

Those who have watched the phe-

nominal growth of our business and drank of the cooling waters of low prices we are giving, know perfectly well the reasons for our great success. It is said there is not a house like it in the Nation doing the business we are doing in a city of 15,000 people. Last week a gentleman came from Pittsburg on purpose to learn, if possible, the cause of our great trade. After spending two days, he said to the writer he would not have missed it for an hundred dollars. He had gathered up new ideas of business success. The truth is our success has exploded the theory and practice of high prices, established beyond doubt that the !aw of success in merchandise is that of small profits and quick sales. That of reducing the business to Cash, of mastering with Dollars when we buy and keeping the mastery when we we sell, Under-buy; Under-sell. To every visitor we extend a cordial earlier. Crowds have stood around invitation to come and see us, to go all through our House, to get prices s'ock at 50 cents on the dollar unti under the law of Dollar Valuations, and to buy as it will pay you to buy.

To appreciate it you must see it.
