid fever occurs, some one is said to be to blame. A noted English sanitarian has said that every time one dies from typhoid fever, some one should be hanged. Aside from these views and in the light of modern medical science, typhoid deaths are now admitted the result of sanitary blunders or criminal carelessness, and instead of a death from typhoid passing as providential, unavoidable, or for some mysterious reason, its source will be sought out and the responsibility placed where it rightly belongs.

The cause of typhoid fever bears the stigma of disgrace for two reasons. First, because we know more about its prevention and its filthy

source than most any other disease, and second, because its presence betrays filth either as to our food and drink or as to our personal habits. Ignorance is no longer a cloak under which to hide the disgrace of typhoid fever. We know all about it—how it is contracted, how it may be prevented and how immunity against it may be had for several years at a time.

Health Work at Fairs

"Health education seems to be about the biggest thing in North Carolina just now," said Mr. Gordon L. Berry, of New York City, recently.

"It is surprising," said he, "to see with what keen interest this kind of work is being received."

The people are bound to see by these exhibits object lessons how far they are missing the work and what really is necessary to living a healthful life.

HIGHEST CASH PRICES PAID FOR

FOR years, the most successful Trappers and Collectors of Raw Furs in your vicinity have been shipping their entire collections to us. You too, can secure the highest market prices for your skins by sending them here—as New York is now the World's Greatest Raw Fur Market. Write today for our Free price list and shipping tags. We charge no commission.

DAVID BLUSTEIN & BRO. Ginseng and Golden Seal. We are the largest dealers in Ginseng in the United States and always pay highest prices. Write for price list. Finest Ginseng Raw Fur House in New York. 183 West 27th Street, New York.

TWICE IT HAPPENED

A grocer kept no Bank Account. He paid his bills in cash. Twice in one year he was obliged to pay the same bill twice. He had lost the receipts. He had no other record to show. Thereupon he opened a Bank Account and paid all his bills by check. Since then he has never been obliged to pay a bill twice because his checks are receipts and the Bank has a record of all payments made.

Pay by check and you pay a bill once. Pay by cash and you may have to pay it twice.

BANK OF RAMSEUR

RAMSEUR, N. C.

CLEANLINESS

According to the old proverb, is next to Godliness. Cleanliness does not mean merely a clean face and hands. It includes neatness of dress. If your clothes are cleaned and pressed here, you are eligible for membership in the Cleanliness Club. Clothes sent for and delivered anywhere in town.

W. P. ROYSTER

LITTLE KNOWN FOREST PRODUCTS WIDELY USED

Mankind Dependent Upon a Large Variety of Forest Products Whose Names Do Not Indicate Their Origin. Washington, November 14. — In addition to the ordinary uses of wood with which we are familiar, mankind is dependent upon the forest for a variety of products whose appearance does not indicate their origin, say members of the Forest Service. Numerous as these products are, and as extensive as is their use at the present time, science is constantly learning new constituents which enter into the makeup of wood and is finding new uses to which these constituents and already known can be put. Powder for munitions or blasting, disinfectants for protection against contagious diseases, and artificial silk for clothing are among the products obtained in whole or in part from wood.

Charcoal, as every one knows, is essential for the manufacture of black powder. All of the acetone used as a solvent in making nitrocellulose powders is derived from acetic acid, a product of hardwood distillation. Great Britain, it is said, is dependent upon the United States for acetone used in making cordite. Black walnut is a standard for gunstocks, and has been so much in demand for the past two years that our supply of this valuable wood has been considerably reduced and other woods, notably birch, are being substituted. From Europe comes the complaint that there is a shortage of willow for making wooden legs.

Pure wood alcohol is the only substance which can be converted commercially into formaldehyde, which is universally used for disinfectant against such contagious diseases as smallpox, scarlet fever and tuberculosis. The experts at the Forest Products Laboratory have conducted extensive experiments on the production of grain or ethyl alcohol from wood and have been successful in experimental work in raising the yield and lowering the cost of production. If this process can be put on a commercial basis, the foresters say, it will result in putting the millions of tons of coniferous sawdust and other material which is now wasted every year to a profitable use.

By converting cellulose, one of the elements of wood, into a gelatinous material, known as viscose, a wide field is opened up for the utilization of wood waste, and a new line of products varying all the way from sausage casings to tapestry, is added to the already lengthy list. Many of the so-called "silk" socks, neckties and fancy braids now on the market contain artificial silk made from wood.

About nine-tenths of all the paper which we use is made from wood. Besides the detailed investigations of the methods of making newspaper paper, and of the production of paper from woods hitherto unused for that purpose, which have been conducted, kraft paper, which compares favorably with the best on the market, has been produced experimentally at the Forest Products Laboratory from long leaf pine mill waste. This kraft paper is brown in color and is very much stronger than ordinary papers. It is used for a variety of purposes, and, cut into strips, is spun or twisted into thread which is then woven into onion and coffee bags, matting, suitcases and wall covering, similar to burlap, and furniture closely resembling that made from reeds, as well as other articles of common use.

Within the past year the Forest Products Laboratory, has, by co-operating with manufacturers, succeeded in getting a dye made from mill waste of orange put on the market as a substitute for fustic, which we import from Jamaica and Tehuantepec.

These are only a few examples of the work carried on at the Forest Products Laboratory, say the men in charge. Other activities, ranging all the way from the study of decay in wood to that of the resistance of wood to fire, are in progress, and new discoveries are constantly being made. Incidentally, the Forest Products Laboratory at Madison, Wisconsin, was the first of its kind in the world, and is probably still the best equipped. With the possible exception of Germany, no other country has done as much as the United States systematically to investigate the possibilities of its forest resources.

Immense Prosperity Here

This great wave of agricultural prosperity is a natural sequence to the increased diversification which has been characteristic of Southern agriculture in larger and larger proportions for the past several years.

Along with all this improvement in the production, distribution, marketing and price of Southern farm products, has come a gradual improvement in the farmers methods as applied to his finances and business.

Thousands of Southern farmers already have made themselves independent of the crop lien system. Others have paid off their mortgages.

Head-Off That All-Winter Cough

At the first sign of sore throat, tight chest or stuffed-up head, take a dose of Dr. Bell's Pine-Tar-Honey. The healing pine-tar, soothing honey and glycerine quickly relieve the congestion, loosen the phlegm and break up your cold. Dr. Bell's Pine-Tar-Honey has all the healing aroma from a pine forest. It is pleasant to take and antiseptic. The formula on the bottle tells why it relieves coughs and colds. At your druggist, 25c.

Waste Tanbark Now Used to Make Roofing

Washington, November 14.—A method for using waste hemlock tanbark to partially replace expensive rag stock in the manufacture of felt roofing has been developed at the Forest Products Laboratory in Washington. It is stated that, in these mills, from 20 to 30 per cent of the rags is being replaced by waste bark and that the quality of the finished product is equal to that manufactured solely from rags. According to the Census of 1909, over 698,000 tons of hemlock bark were produced each year in the United States. After the tannin is extracted this bark is used for fuel purposes, for which it is said to have a value of 60 cents per ton.

The extent of the savings rendered possible by the new methods is pointed out by the fact that the roofing mills of the United States have a total estimated annual production of 237,000 tons of finished roofing of all kinds, equal to about 11,300,000 "squares." By a "square" of roofing is meant 100 square feet. The utilization of the waste bark in this industry should, it is said, enable the mills to reduce their manufacturing costs appreciably.

In addition to the use of the bark for roofing, papers made at the Forest Products Laboratory on the basis of 80 per cent of waste tanbark, have been successfully printed on a commercial twelve-color wall paper printing machine, and gives promise of being entirely satisfactory. Other paper of the same make-up has been made into fibre conduits by a commercial manufacturer.

Other possible uses of waste bark which suggest themselves, say the Forest Service paper experts, are the use of bark mixed with ground wood for the production of wall board, or with sulphite screenings in the manufacture of car liners. Studies already made at the Forest Products Laboratory indicate that it may be possible to use waste hemlock and oak tanbark in making sheathing paper, carpet liners, bottle wrappers, deadening felt, and the like.

Do You Have Sour Stomach?

If you are troubled with sour stomach you should eat slowly and masticate your food thoroughly, then take one of Chamberlain's Tablets immediately after supper. Obtainable everywhere.

Cedar Falls News

Everything is smiles in our town since the re-election of Woodrow Wilson.

Mr. C. L. Hutcheson spent Saturday night and Sunday in Greensboro.

Our school is starting off nicely under the management of our lady teachers, Misses Ellis and Trogdon.

Mr. W. J. Armfield and family, of Asheboro, paid our town a visit last Sunday afternoon.

Mr. W. P. Hall, inventor of the apple and ale vending machine, has now built another vending machine that will sell any 5 cent article that is sold in any store, regardless of weight or size, just by dropping a nickel in the slot.

Mr. John York and wife, of Worthville, visited in our town last Sunday.

It does not seem likely that Messrs. Clifford Cox and Cephas Bowman will start their train to Atlanta, Ga., with the parties that they say stole the election two years ago. This is what Clifford Cox says they would do in one of his speeches here just before the election. I think Mr. Cox will probably wait as long as four years longer before he runs this train to Atlanta.

Rev. Thompson preached his last sermon here Sunday night.

The Asheboro crowd is making this place look like a small Greensboro.

They are having the race and river junks cleaned up and have put the mill in first class shape and will be running their mills by water power shortly.

RUB-MY-TISM

Will cure your Rheumatism, Neuralgia, Headaches, Cramps, Colic, Sprains, Bruises, Cuts and Burns, Old Sores, Stings of Insects Etc. Antiseptic Anodyne, used internally and externally. Price 25c.

Resolutions of M. E. Church, South Asheboro Station, M. E. Church, South, Quarterly Conference, Oct. 9, 1916.

Your committee to draft resolutions regarding the efficient service of our beloved pastor, Rev. J. E. Thompson, submits the following:

Whereas, under the laws of the church, our pastor cannot be returned to us at the approaching annual conference, and

Whereas, under his wise leadership and guidance, our church has enjoyed four years of unusual growth and prosperity in all its departments, and by his good disposition and genial character he has harmonized this charge and made a closer union of our people and built up our organization for more efficient service, while our relations with other branches of the Christian Church here have been and are now most cordial: Therefore, be it resolved:

First: That we regret the necessity of the change, and that we request our esteemed Presiding Elder, Dr. Weaver, when the Bishop and his cabinet meet, to keep our dear Brother Thompson in mind, and secure for him such an appointment as may fit him best, and such as he deserves:

Second: That we request our pastor to let it be known, at the proper time and place, that we desire that our Presiding Elder, Dr. Weaver, be returned to the district for another conference year.

Third: That these resolutions be spread upon the quarterly conference record, a copy each sent to the Christian Advocate, The Asheboro Courier and The Bulletin, with the request that they publish, and a copy to Dr. J. H. Weaver, Presiding Elder, and to Rev. J. E. Thompson, pastor.

P. H. MORRIS,
D. B. McCRARY,
W. A. COFFIN, Com.

Now Lookout

When a cold hangs on as often happens or when you have hardly gotten over one cold before you contract another, lookout for you are liable to contract some very serious disease. This succession of colds weakens the system and lowers the vitality so that you are much more liable to contract chronic catarrh, pneumonia or consumption. Cure your cold while you can. Chamberlain's Cough Remedy has a great reputation. It is relied upon by thousands of people and never disappoints them. Try it. It only costs a quarter. Obtainable everywhere.

Mrs. D. B. McCrary Hostess to Randolph Book Club

On last Thursday Mrs. D. B. McCrary delightfully entertained the Randolph Book Club at her home on Main Street. An interesting program on India was rendered. Mrs. J. O. Redding read an article on Bombay and on account of the illness of Mrs. T. H. Redding who had a paper on Beauty Spots in India, Mrs. W. A. Coffin read the paper. Delicious refreshments consisting of chicken salad, wafers, pickles, coffee and cakes were served by the hostess and Miss Allie Vestal.

Sloan's Liniment for Neuralgia Aches

The dull throb of neuralgia is quickly relieved by Sloan's Liniment, the universal remedy for pain. Easy to apply; it quickly penetrates without rubbing and soothes the sore muscles. Cleaner and more promptly effective than many plasters or ointments; does not stain the skin or clog the pores. For stiff muscles, chronic rheumatism, gout, lumbago, sprains and strains it gives quick relief. Sloan's Liniment reduces the pain and inflammation in insect bites, bruises, bumps and other minor injuries to children. Get a bottle today at your druggist, 25c.

HONOR ROLL

West Bend School, For Month Ending November 16.

First Grade—Roe Haddock, Fannie Pugh, Minnie Steed, Agnes Lewallen, Roland Jarrell.

Second Grade—Roy Haddock, May Lewallen, Albert Goins, Colon Jarrell, Della Rich.

Fourth Grade—Ethel Davidson, Rosa Goins, Frances Haddock, Fima Robbins, Alvin Jarrell.

Fifth Grade—Ida Pugh, Roena Rich, Rachel Robbins, May Robbins, Annie Steed, Lillie Steed, Roy Sanders, Sadie Thompson.

Sixth Grade—Wiley Davidson, Sulon Jarrell, Frank Craven.

Most headmarks, Sadie Thompson.

W. C. YORK, Teacher.

Democratic Majorities in Montgomery County

For Senator—W. C. Hammond, 69.

For the House—B. S. Hurley, 42.

For Register of Deeds—W. L. Wright, 55.

For sheriff—G. W. Stuart, 106.

For Surveyor—W. L. Thayer, 72.

For Coroner—J. A. Lisk, 71.

For Congress—L. D. Robinson, 40.

For Governor—T. W. Bickett, 37.

For President—Woodrow Wilson, 26.

The Amendments carried by a majority of 210.

Cotton Report

Editor of The Courier:

The Government report from the bureau of census shows that there has been 235 bales of cotton ginned in Randolph county prior to November 1, 1916, as compared with 171 same date 1915.

J. S. RIDGE,
Special Agent.

Asheboro, N. C., November 9, 1916.

PUTNAM'S HOUSEHOLD HANDBOOK

Has Innumerable Practical Ideas For Making Housekeeping Easier. Space Permits Only a Few of Those With Which Its Pages Are Filled.

A good coat of this white paint on the outside of a screen allows those inside to look out but keeps those outside from looking in.

The lower stair put on hinges makes a good receptacle for overboils.

Old wall paper of light tones can be tinted cheaply with a special tint for use on walls.

When a patch is put on wall paper to cover up a spot, the edges to be invisible when pasted, should be torn, not cut.

Household work may be done very comfortably when dressed in a gymnasium suit, which can be easily and quickly made from inexpensive material.

A wooden tub or bowl will prevent much of the chipping which dishes get from a metal pan.

A pocket on INSIDE of a kitchen apron cannot catch on anything and tear.

A piece of camphor ice put away with silver will keep it from tarnishing.

Painting the lower cellar stair white will prevent many a stumble in the dark.

To prevent match marks on white paint, smear a little vaseline over the spot generally used. After a few attempts to scratch a match on the greasy surface, the most persistent offender will desist.

Prick an egg before boiling, and it will not crack.

Two home-made iron holders fastened together with a tape a yard long and thrown around the neck, will save having to look for a towel in handling hot dishes.

Suede shoes spotted from rain can be renewed by rubbing with an emery board the spots matted together by water.

To keep a placket from tearing, fasten the last or bottom hook, and clamp it with a tack hammer. It will not come unhooked and eases the strain where the garment is so often torn.

Metal buttons that can be picked up with a magnet will rust when washed.

An electric fan can be used for warming a room quickly by placing it in front of the radiator and starting it running. All the air in the room will, within a short time, circulate through the coils of the radiator. If a box is provided with handles, it will be accepted by the railroad for checking just as an ordinary trunk.

Many common household articles may be conveniently used for quite different purposes than those for which they were intended. Putnam's Household Handbook is full of hints like those below.

A handy little washer for a milk bottle can be made from the wire handle of a grape basket, straightened out, and the hook left on one end.

Rubber tipped door stops screwed into the legs of a kitchen chair will add to its height for use at the sink or for ironing.

An asbestos mat makes an ideal toaster.

An ordinary clothes-pin can be used for holding small vessels steady on a hot stove.

A cork fastened to the knob of a kettle cover with a piece of picture wire will prevent burned fingers.

A clothes pin bag made from ticking can be hung on a coat hanger and pushed along the line as needed.

Liquid court-plaster applied to a scratch on kid pumps will make the scratch almost invisible.

If a sewing machine needle becomes blunted, stitch a few inches through a piece of sand paper, and the point will become sharp.

An extra book-case provided with curtains at the doors can be used as a linen closet.

A dried-out egg shell with a hole broken in one end will serve as a funnel for filling small bottles.

The nutcracker makes a splendid little household wrench for cans and bottles with screw tops, and for the larger nuts on sewing machine and clothes wringer.

A buttonhook with a loop handle may be used effectively in adjusting an electric droplight to a convenient position.

Red Cross Seals 1916

The Red Cross Seal campaign is on in earnest and Dr. L. B. McBrayer, of Sanatorium, is again acting as executive secretary.

Dr. McBrayer says the prospects are very encouraging and he believes that in many places sale of Seals will be doubled; in fact, he is so thoroughly convinced of this that he placed an additional order last week for half a million Seals. His first order was for one million and he is expecting these to arrive this week, when they will be shipped out to the various Woman's Clubs and other committees that are handling the Seals in the various communities. However, the committees will not begin the active sale of Seals until Thanksgiving.

Sufferer From Indigestion Relieved

"Before taking Chamberlain's Tablets my husband suffered for several years from indigestion, causing him to have pains in the stomach and distress after eating. Chamberlain's Tablets relieved him of these aches right away," writes Mrs. Thomas Casey, Geneva, N. Y. Obtainable everywhere.
