

SIMMONS, WEBB AND OTHERS ARE PLEASED

NEWS BUREAU, Congress Hall. (By H. E. C. BRYANT.)

Washington, D. C., April 26.—Senator Simmons and Representatives Webb, Gardner and Douglass point with delight to the report of the committee on ways and means of the Farmers' Free List Bill. Several sections seem to bear them out in their views on the Canadian reciprocity measure.

Some paragraphs cited are: "The advantages of the agreement are greater for the people of Canada than for the people of our own country. As the president said in his message of Jan. 26, 1911: 'Reciprocity with Canada must necessarily be chiefly confined in its effect on the cost of living to food and forest products.'"

"In fact, action on the Canadian agreement involves the necessity of further and immediate action in removing a number of duties on imports from other countries, in order that justice may be done to the great army of our agricultural producers, who in the Canadian agreement are to have all the alleged 'protection' removed from their produce without a corresponding or reciprocal removal of the protective duties most burdensome on the commodities they must purchase as necessary to sustain their lives and industries. As a beginning in the correction of this injustice, against which our farmers properly protest, the bill herewith reported, has been framed."

"By this measure agricultural tools and implements of every kind are placed on the free list, in order to remove or to prevent any possible discrimination against our farmers in the prices of these necessary articles, and to place them on an equal footing with their competitors elsewhere in the world."

"Canada is our competitor. The committee report quotes from Mr. Taft's Atlanta speech to show that Canada would not give free trade in many things, and the democrats who oppose the treaty cite the same to show that they are right. The president said:

"When we entered upon the negotiations, I authorized the secretary of state and his commissioners to offer free trade in everything, but this Canada could not grant us, because she has a protective system and she was afraid of the competition of our better organized industries."

The report says: "Practically all that our people eat can be provided by our farmers, but a very large part of it is not an can not be eaten in the form in which it leaves the farm. The meat packing and distributing business of the country is thoroughly organized and is being exploited by a combination of great packing concerns commonly known as the 'beef trust'."

The existing duties on meats and meat products are for the advantage of this combination only. The treaty, anti-reciprocity congressmen argue, is unfair in that it takes the duty off of cows but keeps it on meat and other products of the beef trust."

"It is well known that this trust, through the strength of its organization and position in the markets, influences the producers of cattle and other animals used for food and forcing down prices; and also oppresses the consumers of meats and meat production by establishing and maintaining high prices for these articles," the report states. "Thus the trust controls the market both in buying and selling, and the result is a substantial addition to the cost of living from which all the people suffer."

"As our population has increased, our exports of foodstuffs are food products have declined and imports increased; under these circumstances duties on these articles have become a heavier burden on the people."

The treaty protects and aids the trusts at the expense of the farmers by giving them cheaper raw materials, says Senator Simmons.

The report continues: "In the Canadian reciprocity agreement, cattle and all other live stock, including swine, sheep and lambs, and likewise wheat, rye, oats, barley, buckwheat, and corn are placed on the free list. With the removal of duties on imports of these articles from the only country from which real competition could be expected, our farmers are openly and avowedly placed in a free market as to foodstuffs and food products in the forms in which they leave the farm. Representative organizations of the farmers are therefore urging that all the people shall now have the advantage of a free market in buying these foodstuffs and food products in the forms in which they are finally consumed."

"The general public is anxious that no artificial shelter shall be maintained to protect abnormally high prices of food articles in any form. The bill, accordingly places on the free list all meats, whether fresh, cured, prepared, or preserved in any manner, including bacon, hams, shoulders, sausage, and

Those who are run-down, weakened or nervous should remember that nothing excels Vinol, which is a combination of the medicinal elements of the cod's liver and tonic iron, to strengthen the digestive organs, create an appetite, make new blood and restore strength.

Prof. James Mitchell, of Jasper, Ont., says his system was run down to a critical point from over work. A friend told him to take Vinol. He did so and is now enjoying perfect health and he considers Vinol a wonderful tonic. (We guarantee this testimonial to be genuine.)

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and A FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher.

Close friends who have talked with ex-Governor Aycock the past few days about the probability of his being in the race for the United States senatorship say that the ex-governor expresses himself as determined to let the people bring him out if they really want him instead of personally jumping into the race on his own initiative.

These friends think the view that Aycock will ultimately consent to make it a triangular contest with Senator Simmons and Governor Kitchin for the senatorship. An early announcement may be forced upon Aycock through his friends in that Simmons is actively pressing his campaign and Governor Kitchin is known to be equal ly hard at work mending his fences.

SAUSAGE MEATS, AND LIKEWISE LARD, LARD COMPOUNDS, AND LARD SUBSTITUTES.

Then, too, there is the expectation in some quarters that Chief Justice Walter Clark may come into the race. Indeed, there are those who insist that he is now actually at work in a quiet sort of a way, and proposes to be a factor to be considered in the impending contest for the toga of Senator Simmons.

STARVE 56 HOURS AT SEA. Portland, Me., April 26.—Picked up after they had been adrift in a dory for 56 hours without food or water, two Newfoundland fishermen, Samuel Forsey, 17 years old, and George Perry, 22 years old, were brought into port today on board the Gloucester fishing schooner Monitor, from St. Peters fishing banks.

When taken on board the Monitor both were badly frost bitten and nearly exhausted. They had rowed fully 100 miles through heavy seas with extremely low temperature, after straying from the Newfoundland fishing schooner Herbert Mack, during a fog, April 7.
