WHO WILL GET MRS. EDDY'S MILLIONS?

By Associated Press.
New York, Jan. 13.—New York officials of the Christian Science church profess themselves unalarmed over the announcement that the mother church has in Boston may lose the \$2,000,000 which Mrs. Eddy intended should revert to it upon her death. The following statement was given out by Eugene R. Cox, chairman of the publication committee of the Christian Science church in this state: "While no one seems to have looked up the other side of this matter and determined whether or not the opponents of the will have overlooked something, we are quite sure that Gen. Henry M. Baller, the administrator, will take whatever steps are necessary in opposing those who appear to be so anxious to thwart the wishes of Mrs. Eddy."

"So far as the cause of Christian Science is concerned the final disposition of that \$2,000,000 matters very little."

Death of Henry Barnes.
By Associated Press.
New York, Jan. 13.—Henry Burr Barnes, president of the publishing firm of A. S. Barnes & Co., and a director of the American Book Co., is dead at his home here of apoplexy. He was born in Brooklyn in 1845, the son of A. S. Barnes, who founded the publishing house.

It doesn't seem to make much difference how bad business conditions are, the growler is always rushed.

TWO CHARTERS ARE ISSUED IN CAPITAL CITY

Special to The News.
Raleigh, Jan. 13.—The Asheville Country Club's charter is amended increasing its capital to \$75,000. The Bank of Thomasville increases capital to \$50,000. New charters are issued for the Sedge Garden Telephone Company, of Kernville, capital \$10,000, by D. A. Smith and others, and for the Hardison-Rivers Company, of Morven, capital \$50,000, by J. V. Hardison and others for mercantile business.

The state board of education has received a report from Engineer Holeman, of New Orleans, the expert agreed upon by the board of education and the Roper Lumber Company to pass upon the estimates of Engineer Wright of the cost of the drainage of Mattamuskeet Lake, in Hyde county. He reports that the \$400,000 estimate of Engineer Wright is adequate. He recommends a few minor changes in the plans. The president of the lumber company was summoned here today, but has an important engagement in New York and the details of the findings of the experts are wired to him and he asked to withdraw all exceptions to the drainage undertaking so that the deal by the state for the sale of the lake bed to a Northern syndicate as held up December 1st by his exceptions may be put through.

Review Historical Events.
The paper by Secretary R. D. W. Connor, of the state historical commission, reviewing the historical activities of the year was one of the most notable features of the annual session of the North Carolina Literary and Historical Association. It reviewed the erection of seventeen monuments and memorials in the state, the laying of three corner stones laid for additional monuments and fourteen others projected and movements for erection gotten under way the painting of six portraits of distinguished citizens installed in public places, the assembling of 1,100 additional relics of value and classification of 14,754 selective documents and 8,788 manuscripts of historic value. He reviewed the celebration of the bi-centennial of Newbern; the establishment of the Daniel Boone memorial in Davidson county; the placing of numerous tablets and markers of historic places by the Daughters of the Revolution; the portraits of the American Revolution; portraits of revolutionary patriots by the Sons of the Revolution, monuments by the Daughters of the Confederacy in Rutherford, Caldwell, memorial arches in Raleigh, Tarboro and Charlotte "Navy Yard," and a number of other notable enterprises of this character.

Dr. Edwin Mims, of the University of North Carolina, discussed college and university extension work. Dr. D. H. Hill, of Raleigh, read North Carolina's bibliography for 1910.

Charlotte Concern Chartered.
The Interstate Improvement Company, of Charlotte, is chartered with \$125,000 capital, by E. L. Probst, J. R. Smith and others. Another charter is to the Howard-White Lumber Company, of Raleigh, capital \$10,000, by Howard White and others.

State Auditor Takes Oath.
Col. W. P. Wood, the new state auditor has taken the oath of office before Justice Walker, of the supreme court, and entered on the duties of his position, succeeding B. F. Dixon, Jr. who was appointed by Governor Kitchin to succeed his lamented father.

Re-elect Grand Master.
The North Carolina Grand Lodge of Masons last night re-elected Grand Master R. N. Hackett; Deputy Grand Master R. B. McCoy, of Wilmington, and other grand officers for the ensuing year. They will be installed tomorrow morning and adjournment of the annual communication will take place during the afternoon.

"Twenty-one years ago I faced an awful death," writes H. B. Martin, Fort Harrelson, S. C. "Doctors said I had consumption and the dreadful cough I had looked like it, sure enough. I tried everything, I could hear of, for my cough, and was under the treatment of the best doctor in Georgetown, S. C., for a year, but could get no relief. A friend advised me to try Dr. King's New Discovery. I did so, and was completely cured. I feel that I owe my life to this great throat and lung cure." Its positively guaranteed for coughs, colds, and all bronchial affections. 50c. and \$1. Trial bottle free at W. L. Hand & Co.'s.

Charters Issued Wednesday.
There were two charters for seven new corporations. The Goode Construction Company, Charlotte, capital \$125,000, by J. A. and R. L. Goode and John A. Parker.

The Curtis Creek Fume Company, Morganton, capital \$50,000, by Manly McDowell and others.

The Carrett-Glenn Company, Winston-Salem, capital \$25,000, for brokerage business, by J. G. Garrett and J. A. Glenn.

The Lexington Chair Company, capital \$150,000, by F. M. Weaver and others.

The George N. Floyd Company, Dunn, capital \$10,000, by W. E. Boyd and others.

The Welfare Automobile Company, Wilson, capital \$24,000, by R. C. Welfare and others.

The corporation commission has issued a call for reports of the condition of state, private and savings banks at the close of business January 7.

Work For Training School.
It was an enthusiastic conference of advocates of the Western Carolina Training School that was held last night in the Yarrowborough for the inauguration of the campaign to impel the present legislature to establish such an institution for the west as was provided two years ago for the eastern section at Greenville. In the conference, were a big delegation from the west, Asheville, Hendersonville, Waynesville and elsewhere—and the western Carolina members of the assembly. They determined to go into the fight to win and insist on having \$125,000 provided for the next two years. They say this school should have been

the plant is now being placed on the ground, the machinery coming from Germany. The plant will make nitric acid and treat limestone with nitric acid, giving nitrate of lime, which is equal in fertilizing value to nitrate of soda.

By a very interesting chemical process, discovered by the Germans, nitric acid is taken from the atmosphere by passing the atmosphere through intense heat, an electric arc, giving 2,000 degrees, fixing the nitrogen in the air so it will combine with other chemical products, forming nitrous oxide. By mixing this with water, nitric acid is obtained, the chemical formula being NO₂, with water added, HNO₃. It is an interesting and important fact in this connection that the main source of nitrate of soda is a narrow strip of land between the Andes and coast hills, which is a rainless district, and there from countless ages fixation of nitrates has been going on an account of atmospheric and soil conditions. In 1860 about 68,000 tons were derived from this source. In 1900 1,453,000 tons were used. The quantity has been increasing continually, so that last year Germany used 650,000 tons. It is estimated that within the next 15 or 20 years the Chile supply will be entirely exhausted, and under these circumstances, as has been pointed out by Mr. W. S. Lee, vice-president and chief engineer of the Southern Power Company, the electric companies will be called upon to furnish not only power, but an increasing supply of the most essential element in fertilization the lands of the country require.

Even this brief outline of the plans and purposes of the Southern Power Company, will give some idea of the enormous magnitude and benefits which the great variety of its undertaking will bring to the Piedmont section of the Carolinas.

INSURANCE CO. MAKES REPORT

Special to The News.
Raleigh, Jan. 13.—In his biennial report to the governor and the general assembly State Commissioner of Insurance James R. Young, recommends the erection of one or more fire proof buildings for the use of the state departments, especially the insurance department; asks a more equitable adjustment of the salaries of clerks in his department; urges limitations on assessments associations and societies for the protection of the people; including proper deposits before licensed to do business in the state; asks revision of fire insurance laws, legislation against fire waste and better adjustment of deposits and bonds; he asks closer supervision of fraternal orders paying benefits and that those paying less than \$400 benefits be included; asks only minor changes in life insurance laws; he wants the regulations as to investment companies extended so that he can keep out agents of all foreign corporations. As to building and loan associations the commissioner recommends that the assembly make sure that the commissioner has ample power for requiring uniform systems of book-keeping and for making examinations as to conditions and methods. He urges that a contingent fund for his department be provided an drevives through his department approximately \$265,000 per year with total expenses of the department amounting to only \$13,000. He feels that he ought to be relieved of having to pay \$500 or more incidental expenses out of his pocket each year.

EMPLOYEES OF FRISCO SYSTEM ROB ROAD.
By Associated Press.
Marked Tree, Ark., Jan. 13.—That employees of the "Frisco System" have been systematically robbing the railroad for a number of months and that, in the aggregate, the alleged thievery will reach a substantial amount is declared by special agents of the road who have caused the arrest of four employees of the local office.

According to the railroad officials, E. E. Merchant, a telegraph operator and former employee of the Frisco, who was arrested in Memphis several days ago, has confessed and outlined the plan of operation said to have been employed in detail.

The men under arrest here, W. M. Mace, express clerk; H. O. Norman, telegraph operator; Clarence Cable, freight clerk, and a negro freight handler, will be held pending further investigation by the officials of the road.

Developing Water Power In The Two Carolinas

Albert Phenix in Manufacturers' Record.)

Dreams of empire that fired the minds of the greatest generals in history have hardly been of more far-reaching scope in their effect on the civilization of their day than are the plans for the development and utilization of the great forces of nature which are being worked out by Mr. J. M. Duke and his associates in the Piedmont section of the Carolinas.

Under the name of the Southern Power Company this great interest which is a present expenditure of \$12,000,000 to \$15,000,000, developed water powers aggregating 101,000 horsepower and having a total of 1,500 miles of lines in the aggregate.

The power from the present development drives 125 cotton mills in North Carolina and South Carolina, located in 47 towns, and in addition power is furnished for lighting the towns, as well as providing power for all industries, and the power that runs all the street car systems in Charlotte, Winston-Salem, Salisbury, Greensboro, Greenville and Anderson.

The Duke interests have also entered the rubber field, the lines in Charlotte, Greensboro and Anderson being under the control of Mr. Duke and his associates.

The intensity of the Duke plans is evidenced by the fact that they are considering the construction of trolley lines throughout the entire zone of present transmission lines, so that there will ultimately be an interurban line running from Durham to Anderson, a distance of 350 miles, with a network of branch lines, radiating throughout the district. Lines are already projected from Greenville to Anderson, and from Charlotte to Winston-Salem, and plans are under consideration for a line from Belton to Greenwood or Asheville, a line being operation now between Belton and Anderson.

It is not mere flattery to ascribe to Mr. Duke qualities belonging to a really great general. He has imagination, the gift of prophecy, and with all enormous executive force and ability of a most unusual kind.

The work he is carrying forward in the Carolinas is of world bigness; there will no such interurban lines anywhere as his system when completed. The effect of his enterprise on the development of the section really staggers the imagination.

New and modern towns are already being built at the power sites. Other towns and cities will be constructed with the development of his trolley lines and water powers, and there will come to the entire section eventually a degree of industrial prosperity and universal development unequalled outside of New England, if duplicated there. An illustration of this point is offered by the development at Great Falls, where the Republic Cotton Mills have practically completed not only a cotton factory with 25,000 spindles and 1,000 looms, but where there has been built a complete mill town, with tenements, hotels, stores, offices, warehouses, church, school, etc. A thoroughly modern sewer system and water works have been installed, each tenement being supplied with modern sanitation, electric lights and filtered sterilized water. The great number of features about the mill and village which are out of the usual trend must result not only in the comfort of the operatives, but will provide a valuable asset and be reflected as a profit in the superior labor the mills will be able to secure and hold.

While the plans of the Republic Cotton Mills Company are probably somewhat more elaborate than those of any other newly devised mill within the zone of development, yet the tendency, wherever any new construction is undertaken, is to provide facilities of the greatest efficiency, and this is interpreted as meaning comforts for the employees as well as cheapness and availability of power for the factories.

Mr. Robert S. Sebane, of Graham, N. C., a member of the well-known and long-established family of cotton mill operators of that name in the Carolinas, is president of the Republic Mills, but the Duke interests have

stock in the enterprise, and are taking stock in a number of other mills. It will be their plan to foster enterprises which are properly manned and possess merit.

There has been some apprehension among those identified with the Southern railway that since the Dukes electric lines will parallel much of the Southern railway system in the central South, the effect on the Southern railway might be to lessen the business which that company now secures. There is a very decided opinion to the contrary entertained by a number of people who have taken pains to investigate the situation. This opinion, entertained by those who are friends of the Southern Railway, as well as others who would welcome competition at any cost, is that there would be greatly increased prosperity for the entire section, so that the Southern Railway need not necessarily be hurt in the end. Moreover, it is believed that these interurban developments will doubtless result in the Southern Railway adopting various methods of improving its local transportation facilities between the Piedmont towns. Probably that might be done by introducing the independent combined motor and car, which is becoming popular in many localities. At any rate, it is the common belief that such competition as will be introduced by the Duke interests will stimulate the Southern Railway to its very best work, so that the entire section will be distinctly benefitted by the development.

Incidental to the development of water power, transmission lines and interurban electric railways, various plans of not only sectional, but national and international importance, are being worked out by Mr. Duke. For instance, nothing could be of much greater importance than Mr. Duke's plans to revive and extend American cotton trade with the Orient. It is stated that the American cotton spinners have lost at least \$20,000,000 of trade in the decline in the China and Japan business. Mr. Duke proposes, in brief, the establishing of depots in the Orient and the bringing of the cotton mills in closer contact with the Chinese traders. The plan has been received with much favor by the Southern cotton mill operators, and with Mr. Duke's genius for working out plans and methods, it is believed that his efforts will meet with marked success.

Also unique and original is the proposition to utilize the water power for the manufacture of fertilizer from the air. At Great Falls a 4000 horsepower plant is being installed at a cost of \$125,000, which will produce 3000 tons of fertilizer per year, worth from \$45 to \$50 per ton, with perhaps some by-product. The material for

Dr. Pierce's Health Talks

The miracle of motherhood is often overshadowed by the misery of motherhood. The great functional changes which are incident to child bearing leave their mark for life on many a mother. Some women offer up their lives as a sacrifice on the altar of motherhood. A far greater number live on in ceaseless misery. Their strength fails, their beauty fades, they have no ambition and no enjoyment in life. To every woman

Dr. Pierce's Favorite Prescription

Offers escape from the pains and perils of motherhood. Taken during the period of waiting and anticipation this medicine strengthens the body, nourishes the nerves, and prepares the whole womanly system for the coming of baby. It also insures an abundant supply of nourishment for the child.

The mind feels bright and buoyant. There is no anxiety, no dread, but in its place a happy anticipation of the baby's coming, which counts for the future happiness of the child unborn. The use of "Favorite Prescription" makes the baby's advent easy, and gives abundant vitality to nursing mothers.

There is no alcohol or habit-forming drugs in "Favorite Prescription." It is a purely vegetable medicine.

Accept no substitute for "Favorite Prescription." There is nothing "just as good" for weak and sickly women. All its ingredients printed on its bottle-wrapper.

The larger success of doctor or druggist is never won by putting love for the dollar above duty to the sick. Protecting the sick, giving them what they ask for when Dr. Pierce's Favorite Prescription is called for, will enrich him in respect, if it does not swell to the utmost his profits.

established at the same time that the eastern school was provided and that they are therefore justified in insisting on this amount, as the eastern school will have had \$162,000 within that time. They are advocating a provision in the act for the school to go to that place offering the best location and raising \$25,000 in money in addition to the site.

ENDS WINTER TROUBLES.
To many, winter is a season of trouble. The frost-bitten toes and fingers, chapped hands and lips, chilblains, cold-sores, red and rough skins, prove this. But such troubles fly before Bucklen's Arnica Salve. A trial convinces. Greatest healer of Burns, Bolls, Piles, Cuts, Sores, Bruises, Eczema and Sprains. Only 25c at W. L. Hand & Co.'s.

Boys Held Posse at Bay.
Nashville, Tenn., Jan. 13.—Armed with revolvers and firing scores of shots, two boys, Charles and Henry Roberts, eighteen years old, who escaped from the Tennessee industrial school on the Murfreesboro pike, with the help of their older brother, John Roberts, held at bay a posse of more than a hundred men yesterday afternoon. After a miniature battle lasting a good portion of the afternoon they made good their escape.

"One swallow doesn't make a spring," quoted the Wise Guy. "No, but one grasshopper can," added the Simple Mug.

Wisdom, like remorse, generally comes too late to do us any practical good.

Don't Starve Your Hair to Death

Many a Head of Hair, Apparently Healthy, is Slowly Starving to Death
