Highly Concentrated Acid Iron Mineral Goes From Two To Six Times As Far

More Powerful, Economical Than Prepared "Patents"

When people find their appetite off, vitality low, and are sluggish, tired and worn-out, a short treatment with just plain, everyday natural iron is the wisest course.

You can get natural iron, known as Acid Iron Mineral, at most drug stores and a fifty-cent bottle goes from two to six times as far as other and weaker iron compounds of laboratory and chemist.

A dollar bottle will permit a whole family to take it a couple of weeks which in its powerful, highly concentrated form is usually sufficient to increase the family's vitality, strength, and appetite in a truly wonderful manner.

Acid Iron Mineral has been bottled, tested and guaranteed up to its present high standard for thirty years for use in hospitals, surgery and dental work, and it may now be secured in family sized bottles. Be sure you get the genuine, the trade mark "A-1-M" is your protection. It is non-alcoholic, is not a laxative, and is the product of the only medicinal iron mineral deposit of its kind known to the world, 50¢ and \$1. Bottled by lessors, the Ferrodine Chemical Corporation, Roanoke, Va.

Note: Acid Iron Mineral contains such a high percentage of iron it may be used as an external germicide, antiseptic and astringent. Farmers, surgeons, and dentists use it to stop bleeding, prevent soreness and as a healing agent. See directions on bottle. Advertisement.
