THE UNIVERSITY LETTER

From our Regular Correspondent.

Crowded out last week.

The University of N. C. is now fairly started on the 116th year of its service to the people of the state with an enrollment which bids fair in spite of the raising of entrance requirements for the academic schools, to equal or surpass last year figures, 821. The senior class which numbers 105 is believed to be the largest ever registered at a southern institution. The sophomore and junior classes about normal. As yet no statistics have been compiled of these two classes. In a recent speech delivered before the state association of county superintendents assembled in Chapel Hill, President Venable outlined partly the administrative plans for the coming year. Realizing that the college was crowded to the limit of the capacity of the equipment provided by the state, he planned to have the institution grow in point of efficiency and instead of expanding in numbers he desired a small "lopping-off" as he put it, in the number who registered last year. With this end in view the faculty had made the requirements for entrance into the academic school 20 per cent higher with the hope of bringing down the academic registration some 50 or 60, just as the inauguration of an entrance requirement for two years academy work had cut the medical school from 115 to 60. The fact that as many freshmen have already registered as had registered last year this time proves that no normal restrictions made on the part of the administration of the college can remedy the overcrowded condition of the University. The help and the remedy must come in the form of an enlarged equipment made possible by an increased appropriation by the state legislature.

The new year sees several members of the faculty gone because of inability on the part of the administration to give the promotion and increased salary necessary to keep them here. Among those who are gone are: Dr. Dolly of the medical school, Dr. Mills of the department of chemistry, Dr. Ruffin of the law school, Mr. Eaton of the department of geology, and a few men of less importance.

The several vacancies in the faculty which have been caused by death, resignation and granting of leave of absence have been filled with a success on which the executive committee of the board of trustees and the administrative faculty may well congratulate themselves.

Dr. Brain takes the chair of Greek made vacant by the death of Dr. Alexander. Dr. Bain comes from the University of South Carolina where he has a high reputation as a scholar and teacher. Prof. Lucius Polk McGee has taken up his work as dean of the law school. He succeeds Judge J. C. MacRae, who died last year. Dr. Thomas Ruffin, resigned, is succeeded by Prof. McIntosh of the law school of Trinity College.

Dr. A. S. Wheeler associate professor of organic chemistry, Dr. Henderson, of the department of mathematics, and Prof. Toy of the department of German languages, who are absent in Europe on leave of absence, are succeeded by Dr. Hall of Clemson College, Guy R. Clemens of the Harvard scientific school, and Dr. Viles of the University of Ohio respectively.

Dr. Mims, who has been studying in Europe since his election in 1908 has taken up his work as Professor of English Literature and head of the department of English. Professor Graham's work consists mainly in courses in self-expression. As dean of the college he has not time to offer very many courses. Dr. Royster's specialty is Philology. Dr. Mims is known best as an inspirational teacher of poetry. The English department is strong

Popular Members of The Ball Family.

Nowhere is one able to find such gloriously good playfellows as among the members of the Ball family. All the way up from the red gas ball and the toy ball that delight the little chap to the rugged leather pigskin fellow that belongs to the college boy, there are shades and varying sizes in the members of this jolly family, but one and all have the same characteristics—they want to play.

Dodge ball is a splendid outdoor game. The players are divided into to even groups, one group joining hands to form a circle while the players of the other group stand inside the circle. The larger the circle on the outside, the more difficult will be the game. A basketball should be used if there are a good many players.

The circle players must try and hit the center men with the ball the center men dodging to escape it, jumping, stooping, or resorting to any means save leaving the circle. As soon as a player is hit he must toss back the ball and leave the circle. The man remaining longest inside wins the game. In repeating the game, the center men of the previous game form the circle, and the circle players must take their turn at dodging the ball inside.

Circle ball calls for a circle of players who stand about five feet apart. The ball is passed rapidly from one player to another, its direction being often reserved, or it is suddenly tossed across the circle to the utter confusion of the player who did not see it coming. Each player must be alert and ready to catch the ball if one fails he must sit down, and the game is won by the two players who remain standing longest.—October DESIGNER.

This Was a Snake.

Mr. Blake Reece, son of Mr. Albert Reece, one of the leading farmers and merchants of North-east, Onslow county, killed the largest rattlesnake yesterday that was ever seen in this section.

The young man, accompanied by his dog, was making a trip around his father's plantation when the dog treed and when Mr. Reece came up he was horrified to find the largest snake that he had ever seen, outside of a circus, striking at his dog. A well aimed shot however, put his snakeship out of business.

Actual measurement showed the reptile to be eight feet long, eighteen inches in circumference around his body, five inches between the eyes, and it carried a chime of thirty-two rattles.—New Bern Sun.
