THE BROOKLYN DIVINE'S SUNDAY SERMON.

Text: "A man of great stature, whose fingers and toes were four and twenty, six on "ach han!, and six on each foot; and he desired the son of the giant. But when he defiled Israe!, Jonathan, the son of Shimea, David's bro her, slew him."—1. Chronicles xx., 5, 6 and 7.

Maiformation photographed, and for what reason: Did not this passage slip in by a mistate into the Sacred Scriptures, as sometines a paragraph utterly obnoxious to the editor gets into his newspaper during his absence! Is not this Scriptural errata? No, no: there is nothing haphazard about the Bible. This passage of Scripture was as certainly intended to be put in the Bible as the passage: "In the beginning God created the heavens and the earth," or, "God so loved the world that He gave his only begotten son." And I select it for my text to-day because it is charged with practical and tremendous meaning.

world that He gave his only begotten son."
And I select is for my text to-day because it is charged with practical and tremendous meaning.
By the people of God the Philistines had been conquered, with the exception of a few giants. The race of giants is mostly extinct, I am glad to say. There is no use for giants now except to enlarge the income of museums. But there were many of them in olden times. Goliath was, according to the Bible, eleven feet, four and a half inches high. Or, if you do not believe the Bible, the famous Pliny, a secular writer, declares that at Crete by an earthquake a monument was broken open, discovering the remains of a giant forty-six cubits long, or sixty-nine feet high. So, whether you prefer sacred or profane history, you must come to the conclusion that there were in those olden times cases of human altitude monstrous and appalling. David had smashed the skull of one of these giants, but there were other giants that the Davidean wars had not yet subdued, and one of them stands in my text. He was not only of Alpine stature, but had a surplus of digits. To the ordinary fingers was annexed an auperfluous addendum. He had twenty-four terminations to hands and feet where others have twenty. It was not the only instance of the kind. Tavernier, the learned writer, says that the Emperor of Java had a son endowed with the same number of extremities. Volcatius, the poet, had six fingers on each hand. Maupetius in his celebrated letters speaks of two families near Berlin, similarly equipped of hand and foot. All of which I can believe for I have seen two cases of the same physical superabundance. But this giant of the text is in battle, and as David, the dwarf warrior, had dispatched one giant, the brother of David slays this monster of my text, and there he lies after the battle in Gath, a dead giant. His stature did not save him, and his say fingers and tees were four and twenty, six on each hand, and six on each foot; and he also was the son of the giant. But when he defied Israel, Jonatha

the son of Shimea, David's brother, slew him."

Behold how superfluities are a hinderance rather than a help! In all the battle at Gath that day there was not a man with ordinary band and ordinary foot and ordinary stature that was not better off than this physical curiosity of my text. As physical size is apt to run in familiars-the probability is that this brother of David who did the work was of an abbreviated stature. A dwarf on the right side is stronger than a giant on the wrong side, and all the body, and mind, and estate, and opportunity that you cannot use for God and the botterment of the world is a sixth finger and a sixth toe, and a terrific hinderance. The most of these who win the battles for the right, are ordinary people. Count the fingers of their right hand and they have just five—no more and no less. One Doctor Duff among missionaries, but three thousand missionaries that would tell you they have only common endowment. One Florence Nightingals to nurse the sick in conspicuous places, but ten thousand women who are just as good nurses though never heard of. The "Swamp Angel" was a big gun that during the war made a big noise, but muskets of ordinary cal bre and shells of ordinary heft did the execution. President Tyler and his cabinet go down the Potomac one day to experiment with the Pencemaker, a great iron gun that was to affright with its thunder foreign navies. The gunner touches it off and it explodes and leaves cabinet ministers dead or, the deck, while at that time all up and down our coasts were cannon of ordinary bore able to be the defense of the nation, and ready at the first touch to waken to duty. The curse of the world is big guns. After the politicians who have made all the noise go bome house from angry discussion on the evening of the first Monday in November, the next day the people with the silent ballots will settle everything, and settle it right, a million of the white slips of paper they drop making about as much noise as the fail of an apple blossom.

Clear back in the Behold how superfluities are a hinderance

The fire bell rings at night; you rush upstairs to look out of the window to see if it is in any of your mills. Epidemic of crime comes and there are embezzlements and abscondings in all directions, and you wonder whether any of your bookkeepers will prove recreant. A panie strikes the financial world, and you are like a hen under a sky full of hawks and trying with anxious cluck to get your overgrown chickens safely under wing. After a certain stage of success has been reached you have to trust so many important things to others that you are apt to become the prey of others, and you are swindled and defrauded, and the anxiety you had on your brow when you were earning your first thousand dollars is not equal to the anxiety on your brow now that you have won your three hundred thousand. The trouble with such a one is he is spread out like the unfortunate one in my text. You have more fingers and toes than you know what to do with. Twenty were useful, twenty-four is a hindering superfluity. Disraeli says that a King of Poland abdicated his throne and joined the people and became a porter to carry burdens. And some one asked him why he did so and he replied: "Upon my honor, gentlemen, the load which I quit is by far heavier than the one you see me carry. The weightiest is but a straw when compared to that world under which I

asked him why he did so and he replied:
"Upon my honor, gentlemen, the load which I quit is by far heavier than the one you see me carry. The weightiest is but a straw when compared to that world under which I labored. I have slept more in four nights than I have during all my reign. I begin to be a King myself. Elect whom you choose, for me who am so well it would be madness to return to court."

"Well," says somebody, "such overloaded persons ought to be pitied, for their worriments are real and their insomnia and their nervous prostration are genuine." I reply that they could get rid of the bothersome surplus by giving it away. If a man has more houses than he can carry without vexation, let him drop a few of them. If his estate is so great he cannot manage it without getting nervous dyspepsia from having too much, let him divide up with those who have nervous dyspepsia because they cannot get enough. No! they guard their sixth finger with more care than they did the original five. They go limping with what they call gout, and know not that, like the giant of my taxt, they are lained by a superfluous toe. A few of them by large charities bleed themselves of this financial obesity and monetary plethora, but many of them hang on to the hindering superfluity till death, and then as they are compelled to give the money up anyhow, in their last will and testament they generously give some of it to the Lord, expecting no doubt that He will feel unuch obliged to them. Thank God that once in a while we have a Peter Cooper, who, owning an interest in the iron works at Trenton, said to Mr. Lester: "I do not feel quite easy about the amount we are making. Working under one of our patents, we have a monopoly which seems to me something wrong. Everybody has to come to us for it and we are making money too fast." So they reduced the price, and this while our philanthropist was building Cooper Institute, which mothers a hundred institutes of kindness and mercy all over the land. But the world had to wait five thousand eigh when an swe a somebody, such overloads of whether were somebody, such ower loads of the work of the work of the son something with the can carry without version, let him drop a few of them. If his estate is so great he cannot manage is with extent the cannot manage is with extent in the cannot manage is with extent is so great he cannot manage is with extent in the cannot manage is with extent in the cannot manage is with extent in the cannot. Not they cannot provide the with the will be a made and the cannot manage is with extent in the cannot. In the work of the cannot manage is with extent in the cannot manage is with extent of my text, they go limping with what they call goul, and know not that, like the criman five contents. Not they go are the cannot manage is with the cannot be made and the cannot manage in the cannot have go and the cannot manage in the cannot have go and the cannot manage in the cannot have go and the cannot have a feter Cooper, who, owning an interest in the iron works at Trenton, said to Mr. Lester: "I do not feel quite easy about the of our patents, we have a monoroly with seat to me the cannot be suite on the cannot have go and the cannot have go and the cannot have a feel of the cannot have a feel of

shake hands. With the young man just entering business, and discouraged at the small sales and the large expenses, shake hands. With the child who is new from God, and started on unending journey for which he needs to gather great supply of strength, and who can hardly reach up to you now because you are so much taller, shake hands. Across cradles and dying beds and graves, shake hands. With your enemies, who have done all to defame and hurt you, but whom you can afford to forgive, shake hands. At the door of churches where people come in, and at the door of churches where people come in, and at the door of churches where people go out, shake hands. Let pulpt shake hands with yew, and Sabbath day shake hands with week day, and earth shake hands with heaven. On the strange, the mighty, the undefined, the mysterious, the eternal power of an honest handshaking. The difference between these times and the millennial times is that now some shake hands, but then all will shake hands, throne and foot-stool, across seas nation with nation, God and man, church militant and church triumphant.

Yea; the malformation of this fallen giant's foot glorifies the ordinary foot, for

church militant and church triumphant.
Yea; the malformation of this fallen giant's foot glorifies the ordinary foot, for which I fear you have never once thanked God. The twenty-six bones of the foot are the admiration of the anatomist. The arch of the foot fashioned with a grace and a poise that Irajan's arch at Beneventum, or Constantine's arch at Rome, or arch of Triumph at the end of Champs Elysees could not equal. Those arches stand where they were planted, but this arch of the foot is an adjustable arch, a yielding arch, a flying arch, and ready for movements innumerable. The human foot so fashioned as to enable man to stand upright as no other creature, and leave the hand that

said: "The most beautiful of them all is the one that gave relies to my necessities," and as she so said her wrinkles and rags and her decrepitude and her body disappeared, and in place thereof stood the Carist who long ago said: "Inasmuch as ye did it to one of the least of these ye did it to Me!" and who to purchase the service of our hand and foot here on earth or in resurrection state, had his own hand and foot lacerated.

WISE WORDS.

Books outlive empires.

Sweet meat must have sour sauce. Great plenty breeds much dainty.

Tripe broth is better than no porridge. Blessed are the missionaries of cheer-

Always to be sparing is always to be

Honors achieved far exceed those that are created.

The simple faith of a little child is the world's truest homage.

Dreams are ofttimes the fulfillment of a prophecy within ourselves. You cannot mend a wrong subtraction by doing your addition right.

The power of forgiveness is the noblest attribute in the human character.

He deserves to find himself deceived who seeks a heart in the unthinking

To be autocratic is to be unjust to ourselves. No man is "sufficient unto him-elf."

Despa'r and happiness are so closely linked that each is riven by the wealth of the other.

For people to live happy together the real secret is that they should not live

too much together.

Faith is letting down our nets into the untransparent deeps, not knowing what we shall take.

A man is a great bundle of tools. He is born into this life without the knowledge of how to use them. Education is the process of learning their use.

Famous Women.

It is a significant fact that most of the women who have achieved fame in art, literature, or "affairs." have enjoyed vigorous health. This shows that the mind is never capable of the severe and continued application necessary to creative work, unless the body is at its best. The woman who aspires to fill an exalted place among her associates, must be free from nervous debility and female weaknesses. Dr. Pierce's Favorite Prescription will banish these, and it is warranted to restore those functional harmonies which are in dispensable to health. As a specific for all those chronic weaknesses and all ments peculiar to wo here. It is the quantum of the properties of the p

"DOCTORING OLD TIME."

A Striking Picture-A Revival of Old

In one of Harper's issues is given a very fine illustration of Roberts's celebrated painting, known as "Doctoring Old Time" It represents a typical old-timer, with his bellows, blowing the dust from an abcienticok, with its cords and weights carefully secured. One of these clocks in this generation is appreciated only as a rare relic.

The suggestive name, "Doctoring Old Time. Doctoring."

We learn, through a reliable source, that one of the enterprising proprietary medicine firms of the country has been for years investigating the formulas and medical preparations used in the beginning of this century, and even before, with a view of ascertaining why people in our great-grandfathers' time enjoyed a health and physical vigor so seldom found in the present generation. They now think they have secured the secret or secrets. They find that the prevailing opinion that then existed, that "Nature has a remedy for every existing disorder." was true, and acting under this belief, our grandparents used the common herbo and plants. Continual trespass upon the forest domain has made these herbs less abundant and has driven them further from civilization, until they have been discarded as remedial agents because of the difficulty of obtaining them.

H. H. Warner, proprietor of Warner's safe cure and founder of the Warner observatory, Rochester, N. Y., has been pressing investigations in this direction, into the annals of old family histories, until he has secured some very valuable formulas, from which his firm is now preparing medicines, to be sold by all druggists.

They will, we learn, be known under the general title of "Warner's Log Cabin hair tonic," "Log Cabin extract," for internal and external use, and an old valuable discovery for the stomach, etc., "Log Cabin Plaster," and a "Log Cabin propose to cure all diseases with one preparation. It is believed by

Thirty-one of the ninety-six counties in

W. L. Douglas, the best known shoe manufacturer in the world, was born at Plymouth, Mass., August 22 1845. When he was seven years old he was bound out to learn the shoemaking trade. His early life was a hard one, but he did not complain. He had an ambition to be master of his trade; he worked hard and learned all he could. Having saved a little money by hard work at the bench he began to manufacture shoes at Brockton, Mass., July 6, 1876. His knowledge of the business gave him a great advantage over his competitors. He worked hard and saved his money; his business began to increase and in May, 1883, his advertisement first appeared in the papers, advertisement first appeared in the papers, advertisement first appeared in the papers, advertisement for the money than any other shoe manufacturer in this country. W. L. Douglas's factory is 426 feet long. 30 feet wide, three stories high; He employs 300 workmen with a pay roll of \$4,000 pec week. His sales are 1,80 pairs per any; his business is in creasing very rapidly and will reach over \$1,000,600 this year. He pays the highest we ges paid in the city, and is highly regarded by those who work for him. If you are in want of a pair of shoes it will pay you to go to your dealer and examine a pair before you buy any other make. There is one thing certain, you will find his shoes the best value for the price, and free from shoddy. W. L. Douglas built up his reputation by making honest shees.

The Coffee Harvest.

Both banks of the Amazon River are Both banks of the Amazon River are fringed with sugar and coffee plantations of vast extent. The coffee trees are naturally about twenty-five feet in height, but in order to improve the quality of their fruit are kept pruned to about six feet. The bush bears a snow-white blossom of exquisite fragrance, which after dropping is succeeded by a small green button. This develops into a pink berry, which when ripe announces it by becoming a deep purple. It is then plucked, and after passing through the processes of drying, husking, winnowing, sunning and sorting becomes the coffee of commerce.—San Francise, Cironicle.

Great Little Men

Great Little Hen

Some of the greatest men that ever lived were of small stature and insign ficant appearance. The reader will readily recall many instances. Very small are Dr. Pier.e's Pleasant Purgative Pellets, but they are far more effective than the huge, old-fashioned pills which are so difficult to swallow and so harsh in their action. The "Fellets" are genter and ever cause constipation. For liver, stomach and bowel derangements they have no equal.

Washington bids fair to have a Nag tional Zoological Garden.

BLOOD AND BRAIN.

Pure blood is what oils the machinery of life, cases every movement of the body, removes stiffness of the joints, drives out pain from the nerves, stimulates the brain, protects the liver and kidneys from irritation, enables physical exertion without fatigue, prolongs life, and makes men and women perfect in health and feature. Good blood and good brain are inseparable. Aim to keep the blood pure by using the only true blood remedy, B. B. B. (Botanic Blood Balm.)

Miss S. Tomlinson, Atlanta, Ga., says:

"For many years I have been afflicted with rheumatism combined with severe kidney troubles, indigestion and nervous prostration.

Rheumatism Several physicians were employed and numerous patent medicines resorted to without benefit. At last I began the use of B. B. B., and its effect was like magic. Rheumatic pains ceased, my kidneys were relieved, and my constitution improved at once."

Z. T. Hallerton, Macon, Ga., writes:

Z. T. Hallerton, Macon, Ga., writes:

"Three years ago I contracted a blood poison. I applied to a physician at once, and his treatment came near killing me. I employed an old physician and then went to Kentucky. I Hot Springs then went to Hot Springs and remained two months, but nothing seemed to cure me permanently, although teming seemed to cure me permanently, although tem-porary relief was given me. I returned home a ruined man physically, with but little prospect of ever getting well. I was persuaded te try B. B. B., and to my utter astonishment it quickly healed every ulcer."

W. C. McGaughey, Webb City, Ark., writes:
"I owe the comfort of my life to a use of B. B. B.
I was troubled with blood poison
Bad Blood for five or six years, and found no relief equal to that given by this valuable remedy."

Mrs. Emma Griffiths, Unitia, Tenn., writes: "The doctors said my boy twelve years old had scrofula. His knees were drawn up and joints were stiff, and for three years he had been Scrofula unable to walk. One bottle of B.B.B. has done him so work need to be a been stiff, and the stiff, and the stiff of the st has done him so much good ae can now walk, and his pain has ceased. Its action on my boy has been pronounced most wonderful." (5)
