Cubs Take Two.

Chicago, July 21.—Heavy hitting behind Leifield and Reubach gave Chicago both games of a double-header today against Brooklyn. Scores of 6 to 1 and 11 to 4, respectively. Northern's home run and the batting of Evers and Daubert featured the second game.

| | | | |

Giants Beat Reds.

Cincinnati, July 21.—New York won the first game of the series with Cincinnati here today in easy fashion. Cincinnati used three pitchers. All were hit hard and given poor support. Wilse for New York was driven from the box in the fifth inning. Crandall, who succeeded him, pitched well.

| | | | |

CHAMPIONSHIP GAMES.

Stoncutters Defeat Laundrymen in the Deciding Game of Prison League.

Atlanta, Ga., July 21.—The stoncutters carved their numbers indelibly in the Atlanta Federal prison hall of fame yesterday, when they defeated the laundrymen 12 to 11 in a game for the first baseball championship of the prison.

All season the prison league, composed of housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, sweeping and doing housework all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed, you should become both healthy and beautiful. For sale by all dealers.

MR. CONE TO BUILD A \$40,000 HOME

Special to The Chronicle.

GREENSBORO, July 22.—A force of men this morning began tearing away the home of Mr. Caesar Cone on Summit avenue preparatory to the erection of a handsome new home for the head of the Cone cotton manufacturing business. The new residence will cost approximately \$40,000 and will be built by the Cone's personal corps of carpenters. The residence will be located almost in the center of Mr. Cone's handsome site and almost immediately upon the site of the present building. Just across the avenue from Mr. Caesar Cone's \$20,000 residence of Mr. Bernard Cone is nearing completion.

Kisses For Life-Saving.

New York World. Four girls who arrived at Hudson Park, New Rochelle, yesterday afternoon in an auto went in bathing there. One girl, who was about 20, attracted much attention in her dark brown bathing suit. All apparently were strong swimmers.

But as they were returning from a raft the girl in the brown suit sank. Julian Diaz, a volunteer life-saver, swam out, dived and brought her up. He took her to the shore, where she soon regained her composure.

"Whom have I to thank for saving my life?" she said. Diaz told her. She hurried into the bathroom and soon reappeared, fully dressed. "I suppose you want to know who I am," said she to the expectant Diaz. "Well I'll only tell you I'm Ethel Jameson and that I live in the Bronx. But I want to reward you."

Whereupon she threw her arms about his neck and kissed him on both cheeks.

"That's reward enough," gasped Diaz, as the girls climbed into their car and sped away.

No Wonder He Hated War.

"War," cried the old gentleman in the Pugsbury Arms smoking room according to The New York Times, "is according to me a disgrace. War," he continued, thumping the table with his fist, "is an abomination and a blot on civilization. The very name of war," he shouted, sweeping two glasses and a pint pot off the board in his excitement, "the very name of war is enough to make a decent, respectable man go and hang himself out of pure disgust!" He then rose and left the room, his face showing signs of strong emotion.

"Gentlemen seem to feel rather deeply on the subject," said a commercial traveler who had been listening to his remarks.

"He do," assented one of the natives.

"Has he lost some near relatives through the war?" inquired the commercial traveler.

"He ave," replied the other oraculary.

"Who was it?" asked the querist.

"His wife's first husband," was the reply.

The Only National Hymn.

From The Philadelphia Record. Senator Rayner is correct in speaking of "The Star-Spangled Banner" as the national anthem, which he did in his effort to get "Fort McHenry" preserved as an historical monument now that it is no longer valuable as a fortification. Senator Heyburn denies that it is the national anthem more than any other patriotic song, and while he does not name an official and authentic anthem, he thinks "My Country, 'Tis of Thee" is probably the one. The objection to this is that the air is that of "God Save the King." "The Star-Spangled Banner" is not very easy to sing, nor are the words so easily committed to memory, but if Senator Heyburn consult the military and naval authorities he will learn that it is "The Star-Spangled Banner," that officers and men rise and uncover or otherwise salute.

Thought Car Was Packed.

From The Kansas City Journal. He was very much intoxicated, very polite and very much alone, although he did not seem to realize that fact. He was the only passenger on a east-bound Quindaro boulevard car and the conductor was keeping a watchful eye on him. He was occupying a rear side seat.

Presently a woman got on. The intoxicated man arose, lifted his hat with an elaborate bow and said: "Excuse me, ma'am. Realish I'm no condishun to address a lady but I fish can't bear to see you standish up. Kin'y take muh seat."

The woman did so and the intoxicated man stood up all the way to the end of the line.

Big Game.

Montgomery Journal. Savannah, Ga., some visitors chartered an old seagoing hack driven by a negro. The driver was a knowing old fellow and pointed out all the places of interest along the route. As they were nearing Mrs. Bannan's place, which is four miles from Savannah, a squirrel appeared in the road.

"George," said one, after all had noticed the squirrel, "do you have any big game around here?" "Yes, indeed, sah," replied the negro. "We has baseball!"

Careful About Spelling.

It is denied that the banana party will be changed into a banana party. It is a fact, then, Baltimore would have to roll up a big majority as this is the banana emporium of the United States. The mistaken impression probably gained currency from the fact that the Roosevelt party sought to peel the hide off the Republican party and slipped up on the peeling process and is in for a big fall. Baltimore American.

CHEMISTS WILL VISIT THIS SECTION IN FALL

Some Of Best Known Experts In The World Will Be Included In Touring Party

The following from The Manufacturers' Record will be read with interest here:

The South is to have the advantage of a visit of delegates to the Eighth International Congress of Applied Chemistry, which is to meet in New York in September. As soon as announcement of the congress was made more than a year ago, The Manufacturers' Record urged that steps be taken to induce delegates to the congress to make an excursion to the localities in the South where either the materials for the application of chemistry to industry are produced or the application is being made. At various points in the South this suggestion was given practical support in the way of activity on the part of commercial bodies and representatives of mining and manufacturing industries to influence the management of the congress to arrange the excursion. Out of these activities came propositions for half a dozen tentative tours for the delegates following the adjournment of the congress. The executive committee now announces that these tentative tours have taken the shape of two trips which, in the light of all information that the committee has been able to obtain, will answer the requirements of the delegates.

The "long trip" of these two is the one in which the South is specially interested. For it is proposed to have a special train of two 12-sectioned dining room sleeping cars, two 16-section sleeping cars, one 10-stateroom, or a 7-stateroom double drawing room car and one 6-stateroom observation car and a parlor smoking car, in all accommodating 140 passengers. The train is to leave New York on September 16 and return to that city on October 22, traveling by the Pennsylvania, New York Central, Michigan Central, Chicago & Northwestern, Union Pacific, Denver & Rio Grande, San Pedro, Los Angeles & Salt Lake, Atchafalaya, Topeka & Santa Fe; Southern Pacific, Texas & Pacific, New Orleans & Northwestern, Southern, Louisville & Nashville and Seaboard Air Line Railroads. This trip will last 36 days, and the party will travel 8,159 miles, will cross 22 States and visit 25 cities.

After visiting Philadelphia, Pittsburgh, Niagara Falls, Detroit, Chicago, Omaha, Denver, Glenwood, Salt Lake City, Barstow, Cal.; Bakersfield, Cal.; San Francisco, Los Angeles, Grand Canyon, Ariz., and Albuquerque, N. M., the excursionists will enter the South by way of El Paso, Tex., and will make stops there and at Fort Worth, Tex.; Shreveport, La.; Sulphur, La.; New Orleans, Birmingham, Atlanta, Ducktown, Tenn.; Great Falls, S. C.; Charlotte, Danville, Va., and Washington.

The thirteen days' itinerary in the South as now arranged will enable the visiting chemists to obtain a rapid view of typical centers of sulphur mining, of petroleum and natural gas production, of by-product coke ovens, of fertilizer manufacturing, of the smelting of zinc and other metals, of copper reduction, of cottonseed-oil industry, of packing-house industry, of iron and steel making, of cotton manufacturing, of water-power development, of the derivation of nitrates from air, of the manufacture of wood pulp for paper and of sugar refining and to obtain a fair impression of the rapid strides made in recent years in the growth of Southern cities. Representatives of the material interests of the communities in which the visitors will stay from one hour to 12 hours may be depended upon to give them every facility for becoming acquainted with the local opportunities for applied chemistry, and it is not unlikely that the hosts may be given many valuable suggestions by their guests.

A. M. Nason, farming near Canaan, Me., was badly crippled with sciatic rheumatism due he says to uric acid in his blood. "Foley Kidney Pills entirely cured me and also removed numerous black specks that were continually before my eyes." Foley Kidney Pills are a uric acid solvent and are effective for the various forms of rheumatism. Bowen's Drug Store, 5-6-7

HAS RECORD OF 169 YEARS AS OFFICEHOLDER

BELLEFONTAINE, O.—F. A. Hardy, ninety-four years old, has held public office 169 years. He lives in Miami Beach. He has given up the office of justice of the peace, and now the only offices he holds are those of member of the Soldier's member of the Soldiers' Relief Commission and notary public.

Hardy accomplished his record by holding more than one office (at a time, and once he held four at the same time.

Here is his record: Justice of the peace, twenty-five years; city clerk, ten years; water works clerk, seven years; board of education clerk, twenty years; ward assessor, twenty-four years; member tax equalization board, two years; appraiser of real estate, two years; total of 169 years.

Inability to Get Servants.

Chicago Record-Herald. New York's commissioner of licenses, in his annual report, says that 100,000 more servants can find work in that city. What is true of New York is true of Chicago, and in less measure, but with striking similarity, of English cities. The truth is that this is an industrial age in which certain industrial institutions, such as the old-fashioned mill, the factory, the mistress and maid of all work, are becoming impossible.

Mr. Robinson says that girls dislike household service because they wish Sundays off, and Sunday is the day when a servant must work hardest; because servants can have few or no callers; because there are no fixed hours of employment, and because household work means solitude.

All these complaints have been voiced many times by many representatives of the household workers and social investigators, but they gain strength by repetition.

Are we approaching the servantless age? It seems probable, the change will be slow. Specialization and co-operation will make possible the doing of most of the work that the household servant does outside the home, or by labor at a fixed rate of remuneration. In the end the change will be beneficial to everybody, but the transition period will be full of difficulties. We may well prepare for it by recognizing that the wise citizen is the one who sees signs of the times and acts in accordance with them.

Nobody Won the Prize.

The walking craze for a few years ago gave a well-known sport man an opportunity which he could not resist taking advantage of, says The-Bits. He had handbills widely distributed in which was stated:

"A great Crosby gentleman will give \$50 to the man, woman or child who first succeeds in doing the following tasks: To walk from the Pierhead (Liverpool) to Crosby village. There shall be no competitor must buy a meat pie and walk around the Big Stone and eat it."

About a hundred entries were received, and the walk took place on Monday. Much excitement prevailed and a great cheer arose as a local pedestrian was seen leading the rest of the crowd. His meat pie was soon eaten as he walked around the stone, and he went to the judge for the \$50.

"Why," exclaimed the judge, "I did not think you could have done it. The stone seemed too hard to eat."

"Everything to do with it," answered the judge, "and nobody gets the \$50 till they do."

Curious Chinese Criminal Code.

An interesting feature of the Chinese ethical system which the criminal code on board of punishment is the idea of mutual responsibility. It is provided that when the parties to an offense are members of one family, the senior and chief members of that family shall alone be punishable; but if he be upward of 80 years of age, or totally disabled by his infirmities, the punishment shall fall upon the next in succession. By virtue of this principle, the burden of criminal responsibility has been known to descend from father to son for generations while a litigation was taking its leisurely way through the courts to the board of punishments in Peking and finally to the Emperor, until in the end the penalty fell upon some person born long after the event. Of the same character is the mutual responsibility of persons residing in this same neighborhood. A typical case is where a paricide having been committed, all the houses in the vicinity are demolished, the theory being that the residents have been culpable in failing to exert a better moral influence over the criminal.

Pointed Paragraphs.

Chicago News. A woman says that all men must be married because none are superior.

Maid says come and maids may go, but the housework goes on forever.

Just when a man begins to show off before a woman, his hoodoo gets busy.

Most men know what not to do, but few have sense enough to refrain from doing it.

Shakespeare was mistaken when he said "All the world's a stage." It's a treadmill.

The world sympathizes with the unfortunate—except when he is a widower who marries again.

A woman takes the same chances in selecting a husband as she does in selecting a bargain counter shirtwaist.

Tracing the Origin of the Alphabet.

Professor Binders Petrie in a lecture before the Royal Institute in London recently, attacked the long-accepted theory that the origin of the alphabet is to be found in Phoenicia. The researches of the last twenty years, says Professor Petrie, according to The New York Sun, have shown that signs were earlier than pictures and it was the sign that survived to become the alpha and beta of one civilization and the A B C of another.

Just as the philologist has discovered one entire system of languages, so the alphabetarian has discovered in the diversity of alphabets an original prototype of all. In Professor Petrie's words: "The Phoenicians are people of yesterday compared with those who wrote the signs that are the origin of all alphabets."

It was to pottery, said the professor, that Egyptologists and others were indebted for these signs, and their development was worked out on these lines. Flatnose made a pot and put a mark on it to show that it was his. In time, because it was his mark, the sign stood for Flatnose himself, and then the sign became attached to a sound irrespective of the thing itself. Gradually the wearing down went on until the sign stood, not for a sound, but a syllable, and then for a letter.

The signs, of course, were not an alphabet; that did not arrive until perhaps 1600 B. C., whereas signs were found in nearly prehistoric Egypt, probably 7000 B. C. Proofs of this common origin were plentiful, for the signs spread by trade far north and south, and appeared similarly in Runic, Iberian and Karian, and yet were unknown in Phoenicia.

Did it ever occur to you that now is the future you longed for several years ago?

CASTORIA For Infants and Children.

The Kind You Have Always Bought Bears the Signature of *Dr. H. H. Fletcher*

Tribute to the Onion.

Kill the onion and you leave a gap in the universe. Kill anything else and there is a substitute. The potato is akin to the cereals, squash and cabbage and turnips and cauliflowers are of the same family, beans are elongated peas, the lemon is a pessimistic orange, beef reincarnated grass, watermelons just the survivor of a very fit cucumber, and so on. But the onion is sui generis, alone, unique, triumphant. It is a special creation to tempt the palate of a weary world. It proves the futility of man's wisdom. He might have guessed at everything else under the sun, but he would have never guessed an onion. Science may deduce a new star before it becomes visible, or radium before its discovery, but this succulent, fragrant starchy vegetable would have gone un-invented forever had not its own inventing, yet not bashful qualities forced themselves into tear-brimmed eyes and lustrous anticipatory lips. With what a mixture of gratitude and awe should we view the spectacle of nature turning her energies to the transmitting of mere clay into a vegetable with an artistic temperament.

Did it ever occur to you that now is the future you longed for several years ago?

WINS HEIRESS IN WORLD'S CHASE—MISS EDITH LEE BAKER.

A Chicago heiress has been pursued around the world by a rejected suitor and captured. Miss Edith Lee Baker, heiress to the millions left by her deceased father, Edward F. Baker, prominent among the women artists of Europe, out-door enthusiasts and one of Chicago's most prominent debutantes, is the heroine of the pretty romance. Henry Charles Charplot, wealthy and famous international lawyer is the persistent and successful suitor. Miss Baker and Mr. Charplot met for the first time about three years ago. On one side it was a case of love at first sight. But Miss Baker was wrapped up in her art and love of outdoor sports. Her rejection of his advances did not shatter the determination of the attorney, and several other proposals followed in rapid-fire sequence. At last the young lady concluded to make a tour of the world with her mother. Mr. Charplot proposed in Tangiers, Cairo, India, Hong Kong, Tokio, Manila, San Francisco, Chicago, New York, but according to the latest cable reports he did not receive the desired answer until last week, when the party arrived at its starting point, Paris. Miss Baker has the distinction of being the only woman who ever climbed the Breithorn, one of the difficult peaks of the Alps.

On The Level, Ain't Mutt A Terrible Boob? By "Bud" Fisher
