Asheboro, N. C., July 12, 1917

Mayor McCrary has given notice that the town constable will inspect your premises with the view of ascertaining whether they are in a sanitary condition. This is a time of the year in which disease germs and flies and mosquitoes delight to breed.

The Courier at all times endeavors to serve the people of the county by furnishing them with information which will be of value to them. This week it is printing the complete list of registration with numbers assigned for the selective service draft.

HOW LONG?

Asheboro is still reaping the folly of representatives in the last General Assembly notwithstanding the fact that it lies within the power of the town commissioners to give the town the relief to which it is justly entitled.

OUR COURSE JUSTIFIED

"How the War Came to America," is a book upon whose pages the world will judge the righteousness of our cause in going to war against the German Imperial Government.

States into war with Germany. The exact condition of affairs at the time of the delivery of the President's war message is set forth in unmistakable terms and the course of this country in going to war is justified by a plain recital of facts.

A TRUE PRESENTMENT OF FACT

The first round of the standard keeper in Charlotte, according to the Statesville Landmark showed that he had examined 345 scales in Charlotte and of this number he found 102 out of balance—that is to say, all the weighing on 102 scales was inaccurate and somebody was suffering all the time from false weights of those 102 scales.

This form of cheating is not confined to Charlotte, the Landmark properly says. It exists wherever people buy or sell. "And," says the Landmark, "by people who would want to fight if openly charged with dishonesty; people who lay great stress on their religion, who occupy the chief places in the churches and thank God daily they are not as other men, are daily guilty of violating all the precepts of common honesty and the commands of the Almighty, by cheating through false weights and measures—some of them knowingly and willfully, some of them negligently—and the latter are almost as bad as the former."

This form of cheating is not confined to the people of the cities and towns. Stressing this the Charlotte Observer remarks: "The farmer often leaves his conscience at home when he comes to market with the idea uppermost in his mind to 'skin' the town fellow. Farmers' wives are not guiltless in some cases. The falling mold common with them is the mold of butter which is intended to pass off as a pound, when it is only fourteen ounces. There are ways of manipulating butter by which in the course of turning out half a dozen or so of molds an extra 'pound' is materialized.

CALOMEL SALIVATES AND MAKES YOU SICK

Acts Like Dynamite on a Sluggish Liver and You Lose a Day's Work. There's no reason why a person should take sickening, salivating calomel when 50 cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach.

Your druggist says if you don't find Dodson's Liver Tone acts better than any other calomel your money is waiting for you.
