The Cat and the Sparrow.

This is a true story with all the necessary vouchers, says the Cleveland Plain Dealer.

An East End family has a cat, a big gray Tom who answers to the name of Ben. Ben's natural enemies are the sparrows. When he can creep up on one of them and make its feathers fly he is delighted.

Some time ago a lot of the little chatters settled on the limb of a tree in Ben's back yard. Ben saw them and crept foot by foot to the tree. Up the trunk he cautiously climbed and finally reached the limb. At this point the sparrows saw him and flew to the ground, where they chattered vigorously. Ben in the meantime watching them from the limb with hatred in his yellow eyes.

Then without warning the sparrows suddenly flew up and began a concerted onslaught on Monsieur Ben. They pecked him without mercy, until he dropped his head and beat a demoralized retreat—crying meanwhile with pain and rage.

Even as he descended the trunk of the tree of the birds followed him with vicious bills.

When he reached the ground he ran to his mistress on the porch and sprang into her arms—the triumphant birds withdrawing their fighting line in good order.

Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, O. by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price, 75c per bottle. An Aerial Trust.

Boston Herald. The commercial opportunity of aviation has no more immediate and material evidence than in the formation of a million-dollar corporation in New York for the manufacture of the Wright brothers' machines. The incorporators include some of the richest men in that city. The installation of a plant for production is already indicated in Ohio.

It is rather early to predict that the possession of the Wright patents covers the entire scope of man-flight; but the formation of this trust so promptly indicates the entrance of aviation into the field of rivalry in transportation which has heretofore been occupied by railroad and steamship lines.

It is a marvelous development of an art which is yet in its infancy. But it has vast possibilities. We are just beginning to learn that men can fly. What may we not look for in the near future under the guidance of commercial interest directed by commercial energy.

Trouble Makes Ousted.

When a sufferer from stomach trouble takes Dr. King's New Life Pills he's mighty glad to see his Dyspepsia and Indigestion fly, but more-he's tickled over his new, fine appetite strong nerves healthy vigor all because stomach, liver and kidneys now work right. 25c at Freeman Drug Company.
