

A Newsy Trip Around The World

By Elizabeth Saunders

Lightning plays many unusual pranks, and it does strike twice in the same place. Out in Tahina, Okla. Bill Dixon, 60, and five other persons huddled under a tree for protection. Lightning struck there, jumped to Bill, coursed down his backbone, and shattered the seat of his pants. He is recovering. Near Monett, Mo., lightning came from a clear sky and destroyed two shocks of wheat on A. Bonus farm—just as it did 25 years ago.

Mujo Suljkanovitch, of Zvornika, near Belgrade, Jugoslavia, celebrated his hundredth birthday anniversary by marrying for the fourth time.

In Everton, Mo., D. W. Thomason has a five-legged pig weighing 50 pounds. The extra leg is on the fore part of the body.

The Gribble family, occupants of the highest house in Victoria, situated on the peak of Mount Hotham, are snowed in until November. In their mountain home blizzards, deep snow drifts and icy-temperatures keep them prisoners.

Twelve-year-old Mrs. Vernice Higgins Stotler of Cumberland, Md., is the mother of a six-pound boy. The boy's maternal grandmother is only twenty-six.

It has been found that mosquito eggs may hatch out four or five years after they have been laid.

In Los Angeles, Mrs. M. O'Neill has a queer bird—it is half rooster and half hen. It crows like a rooster, and lays eggs like a hen. In fact it does double duty, and that is more than a lot of chickens do for their owners.

Earl Crow, recent graduate of the Abernathy, Texas, high school, had 26 cousins attending the same school during his final year.

In Shanghai, crowds of superstitious persons have each night been worshipping before a mysterious red glow in the window of a school in the French concession there. The glow was found to be merely the reflection of an illuminated sign.

Near Mr. Carmel, Pa., Mariod Snyder was driving a truck loaded with over 100,000 eggs, when it overturned and the eggs were scrambled all over the highway. Practically all of the eggs were broken.

In Alfer, N. Y., Kangaroo tendons were substituted for those of an Alfred University student who was injured in a wrestling match there recently. The operation was successful in all respects.

In Latrobe, Pa., Al Burke's scarecrow has been ineffective. In fact

it lures birds to it instead of scaring them away. Burke found a nest built in the inside pocket of a coat he draped over the scarecrow.

In Palo Alto, Calif., successful experiments in the use of sewer gas for illuminating purposes have been conducted. More than 3,000 candlepower was developed in the mantle-type illuminator which shone across Palo Alto airport like a locomotive headlight.

To prove that a man can get along with his wife's relatives, Dr. Thomas Richmond of Kansas City, Mo., took his 27 in-laws on a vacation trip into the Rockies. The in-laws voted him a grand guy.

In Rochester, N. Y., Denico Gentile, 68, pulled two of his aching teeth with a pair of pliers and collapsed from loss of blood.

The fossil of gluptdonte, prehistoric predecessor of the armadillo, has been dug up by working excavating for the foundation of the new Buenos Aire Central Flood Market. The bones are calculated to be 50,000 years old.

In Brighton, England, 12-year-old Douglas Desimone had trained for an all-England championship swimming race. The night before the event he dreamed of the race, he climbed out of bed, stood on the window edge. He thought it was the edge of the swimming pool. He dived, caught on a clothesline, injured his back and head.

In Mobile, Ala., Olie Broodus had a horse and wagon. Both were hit by a car, and the horse was killed. He bought another horse. A motorist hit his wagon, scared the horse and it ran away. He bought a car. It collided with another, and Broodus paid the damages.

Incredible as it sounds, there are states in this country today in this country today in which a father can not only will away the guardianship of his children—without consent of their mother—but also will away the future custody of an unborn child.

Southern Speeds Service Between South And East

ATLANTA, Ga., Aug. 20—Effective Sunday, August 25th, Southern Railway System will put into effect much faster southbound schedules for four of its most important passenger trains and will speed up the northbound schedule of train No. 38, between New Orleans and New York. The trains to be affected are No. 37, between New York and New Orleans; No. 33 the "Piedmont Limited"; No.

25 the "Memphis Special" and No. 41, between New York, Washington, Chattanooga, Birmingham Shreveport and New Orleans.

One hour and thirty-five minutes will be cut from the running time of No. 37 which under the new schedule will leave New York at 2:30 p. m. instead of 9:50 p. m. and Washington at 7:05 p. m. instead of 2:55 a. m. reaching Atlanta at 8:45 a. m., Central time, instead of 5:40 p. m., and New Orleans at 10:00 p. m., instead of 8:05 a. m.

Northbound, No. 38 will leave New Orleans at 10:45 p. m., instead of 9:45 p. m. and depart from Atlanta at 1:00 p. m., Central time, instead of 12:01; Greenville 5:25 p. m. Spartanburg 6:10 p. m. Charlotte 7:50 p. m. Salisbury 8:50 p. m. Greensboro 9:50 p. m., with arrival in Washington at 4:25 a. m. and New York at 9:05 a. m., five minutes later than at present.

The "Piedmont Limited" No. 33 will leave New York at 8:05 p. m., instead of 6:45 p. m., Washington 12:50 a. m., instead of 11:55 p. m., reaching New Orleans at 7:20 a. m., as at present. Arrived at intermediate points will be: Lynchburg 5 a. m., Greensboro 7:30 a. m., Winston-Salem 8:25 a. m., Salisbury 8:50 a. m., Charlotte 9:50 a. m. Spartanburg 11:35 a. m. Greenville 12:30 p. m., and Atlanta at 3:15 p. m., Central time, shortening the schedule between New York and Atlanta one hour and twenty minutes.

The "Memphis Special" No. 25 will leave New York at 12:35 a. m., instead of 9:50 p. m., Washington 7:35 a. m. instead of 3:30 a. m. and arrive Knoxville 7:40 p. m. instead of 6:15, Chattanooga at 10:50 p. m., instead of 9:40 p. m., and reach Memphis at 7:30 a. m., instead of 7:15 a. m., shortening the schedule two hours and a half.

No. 41, under the new schedule, will leave New York at 8:05 p. m., instead of 6:45 p. m. with arrival at Birmingham at 8:10 p. m., and New Orleans at 7:00 a. m.

The Southern was the pioneer in lowering passenger rates, both coach and Pullman, reducing the coach rate from the old standard rate of 3.6 cents a mile to a cent and a half per mile in coaches and inaugurating a 3-cent per mile round trip in Pullmans, 15 day limit; and 3 cents per mile, round trip, 30 day limit, Pullman charges in addition, but no surcharge. Air-conditioned equipment, both dining cars and sleeping cars, have been installed on practically every through train operated by the Southern Railway System, which adds greatly to the comfort of the traveling public.

HENS NEED GOOD CARE IN SUMMER

Raleigh, Aug. 21—The productivity of laying hens in fall and winter depends a great deal upon the care and management given the poultry flock during the latter part of the summer.

Good egg prices are expected for the rest of the year, says C. J. Maupin, extension poultryman at State College, and it will pay the flock owners to bring their hens into lay under favorable conditions.

He recommends that the birds be given good feeding, a clean range, plenty of clean fresh water, and a clean comfortable house or shelter.

By keeping the birds healthy and getting them to put on as much fat

and body weight as they can, they can be brought into lay with a reserve of flesh and energy to meet the demands of the laying season.

Sexual maturity should be delayed in order to give the birds a chance to put on weight before starting to lay. Do not give early hatched pullets a feed high in protein. Avoid mouldy or chaffy feeds, or such material as corn ground with the cobs.

If the birds fail to grow well, examine them for internal and external parasites, Maupin says. If mites or lice are found, clean the roosting quarters and treat the birds at once. For round worms or tapeworms, give the pullets a reliable worm treatment.

Find a good feed and stick to it, Maupin recommends, unless there is a good reason for changing. Poultrymen often lose money by switching from one brand to another.

Remove the old birds from the summer quarters. Scrub the floor and the fixtures and expose everything possible to the sun; then let the house stand vacant until well dried. Use disinfectants liberally.

State College Gets Large Forest Tract

Raleigh, Aug. 21—An 84,000 acre tract of woodland in Jones and Onslow Counties has been acquired by the State College department of forestry to be used by the students in connection with their class work.

During the school year the forestry classes will do periodic work on this property, and in summer a full six weeks course will be offered, according to J. V. Hoffman, director of the forestry department.

AN EXPERT TESTIFIES

HERE'S A NEAT TRICK. RUB SOME WHISKEY IN YOUR HANDS. SMELL IT. AND YOU CAN TELL HOW MUCH IT COSTS!

UH-HH! AND I ONLY PAID AROUND A DOLLAR FOR IT!

M-M! WHAT BOUQUET! THIS MUST HAVE COST YOU PLENTY!

JACK MAY KNOW GOOD WHISKEY BUT HE CAN'T TELL PRICE!

THAT TESTING TRICK OF YOURS WAS TERRIBLY EMBARRASSING! YOU KNOW THE JONESES CAN'T AFFORD EXPENSIVE LIQUOR!

NONSENSE! THAT STUFF HE HAD WAS GREAT!

I REALLY OUGHT TO HAVE TOLD JACK ABOUT OLD DRUM. BUT IF HE'S SUCH AN EXPERT, LET HIM FIND OUT FOR HIMSELF. THAT TEST MADE ME NERVOUS, BUT IT ALSO MADE ME SURE OLD DRUM CAN'T BE BEAT!

Old Drum
BLENDED WHISKEY

"It can't be beat!"

They also serve as game wardens to prevent unlawful hunting or abuse of the game on the tract.

A CC camp is now on the property, and the boys are constructing roads, building fire towers, and otherwise improving the area. Another CCC camp will be located there on October 1, Hoffmann said.

Hot weather, following the recent rains, has caused tobacco to ripen more rapidly than the growers can find barn room for curing the leaf.

The property will also be used as a demonstration to show the public how forest lands should be managed and what improvements can be made through proper management. Timber will be cut from the area to demonstrate approved methods of timber harvesting.

The cut timber will be sold and payments on the property will be made from the revenue brought in from such sales, Hoffmann stated. The title to the land, however, will be held by a non-profit corporation for the sole use of the forestry department at State College.

The State is cooperating with the college in providing fire protection for the timber tract. A number of fire wardens have been appointed to check any fires which may break out.
