Spasmodic Advertising.

We all recognize that as between the fellow who works "by fits and starts" and the chap who plods along and keeps at it steadily, the plodder gets there every time. The spasmodic fellow may create an occasional impression, but the result of his fitful labors are dissipated in the intervals.

The occasional display or fireworks only serves the purpose of preventing his being forgotten altogether; while the man who works, and keeps working constantly improves his position and prospect.

So it is with advertising. It is the repeated "ad" and the sustained effort that tells. We don't mean the "ad" that is never changed, but the one that is ever changing, but never omitted! The wise advertiser keeps always before the people to whom he desires to sell his wares. When you want to quit doing business stop advertising, or advertise only "once in a while."

The Augusta (Ga.) Chronicle notes the advent into Georgia of Senator Peffer, Congressman Simpson and Mrs. Mary Ellen Lease, and says:

"There is no use in mincing matters about these third-party apostles, and we think that they come to Georgia with one object in view, and that is to gain converts to the people's party, and thus impair, if not destroy, the unity and strength of the Democratic party. All Democrats should unite as one man to put down this new crusade against the integrity of the Democratic party, which is the only hope of the Southern people for honest government. Our people should not play the fool now and throw away upon mere abstractions and distractions the only chance the Democratic party will probably have in many years to regain possession of the Federal Government.

Mr. Spurgeon, the great London preacher, is in very poor health, and grave fears of his recovery are entertained.

Paris is laughing over a joke about an American inventor who is said to have patented an electric corset that is to bring about the reign of morality at once. If one of these articles is pressed by a lover's arm it at once emits a shriek like the whistle of a railway engine; and the inventor claims that he has already married three of his daughters, owing to the publicity thus thrust upon a backward lover.

The complete census report of the mines and mining industries of the United States shows that the total value of this country's mineral products for 1889 was \$556,988,450; the number of mining industrial plants was 30,000; that 512,114 persons were employed, that their wages aggregated \$212,409,809, and that the capital engaged in actual mining operations reached the enormous sum of \$1,173,000,000. From these figures it will be seen that the value of the output from the mines of all kinds in this country was but 59,023,100, less than one-half of the total capital paid to wage earners in these industries was a fraction more than 37 per cent of the value of their output.

NOTES AND COMMENTS.

Herman Harms, who has been asleep at St. Charles, Minn., for many years, has awakened.

Allen W. Thurman of Ohio is confident of the re-nomination and re-election of Governor Campbell.

Hamilton Fisk, a one-time wealthy man, died alone and forgotten in New York. Drink ruined his life.

Over the plunder-room of a Hot Springs, Ark., thief he had painted the motto: "Get right with God."

Sidney Shire committed suicide in New York because of his father's opposition to his proposed marriage.

The Keystone Bank scandal grows apace, and Postmaster-General Wanamaker's complicity is becoming daily more evident.

At San Jose, Cal., Manuel Soto was killed by officers after killing Nicols Smith, wounding three other men and fatally stabbing his wife.

Judge Botkin of Kansas is afraid that the friends of the late Sam Woods will kill him on account of his connection with the feud which resulted in Woods' death.

By a Nebraska decision, if the husband is physically unable to support his family, and the wife earns the money wherewith to do it, she is the legal head of the family.

The result of the recent census of England and Wales shows a total population of 29,001,018, an increase of 3,026,572 over the previous census.

Citizen George Francis Train landed in New York and is speeding westward to Puget Sound. His around-the-world trip will take him sixty-two days instead of fifty-five, as he had attempted.

Tom Dixon, New York's sensational preacher, severely condemned his brother, Rev. A. C. Dixon, for his criticism of Henry Ward Beecher. In his article, published in a New York paper, among other things, Tom says: "If Beecher is in hell I hope to go there too."

It is indisputable that more cases of Dyspepsia, indigestion, Weak stomach, Bilious and Gastric Derangement are cured by Humphreys' Specific no. ten than by all other remedies put together.
