Give the Baby a Chance.

Bad air, bad milk, over-crowding, poverty, dirt, ignorance, heat—these combine in summer to kill the city baby. It seems as though the brunt of the cities' sanitary sins were focused on the baby. The baby didn't ask to come, to live in a hot, dark, air-tight tenement, to be fed on dirty, half spoiled milk, to be pestered with flies and mosquitoes. He is not responsible for any of these conditions and it is his right that he have fresh air, clean surroundings and decent food. The United States Public Health Service issues free of charge to all applicants a bulletin on "The Summer Care of Infants." It should be in the hands of every mother.

MRS. L. L. LITTLE DEAD.

Beloved Woman of Southern Presbyterian Church Dies in China—Well Known Here.

The news received here some days ago to the effect that Mrs. Ella Davidson Little, wife of Rev. Lucy L. Little, died in a hospital in Shanghai, China, brought sorrow to many people who know this saintly woman. Mrs. Little was the wife of Rev. Lucy L. Little, a native of Richmond county, being the oldest child of Samuel L. Davidson of that place.

Mrs. Little was educated at Staunton, Va., and at the age of 34 years was sent to China as a missionary for the Presbyterian church, representing the Yorkville church. She was for about ten years head of the Hang Chow training school for girls at Hang Chow, China. After visiting America and lecturing throughout the country she returned to China and was married September 30, 1900, to Rev. L. L. Little. She made two other visits to America and while here did a great amount of work, visiting a number of the Southern states.

Her work in China was a splendid success. She organized a Bible training class for girls and also a girls boarding school. Doctor Sprunt of Wilmington gave \$5000 for the building. She was an unusually beautiful woman and possessed magnetism in an unusual degree and personal charm.

First Half Pennant Safe For Lumberton.

Lumberton, July 18.—Lumberton cinched the first half pennant in the Cape Fear League today by defeating Laurinburg, 2 to 1, in a pretty 15-inning battle. Parkton, in second place, has no chance to overtake the leaders. The visitors' only tally was a home run by Davis in the second inning. The locals tied the score in the third on a wild pitch after the bases had been filled. Correll and Persons, first up in the thirteenth, doubled. McCormick, signed by Lumberton today, split a finger in the third inning and was forced to retire. Fairmont dropped out of the league today. The franchise probably will be taken by Dunn or Hamlet.

Score by innings: R. H. E.

Laurinburg— 010 000 000 000 0—1 7 2

Lumberton— 001 000 000 000 1—2 10 4

Batteries: Lamb and Smith; H. Stone and McCormick and Correll.

Who Should Be Vaccinated Against Typhoid.

The question, Who should be vaccinated against typhoid fever? has recently been answered by a noted physician of this country. He says all who come under the following heads should be vaccinated against typhoid as their positions largely increase their chances for contracting it: Drummers and railroad men; all vacationists, especially campers, people who travel much; practicing physicians and nurses; all people who live in towns and small cities; people who live in the country; people who live in a town or community where typhoid is epidemic; people who eat at various hotels and restaurants; people who have no means of knowing whether their food has been free from flies and filth; and finally all people who have not big bank accounts or who have loved ones dependent on them.

The doctor does not say as much but he evidently means to include the whole world for fear somebody will wilfully be left out. He does not want the responsibility laid at his door if some one should excuse himself from the above list and should contract typhoid fever and die.

Another doctor who does not want to be responsible for any person's remaining unvaccinated and contracting typhoid fever and perhaps dying says that there are only two classes of people whom he does not advise to take the treatment—the dead and those who have already been vaccinated.—N. C. Health Bulletin.

GLYCERINE AND BARK PREVENT APPENDICITIS.

The simple mixture of buckthorn bark, glycerine, etc., known as Adler-ka, astonishes Laurinburg people. Because Adler-ka acts on BOTH lower and upper bowel, ONE SPOONFUL relieves almost ANY CASE constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. The INSTANT, easy action of Adler-ka is astonishing.
