There is no class of persons who have a more kindly feeling for a dumb animal than the police patrol wagon and fire department drivers. They are thoroughly attached to their horses and the latter to the men. This is due to the fact that the horses get the best of treatment, and are always petted and well fed.

NEW CHATTANOOGA LABORATORY.

One of the Largest in the World-Wine of Cardul Has an Immense Sale. Chartanooga, Tenn., November 9th.—The immense new laboratory of the Chattanooga Medicine Company was commenced to-day. Nearly an acte of floor space is now used in making McElree's Wine of Cardui and Thedford's Black Draught, but this new annex doubles the capacity of the plant. This business has become one of the largest in the country, and now sends its leading product, Wine of Cardui, to every part of the world. Wine of Cardui, to every part of the world. A branch office has been established at St. Louis for the northwestern trade.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address in F. J. Cheney & Co., Toledo, O.

In Olden Times-

People overlooked the importance of permanently beneficial effects and were satisfied with transient action, but now that it is generally known that Syrup of Figs will permanently cure habitual constipation, well-informed people will not buy other laxatives, which act for a time, but finally injure the system.

What a Sense of Relief it is to Know that you have no corns. Hindercorns removes them, and is comforting. 15c. at druggists.

Your Efforts are in Vain . trying to regain lost strength by the use of tonics, nervines, preparations of codiliver oil, iron, etc. To get back the old-time vigor, the bright eye, the firm step, the ambition, the first aim must be to promote nutrition. BILL ARP'S LETTER. FORTY LIVES

THE MARCH OF PROGRESS BE-WILDERS HIM.

He Talks of Many Interesting Things, Among Them Silver and Gold.

I witnessed the street pageant of Buffalo Bill's "Wild West" show. I suppose there were 50,000 people who did the same thing. That much was free, and quite enough for me. Somehow I have lost my appetite for circuses and other spectacular amusements. The time was when I never missed one if I could help it; but now I prefer to see things that provoke thou; ht instead of smiles. The wonders of the exhibits in the exposition, the progress of man-kind in the arts and sciences fill the mind with pleasant contemplation. When the telegraph wires first reached our town we felt sure that there was nothing else to invent or discover; that no ling more was needed. But so many wonderful and neeful things have piled up on us since that now we live in a state of expectancy. What will come next?

when I was a boy we studied a philosophy which said that the load must be near the power, and there was a picture of a horse trying to pull a bag of sand by a rope that was 100 yards long—and he couldn't move it. Now we read that the power from the electric plant at Niagara is soon to pull all the boats on the great Erie canal, and the thousands of horses and walks are to be displayed from their moand mules are to be discharged from their monotonous service. More than this-we read that this same power is soon to supercede all other powers in loading and unloading the vessels in New York harbor. If this power can reach New York from Niagara, why not reach across the continent? How long before all our railway trains will be moved by it? There is sufficient water power right here near Carters-ville to operate a plant that would move all the wheels in Georgia. The children now at school will live to laugh at the simplicity and stupidity of their fathers and grandfathers just as I now smile at the recollection of the time when my father kept a flint and steel and a piece of punk in a little tin box and would strike a spark and light a candle when he wanted a light in the night. It is funny to think of the time when there were no matches. What would these cigarette boys do without matche-? Every decade brings cheaper methods and more comforts. The old rule that Adam Smith trught us in his "Wealth of Nations" was that providence had wisely ordained that the labor of one man would easily support eight persons, meaning himself and wife and six children. But he wasent counting on \$6 shoes for the boys and \$10 hats and balloon sleeves for the girls and a college education for both. The labor of the average man will not support eight persons now, for notwithstanding the cheapness of things our wants are increasing tenfold. Stephen Girard said that the way to get rich was to buy nothing that you are not obliged to have, but we reverse the maxim and and it is now supposed that at least 40 per-buy too many things we are not obliged to sons were killed and 20 wounded. The

While in the exposition I did want to buy a look at them and only bought her a pepper box. Now that reminds me of our trouble in the south. That aluminium clay is all about in our hills and is being mined and shipped every day to Pittsburg and there it is reduced and manufactured and the products come back to us with two freights and big profits added. Just so with our manganese and ochre and lumber and hides and most of our cotton and wool. We have got to manufacture our own materials or we will never catch up. But we are making good progress in iron and cotton and maybe the other plants will come along in time. I learn that 80 per cent of that aluminium clay is wasted and thrown away in the process of reduction. Just think what a saving of freight there would be if we could reduce the metal at the mines. We would soon be the richest people on the earth if we could manufacture our own materials. The labor is here, but it is idle. Our boys are willing, but they can't find

It is astonishing how rapidly wealth increases when labor is rewarded. Look at a ruined state like Georgia was in 1865 and now see what thirty years have done. Look at the exposition that has been planted with the money from one city and is now the wonder of the nation. Where does all this money come from? Verily, it looks like Aladdin's lamp has come down to us -- and yet almost everybody is complaining of hard times. I've been reading Jo-sephus again and I don't understand how Solomon got all his money, for David was at war with somebody most all his life. Josephus says that silver was as plentiful in Jerusalem as the stones in the street. The temple was overlaid with gold and cost millions of dollars. Herod sent a little present of ten millions of drachmae to Caesar. Hyrcanus sent ten thou-sand talents of gold. The Pharaohs built the pyramids for their own tombs, and one of these ook 100,000 men thirty-seven years to complete it and it cost five hundred millions of dollars and is not worth a cent to anybody. The Aztecs of Mexico built some just as large. The ruins of them are still there and historians say they had idols on their tops that were thirty feet high and made of solid gold. There is a cathedral now in the City of Mexico that cost sixty millions of dollars.

What a vast amount of money has been made from the beginning down to the present time. Mankind began early to hunt for gold, for Moses says in the sec-oed chapter of Genesis that the gold of that land around Eden was good, and I reckon old Adam dug for it and molded it and jingled it in his pocket. He never wore fig leaves long. John Knox, in his Geneva edition of the Bible, an edition that fasted fifty years and was very popular, says that Adam and Eve, when they knew that they were naked, made for themselves "breeches," and so, of course, they had pockets to carry their money in. Old Mother Eve were breeches then, and her offspring, the new woman, got her fashion right straight from

the garden of Eden. What will Dr. Hawthorne say about that? But silver came along in due time. Abraham bought the cave of Macpelah and paid 400 shekels of silver current money with the merchant It was not coined, for he weighed it. I recken it was granulated like we used to buy gold half a century ago. My father was a merchant, and bought a great deal of fine gold from the miners, and most of it was in goose quills. The quill was transp arent and had a little wooden stopper, and a good large one held about \$10 worth. Josephus says that in his day gold and silver were coined and stamped. It was roughly done, I reckon, for I we a coin that is 1,600 years old, and it has constanting on one side and two Roman lictors on the other; and it is a rough job. Aluminium would make a beautiful coin, and with the government stamp would be a handier coin than silver, for it is not half so heavy. It is the stamp that fixes the value. Iron and copper were used by the Greeks and Romans just as we use nickel now.

What a rumpus this question of currency has raise l, and it came upon us this time so sudden and unexpected. Where all the gold is I den't know, 'or I never see any of it. Nobody but the bankers and the United States treasury have any use for it, or anything to do with it. It travels back and forth across the water in bags and boxes and settles the balances of trade with the banks and the merchant princes, an i that is what it is for, I reckon. I haven't seen but one piece in two years, and that wasn't mine. What good it is doing locked up in vaults I don't know, but I reckon it is all right.

Pope said whatever is is right, and so I don't worry. We still live and are out of jail, and there is peace and harmony in the house-holl—and that is a higger thing than gold or silver. - BILL ARP, in Atlanta Constitution.

A Musical Dentist. There is a dentist in San Francisco who is noted for his musical tastes and his high charges. His ordinary fee is fifteen dollars per hour; his extraordinary fee is unknown. Some time ago a lady was in his chair, and the dentist was conversing with her while her mouth was filled with rabber dams and things. Carried away by his enthusiasm while talking of a certain song, he offered to sing it for her. Taking an inarticulate, rubber-intercepted sound for an affirmative, he skipped lightly to the piano, which stood in one corner of the operating room. There he toyed with Polyhymnia, the muse of music, doubtless much to his satisfaction, and, turning to his patient, asked how she liked it.

"Very much, indeed, doctor," came the reply in muffled tones, "but it would have been chesper at a concert, for here it has cost me three dollars and seventy five cents."-Argonaut.

SACRIFICED.

A STEAM BOILER EXPLODES WITH TERRIFIC FORCE

Swallowing Up Many Working People, and the Flames Broke Out to Add

to the Horror. At Detroit, Mich., on Wednesday morning one of the steam boilers of the Journal office exploded with terrifle force and terrible results. The boiler was located in the southeastern corner of the building, No. 49 West Larned street. The first floor was occupied by the Journal mailing department in which a force of 15 men and boys are usually employed. The second floor is occupied by the Rogers Typograph Supply Company, employing seven or eight men; the second floor by Hilton's Book Bindery, which employed fully 25 girls and men; the fourth was occu-pied by W. Kohlbrand, an engraver, and on the fifth floor was the stereotyping depart-ment of the Journal. Only three men were at work in this department when the explosion occurred. The building, No. 45, occupied by John E. Davis & Co., grocers' supplies, was also completely wrecked. Only fine or six persons were at work there, however, when the disaster occurred, and the loss of life in that building will be small. In oss of life in that building will be small. In an instant the buildings were a mass of ruins, under which was buried many human

explosion shook the surrounding buildings, and glass within the radius of a block was shattered in all directions, many employes of adjoining establishments being severely cut by the flying glass.

Half an hour after the explosion occurred fire broke out in the debris and the firemen had to suspend the work of rescue and devote their attention to putting out the flames Just before the flames started one poor fellow was found with the lower part of his body pinioned tightly. He was conscious and begged his rescuers to get him out. They worked like flends to release the unfortunate victim, but all to no avail. The flames suddenly shot up around bim and he had to be left to his fate. Up to noon eight bodies had been taken

from the rulus and two more were in sight. Most of the bodies had been burned beyond The Rogers Typograph Supply plant, which had just been leased by the Mergenthaler

Company to William Dunlap, and which was ocated on the second floor of the wrecked building, was entirely destroyed, and the loss cannot be estimated. The destruction of the plant cuts off all supplies to papers using Rogers typograph machines, The list of casualties continues to grow

money loss will reach \$60,000 The list of identified dead is as follows: lot of those beautiful aluminium wares for my wife, for she does love pretty things and fine things, but I dident have the money. I let her Ross, William M. Dunlap, Walter P. Saxby, look at the mand only length her.

> RECOVERING DEAD BODIES. Over 30 Persons Killed in the Detroit

Building Disaster. The work of rescuing bodies of the victims of Wednesday's explosion in the Journal building at Detroit progresses steadily. Over 30 dead bodies have now been recovered and identified. The number killed will approximate 40. Latest developments demonstrate conclusively that negligent care of the boilers was the cause of the disaster.

The bodies of the following were recovered to day: Adolph Schreiber, Jr., bookbinder in Hiller's bindery; John Gordon, electrotyper Evening Journal; Kittle Leonard, Rosa Morgan, John Breitenbecher, Jennie Neibaur, 16 years old, employed in Hiller's bindery; Bertha Weidbusch, 19 years old; Ernest Parkins, assistant mailing clerk Journal; Emma Litchenberg, employe of Hiller's bindery; Rosa Bretz, remains frightfully burned and mutilated; Catherine Hiller, forewoman Hil ler's bindery; Lue Fretz, employe Dunlay and Company; Anna Weidbusch, employe Hiller's bindery; John F. Derby, carpenter, Joseph Bradley, carpenter; George J. Hil-ers, proprietor Hiller's bindery.

PUBLIC SPIRIT IN ATLANTA.

Mr. Inman Subscribes \$50,000 to Paying the Exposition's Floating Debt. Samuel M. Inman, chairman of the exposition finance committee, goes down in his pocket for \$50,000 toward taking up the company's floating debts. When he announced his subscription to his associates on Monday there was applause. The other directors have put up and the floating debt will be safely financed this week. The attendance is growing steadily, and the receipts are more than paying expenses. For the first month the exposition did not get out even, but now it is getting square with the world, and by the end of the month the daily receipts will go away ahead of ex-

WOMAN'S ENEMY. PERITONITIS SELDON SPARES ITS

VICTIMS.

When It Does She is But a Wreck -- Physicians Have Long Been Powerless --- The Experience of a Baltimore Woman.

From the Herald, Bultimore, Md. Mrs. J. P. Grove, a married laly with grandchildren, lives 417 Pinkney Place, Baltimore. She would easily pass for a woman of half her age, and owes her present state of good health and probably her life to the use of Dr. Williams' Pink Pills. A Herald reporter called at the house a few days ago and was informed that Mrs. Grove had gone out for a walk and would soon be back, The scribe was ushered into the parlor to await her arrival. The room gave every evidence of refinement and the care and attention of a good housewife. Choice books lay around giving proof of the intelligence of the family, and the walls were decorated with many rare articles of virtu and bric-a-brac from South America, Japan, and other countries. When Mrs. Grove was announced the reporter was astonished to find her such a young looking and healthy woman. She is well educated, and is a finent talker and interesting to listen to. She, however, declined at first to speak of the results she had experienced from taking the Pink Pills as, she said, she did not like to have her name, appear in print in any way. "However," she added, after some little hesitation, "the pills did me so much good that I might be doing wrong by not letting some other sufferer know what they did for me." Then she said, "Dr. Williams' Pink Pills are certainly all the proprietors represent them to be. I never had such relief from any other medicine. A short time ago I had an attack of peritonitis which left me in such a prostrated and nervous condition that I despaired of recovery. I could neither sleep, eat or read with any degree of peace or satisfaction, and life was absolutely a burden. Having heard that others had been cured of the same troubles by Dr. Williams' Pink Pills, I secured several boxes and began to take I secured several boxes and began to take them. As it by maxic I at once began to improve. They cured me, and now I have no symptoms of nervousness or of the disease which so prostrated me. Now that's enough," said Mrs. Grove, in reply to another question. She walked to the door as lightly as a require circle and with a pleasant good mornyoung girl and, with a pleasant goo! morning to the reporter, disappeare! within the portals of her happy home with a little grandchild clinging to her skirts.

Dr. Williams' Pink Pills contain, in a condensed form all the pleasants.

Dr. Williams' Pink Pills contain, in a con-densed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. Pink Pills are sold by all dealers, or will be sent post paid on receipt of price (50 cents a box, or six boxes for \$2.50—they are never sold in bulk or by 100), by addressing Dr. Williams' Medicine Company, Schenectady, N. Y.

John L. Sullivan says the reason the bruisers did not fight is that somebody was afraid.

The Emperor's Surprise,

The German Emperor is a master of little surprises quite other than those which occasionally fetch his troops out of bed in the middle of the night when they least expect it. While at Low-ther Castle he took the opportunity afforded by the absence of Lord Lonsdale to unpack a very fine marble bust of himself and put it in position, screened by the leaves of a large palm. The sudden unveiling and presentation were quite dramatic in character, and it need hardly be said that Lord Lonsdale was highly delighted with the carefully planned compli-

English and Spanish Customs.

An Englishman entering a drawing room expects the lady of the house to rise and greet him. In Spain a lady would seem to forfeit her selt-respect should she exhibit so much forward.

The Greatest Medical Discovery of the Age. KENNEDY'S

Medical Discovery.

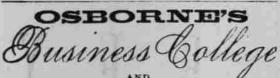

DONALD KENNEDY, OF ROXBURY, MASS...

Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Screfula down to a common pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humor). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal eard for book. A benefit is always experienced from the

first bottle, and a perfect care is warranted when the right quantity is taken. When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label. If the stomach is foul or bilious it will

cause squeamish feelings at first. No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

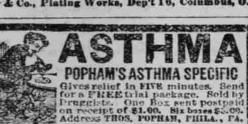

School of Shorthand No text books used. Actual business from day of entering. Business papers, college curr noy act goods used. Send for handsomely illustrated catalogue. Board cheap. R. R. fare paid to Augusta.

\$3 A YEAR.
