WANT COLD WEATHER.

Travelling Men Say Warm Autumn Has Hurt Trade.

The traveling men of this section are more anxious to see the weather turn cold and remain so than any other class of people at the present time The drummers say that the warm weather has completely checked the trade. The buyers, especially in the smaller towns, refuse to place any further orders for winter or spring goods, because of the warm weather which has almost paralyzed the sale of winter goods and this being the case, the buyers do not show a disposition to purchase spring goods. The travelling men in the grocery line report a similar state of affairs. They claim that people eat more in winter than in summer, and that when the weather remains warm the people are not interested very much in purchasing groceries. In view of the above, the present drop in the thermometer will be right gladly welcomed by the travelling men, and the wholesale and jobbing trade.
