FOR SALE—120 acres of land within six miles of Charlotte. Two or three horse crop from part in cultivation. Will sell at \$45.00 per acre, or exchange for city property. McD. Watkins. 13-tf-eod.

PLAYGROUNDS.

(By HOWARD BRAUCHER.) Exclusive Service The Survey Press Bureau.

Are the people of the United States interested in playgrounds? In three weeks in December, 1910, our office received over one thousand letters from all parts of the country asking about playground problems. Last June, when the Playground Association of America held its congress at Rochester, over four thousand people were present at some of the sessions, yet the association was not organized until 1906.

Its purpose is to promote normal wholesome play and public recreation. At first all the strength of the association was concentrated on securing playgrounds for children. In 1907, 90 cities had playgrounds. In 1909 the number had risen to 336. This year the roster of cities will be about 500.

The success of the playgrounds for children created a demand for recreation centers for grown people. Cities found that the most effective means of fighting vice, dissipation, and other vicious pleasures, was in opening the public school building, or some other suitable place and providing a chance for pleasure and amusement in decent surroundings. Already school buildings are used as recreation centers in seventeen cities.

When the Playground Association of America was organized, no one imagined that in the year 1909-1910 eight American cities alone would authorize bond issues for play centers to the total amount of \$2,000,000, or that Cincinnati would this year spend \$1,000,000 for public recreation, and San Francisco \$200,000. That four thousand people would now be employed in the work of directing play in the United States, or that rural communities would be establishing playgrounds as at Tamalpais Center, California, would have been thought impossible then.

During the last two years 246 American cities have established playgrounds for the first time and other communities to the number of 195, are now conducting campaigns for them. What the 195 cities are now anxious to have facilities for play are to spend in the next few years can only be estimated. Orphan asylums, hospitals for the insane, institutions for the feeble minded have made special provision for the recreation of their wards. The children in schools for the blind are almost as happy in their play as seeing children. Churches are giving the use of their grounds and county fairs have had both political parties in the platform have declared for outdoor recreation centers. In Stockton, and Fresno, Cal. Camden, N. J., Philadelphia, Baltimore and Dallas, thousands of children have marched in monster parades asking for playgrounds.

The playground propagandists in a few years has attained a development which many causes have reached only after half a century. Its greatest danger has been its rapid growth. All persons familiar with a certain \$100,000 playground building in an eastern city know that if the bricks used in its construction had been left loose upon the grounds the children would have played with the bricks more than they use this costly structure. In another place a \$10,000 playground has been as much used as another which cost ten times as much. Thousands of dollars have been wasted because they have planned their playgrounds without knowledge of what other municipalities have done. The Playground Association of America tries to help cities avoid such squandering of money, so that every dollar may be made to bring the largest possible amount of happiness.

Besides the annual meeting which is now being held in Washington the association this year has held playground institutes for New England in Holyoke, Mass., in Baltimore, for the middle Atlantic states, in Detroit for the north central and for the northwest in Minneapolis. Another will probably be held for the south. These

conferences have been for the discussion of practical playground problems.

The association helps the different cities to secure public playground workers. A special committee has prepared a normal course in play, which is now being used in seventeen educational institutions. Several universities have professors of play. A representative of the association is giving the greater part of his time to visiting normal schools for conferences and lectures.

A thirty-six page monthly illustrated magazine, "The Playground" is published by the association. It is read in China and Japan as well as in America and Europe. A Playground Year Book is published annually giving a detailed summary of the developments of the play movement during each preceding twelve months. Special studies of equipment and other playground problems are circulated so that the entire country may avoid costly experiments. Lantern slides, maps and photographs are loaned for special campaigns.

The association has three playground efficiency engineers or experts, giving their entire time to visiting different cities, studying their needs and possibilities and helping each to work out its own problems. There are 400 cities just beginning playgrounds, or in the early stages of their work, and only three field secretaries for all America!

The budget of the association for this year is \$50,000. There is no endowment or guarantee fund. Every dollar for its work is secured in voluntary contributions. At a meeting of the board of directors at Hull House, Chicago, January 23rd, representatives from many cities came long distances to confer with Joseph Lee, Jane Adams and others regarding plans for an energetic campaign which should equip the association for meeting the growing demands upon it. The need was so obvious to those most familiar with the work that several playground workers on small salaries have raised their own contributions from \$5 to \$100. One school principal who could not give money arranged to give ten lectures, the proceeds of which shall go to the association. Two New York men raised to their pledges from \$100 each to \$1,000 each. The president of the association increased his pledge from \$250 to \$3,500. If the whole country responds as enthusiastically as the leading workers have, the Playground Association of America will be able to keep pace with the growth of the playground movement.

INFLUENCE OF WOMEN IN THE HOUSE OF LORDS.

It may not be known generally, and it remains true, nevertheless, says "Flammarion" in the News, that a leading factor why the house of lords submitted to its own degradation rather than perhaps see 500 new peers created were the Peeresses. "Cherchez la femme" well might have been applied to the occasion. Of course, the crisis is past, and there will be no peers, but the peeresses did not break their hearts over the Lords' veto bill.

What did terrify them was the specter of a "vulgarized" noblesse. Five hundred new peers meant 500 new peeresses. Now, one cannot double the number of peerages without destroying the social value of a peerage. The fact is there are too many peers and peeresses already. The peerage can digest and assimilate new peers and peeresses only if they are made in small batches.

"Flammarion" says that four hundred and other vicious pleasures, was in opening the public school building, or some other suitable place and providing a chance for pleasure and amusement in decent surroundings. Already school buildings are used as recreation centers in seventeen cities.

ONE OF THE OLDEST TIRE MFGRS. TO BE REPRESENTED HERE.

Mr. C. E. Holmes, Southern manager for the Swinehart Tire & Rubber Co., of Akron, Ohio, arrived in the city last night. Mr. Holmes, while talking to one of "The News" reporters explained that his firm has always limited their popular line of truck and pneumatic tires to the Northern states, up to the present time, when they realized that the Southern states could very easily support another tire manufacturer.

He would not state who would be their agent here, but explains that it will be one of the leading auto dealers in the city.

Mr. Holmes is formerly of the Diamond Rubber Co., and Goodyear Tire Co., both of Akron, and is one of the most popular salesmen representing tire manufacturers in the South.

Cast Iron Pipe

For the City of Charlotte, N. C.
Sealed proposals will be received on August 24th, 1911, by the Board of Water Commissioners of the city of Charlotte, N. C., for furnishing about 5,500 tons of 24-inch cast iron bell and spigot water pipe and about 60 tons of specials. Alternate bids will be considered for wood pipe for about four miles of the line. Certified check for \$5,000.00 must accompany all bids.

Specifications, form of proposal and contract will be on file at the office of the Superintendent of Waterworks and at the office of the Engineer in Charlotte, N. C. The right is reserved to reject any or all bids.

BOARD OF WATER COMMISSIONERS.
Engineer, Gilbert C. White.
Aug. 12-15-21.

A BAD LOT

When charged with being drunk and disorderly and asked what he had to say for himself the prisoner gazed pensively at the magistrate, smoothed down a remnant of gray hair, and said:

"Your Honor, man's inhumanity to man makes countless thousands mourn. I'm not as debased as Swift, as profligate as Byron, as dissipated as Poe, as debauched as—"

"That will do," thundered the magistrate. "Ten days!" And officer, take a list of those names and run 'em in. They are as bad a lot as he is."

You'll find a great many insurance companies that are a "Bad Lot." Not so here, all "A.1."
