porary grazing. Moore said, is: of crimson clover, and 15 pounds of Italian rye grass.

Still another mixture to be recone bushel of wheat, one bushel of abruzzi rye, and 15 pounds of Italian rye grass.

Winter hay crops should be sown from October 1 to 20, the dairy specialist said.

#### Victor Meekins Is Leader Of Movement \*\*\*\*\*\*\*\*\* To Honor Fessenden

Reginald A. Fessenden, father Gordon Battle of New York, Mrs. William L. Edison, Lieut, Col. Reginald K. Fessenden, and Governor ected to the undersigned from Broughton on hand for the occathe Superior Court of Carteret sion. The Fessenden National Memorial Association is at present raising funds to erect a \$100,000 monument, similar to the Wright Memorial to honor the man who carried on experimental work on Roanoke Island almost a half a century ago.

When the great scientist came drill? to Roanoke Island in January 1901 and started his radio experiments, he selected Weir Point as the best place for his station, and rented the land from the late Charles P. Meekins of Sunnyside, Roanoke Island

Fessenden contracted with Mr. Meekins, and the U.S. Weather Bureau paid \$40 a year for the use of the land. It was leased for more than two years, and a new lease signed every year. The various leases are now in possession

of the familyy. When Fessenden left Roanoke Island, the equipment and station were turned over to Prof. A. H. Theissen, his assistant. Later, the Weather Bureau sold the buildings. A large part of the lumber in the main workshop and windows, are now located in a barn at the home of Sheriff Victor Meekins.

Many of the instruments used by Fessenden were turned over to Mr. Meekins, and his sons, Roland Meekins as small boys played with the instruments, and finally threw them away.

A large part of the 40-acre tract of land leased by Fessenden, has been donated to the Fessenden Memorial Association in part by the Charles P. Meekins heirs, and it is on this property that the Memorial will be erected.
