Smith, signers of the sensational circular distributed in Lexington last week charging that a certain police officer had taken a bribe not to report some persons with an automobile load of whiskey, were convicted of criminal libel in percorder's court Wednesday and fined \$100 each and costs. Chief of Police W. A. Hart-ness was the prosecuting witness and the defendants admitted that he was the "certain officer" referred to in the circular. Mr. Hartness vigorously de-nied that he did not take the two dol-lar bribe to let Will Reynolds of Yad-kinville by with 65 gallons of whiskey and he sustained his denial. to specify whom they meant in the cir-cular. Corn The American people have not come into the full realization of the possi-bilities of corn as a food. Scientists tell us that it is more nourishing than wheat. Corn is the richest crop on earth and it is an American cop. If Europe had corn as America has the people of the earth would have long since been eaters of corn. The world is stripped of wheat today. The price of wheat is higher than at any other time in the memory of wans. We have known wheat as the staff of the we could know corn as the same and it would be cheaper. Perhaps that is why we feed it to the hogs to futten and make them rich; feed it to our cattle to make beef for us, but do not feed it to ourselves as we should al-though it is rich, very rich in food properties for man. The people of the South know corn bread. The peo-ple of the North do not. America raises enough corn today not only to feed itself but to feed nearly all of Europe. It could raise enough to feed all Europe. And yet we have a food shortage and famine threatens Europe. When America teaches itself and taches the world the worth of corn it will have freed the world from its bondage to wheat, and will make such a food crisis as the present imposa-ble. Incidentally it will create a mar-ket for corn that will mean a pros-perity greater and better than any we have known. DR. W. R. WOLFE Veterinarian Asheboro, N. C.
