TAKE THE TROLLEY

The new trolley line to Laurel Park was actually in operation—tried out—on Saturday night and Sunday morning. An early announcement of regular operation of cars over the line may be expected.

FIRE WAGON'S QUICK RUN

The quick response of the fire department, Saturday evening, when it made a remarkably rapid run to Mail Carrier Mark Barnwell's home, saved many thousands of dollars worth of property.

The blaze was a small one and was soon extinguished. There was the makings, however, of a first class conflagration in the fire. The big Pine Grove Lodge adjoins Mr. Barnwell's home, as do other large buildings. If the blaze had once secured a good start, and only the quick run of the fire department prevented this, the consequent damage would have been great.

If you need groceries, flour or feed, see us, we have them. Our goods are guaranteed, all right, and the prices still better. Call 'phone 1 for prices. S. J. Harris.

A BUSINESS OPPORTUNITY

There's a business offered for sale in this town—on Main street—that is worth the investigation of anyone desiring to make money here this summer.

The present owner will sell all or part, and his only reason for wishing to dispose of it at all is that he has other business which must receive his personal attention.

The location of this business is ideal—right on Main street. The stock is clean and new and the annual turnover amounts to a surprising figure.

The proposition will stand the most thorough investigation. All inquiries should be addressed to this office, as follows, "A", Care Times Office.

THE FINEST FLOUR

"Wichita's Best"—a very high grade flour advertised in this issue of The Times, has been tried out by many of the most particular housekeepers here. Their verdict is that "Wichita's Best" is the very best flour ever sold in Hendersonville.

I Asked a

Piano Tuner

"Is it not true that the tone quality of a good piano is materially impaired by the addition of a player mechanism?"

"No," he replied. "Every piano requires systematic tuning, tone and action regulating. The addition of a player action does not alter this. As a matter of fact player touch cannot be told from that of the human performer, and is even more delicate. Furthermore, pianos that are never used deteriorate much faster than those that are played upon daily. For the same reason a jeweler keeps his clocks and fine watch movements running."

"Are they not constantly out of order?" I asked.

"At the present time I should say that they give no more trouble than a good chronometer!" he replied.

Take the Kimball Acmelodic Player Piano. Its accessibility is one of its most valuable features both to the tuner and owner. The entire player action can be removed in less than a minute; their flexible metal tubing is indestructible; their composite valves never swell, warp or shrink; it contains fewer working parts and its ease and simplicity of operation make it, to my mind, the most desirable player piano on the market."

The Kimball Acmelodic Player Piano has all the essentials for reproducing hand-played music.

This instrument plays the full scale, 88 notes—plays Kimball or any 88-note roll—full, round, rich, mellow tone, selected materials, best workmanship, roll-guiding device, Acmelodic soloist, ten exclusive improvements, music roll library privileges.

We will take your "never-played" piano in part payment.

I Asked an

Automobilist

"Is it true that owners of cars become so incocinated with the speed germ that the home is only used as a sort of place to sleep in?"

"Your question may hit some of my friends pretty hard, and it nearly got me," he replied.

"When we first purchased our car, we virtually lived in it. I hardly took sufficient time in which to eat my meals. In fact, we might have been going yet if it hadn't been for my wife."

"One night she said to me: 'Frank, don't you think we are neglecting the children and our home altogether too much for all our sakes?'"

"I guess we are," I replied.

"On the other hand, I have sort of lost my taste for reading, and the car has made the home seem rather quiet."

"Guess I'll have to provide some sort of home entertainment," she said, and she did.

"She purchased a Kimball Acmelodic Player Piano, and now I hardly know which I enjoy the most, the car or the player."

"One thing is certain, however, it furnished the necessary home counterbalance—it has drawn us closer together and has put the emergency brake on the speed bug."
