Think of It Folks ! Biteless Mosquitoes

Even the pesky mosquito finds that science has discovered a way for folks to keep him away. Who will bite and pester? Surely not the wise people who use this new salve called Cru-Mo when mosquitoes begin to buzz. Cru-Mo is not like the old fashioned smelly oils. It is a white, staining, salve, as agreeable to the skin as dew to the grass. If you want a summer without a mosquito bite, especially when they pester during the night, or for children, get a small tube of Cru-Mo from your druggists. Try it tonight. It has an all night effect and makes sleep too sweet for words. Just as good to stop sunburn torture—Adv.
