Mr. R. B. Cochran Dies Last Night

One of The Oldest and Bestknown Citizens or Mallard Creek Township Passed Away at His Home Late Last Night.

Mr. Robert Brice Cochran, one of the best known citizens of the county, died last night at his home in Mallard Creek township, following a serious illness of about a week. Mr. Cochran had been in bad health since last July, when he suffered a stroke of paralysis. Last Friday he suffered another stroke. Realizing that his condition was very serious, most of his children were with him when he died.

Mr. Cochran had reached his 82nd year, lacking only a few days, and enjoyed the best of health until within the last year or two. He was a native of Cabarrus county, but came to Mecklenburg 57 years ago. At that time he married Miss Elizabeth Query, daughter of the late Mr. James Query, of Mallard Creek township. It is remarkable that in that period of 57 years there has never been a death in the family, which includes eight children. They are Mrs. Cornelia DeArmond, of Charlot te; Prof. R. J. Cochran, of Charlotte, county superintendent of college, schools; Mr. J. C. Cochran, of Char- "Dr. S lotte; Mr. W. O. Cochran, of Charlotte: Mrs. Walker Kirkpatrick, of of the home place, and Mr. W. The funeral will be conducted tomorrow morning at 10 o'clock at Mallard Creek church by Rev. Mr. Beattie and Rev. J. W. Summers. The sons of the deceased will probably act as pallbearers, while comrades of his company in the civil war will serve as honorary pallbearers.

Hot Weather Kills Boll Weevil

By Associated Press. Tallulah, La., June 5.—The torrid

weather of the past week has been effective in putting a big per cent of the dreaded cotton boll weevils out of business. The tests conducted by the Delta Boll Weevil Laboratory, under the direction of G. D. Smith, of the United States Bureau of Entomology, indicates that the bug has sustained its most serious setback since its invasion of this territory. Of the weevils placed in hibernating cages last fall, half of 1 per cent only have emerged against 1 1-2 per cent last season, showing that the per cent surviving is considerably smaller.
