Henley, and Mr. Roland Covington, the committee having in charge the distribution of nitrate of soda for the Government in the county, announces that a vessel loaded with nitrates reached the Wilmington port May 24 and another on May 30. The first cargo has been allotted already and most of it delivered to farmers in the county. The second shipment has not been allotted but is expected to be ready for delivery here soon. It is also stated that another shipment is expected to reach Wilmington on June 20th. The Government is keeping its promise to the farmers and it appears that the bulk of the nitrates applied for will be delivered in time for use on this year's crops. Conditions have been such that delays were unavoidable and those who have needed the nitrate of soda will readily understand the difficulties encountered in trying to make them available for use this season.
