### RECREATIONAL HALL STARTED AT ROSMAN

Community Uniting To Erect Structure Which Will Fill Great Need

ROSMAN, April 13-The long-felt need of a recreation center for the community is to be adequately taken care of by the NYA building which has been started here on West Main street.

The entire community is cooperating in the project which will be, when completed, for use of the community, and strictly speaking will be a community affair.

Lot for the building has been given by Jos. S. Silversteen; logs for the actual structure are being furnished by the Woodmen of the World; work of cutting the logs has been done by men in the town; and NYA boys of the community will do the work.

F. H. Holden, supervisor in Transylvania for the NYA, will be in charge of the building for the federal government; and has the plans all ready to go forward with the work which has already started.

When completed the building will provide adequate space for a first-class basketball court (which is the accepted sport in Rosman), with seat arrangements on each side of the court.

In addition to the large assembly room-court, there will be a room 20x40 feet at one end of the building which can be utilized for a boys workshop, and a girls meeting place. A large double fireplace will provide heat for both the court and the smaller rooms.

The Woodmen will have their lodge room in the second story, with an out-side entrance. This lodge hall will be directly over the smaller downstairs room, and will in no way interfere with

the height of the basketball court.

The building over all is to be 96 feet by 48 feet, and from interest being shown in the project by young and old alike, will be something of which the community will be justly proud.
