Look at What the Courts are Doing!

Our courts have usurped a power to which they have no right. No court has the right to annul legislation. Four times the proposition to give that power to our courts was voted down in the Constitutional Convention. Yet they now assume that very right and upset laws when they please—usually laws which would benefit the general public. The Supreme Court denied to the people the right to assess an income tax for which they declared. The New York Court of Appeals refused to let the people of that state have a law which insured compensation to employes injured in the regular course of their work and to the widows and orphans of those who are killed. This presumption of authority is explained in PEARSON'S MAGAZINE now on sale. Don't doubt. Read that story, and read it now. It is vital to your future prosperity. The courts have taken to themselves, absolutely without constitutional authority, the "despotism of an oligarchy." What about it?

The fallacy of the trading stamp and premium coupon idea is explained in the same issue. The danger of infantile paralysis, how to recognize its symptoms and the chance of preventing the disease is the subject of another article. Why women should be most beautiful at forty is explained by Caroline Otero. And
