Chicago Grain

Chicago, Ill., Sept. 20.—Better reports from France and Germany regarding the harvest outlook turned the wheat market today downward. Besides Liverpool sent word of selling pressure there on account of liberal prospects. Then, too, there was realizing at Berlin because of a good rain. The principal reason for weakness, however, was that owing to improved prospects new wheat was continuing to arrive freely from the interior both of Germany and France. The opening was 1-8 to 3-8-1-2 lower. December started at 95 1-2 to 95 5-8; a loss of 1-4 to 3-8, sank to 95 3-8 and rallied to 95 5-8.

Cattle Market

Cattle receipts estimated at 20,000, market steady. Beves, 4.00@6.15; Texas steers, 4.50@6.35; Western steers, 4.25@5.00; Stockers and feeders, 3.15@5.00; Cows and heifers, 2.25@6.30; Calves, 6.00@9.50.

New York Stock Market

New York, Sept. 20.—Heavy selling was resumed at the opening of the market today and prices of most of the active issues declined. United States Steel which bore the brunt of yesterday's attack on the market was sold heavily and fell 7-8 to 64 1-8, the lowest in more than a year. International Harvester also reached a new low figure for the year, selling at 99 7-8.

New York Cotton

New York, Sept. 20.—Cotton opened steady at a decline of 5/8 points and immediately after the call became excited and weak under heavy general selling attributed to the influence of a further decline in Liverpool and a favorable weather map and continued reports of easier southern spot markets. It looked as if large blocks of long cotton were coming on the market while nearly all houses with southern connections had selling orders, and below 11 cents for December the market ran into stop loss orders which sent the price of that position off to 10.84, or 23 points under the closing figures of yesterday while October sold to 10.75 or 27 points net lower and to a new record for the life of the contract. Covering checked the break toward the end of the first half hour and caused a rally of 5 or 6 points from the lowest.

New Orleans Cotton

New Orleans, Sept. 20.—Cotton futures opened barely steady at a decline of four to 12 points on poor cables. After the call selling was general and the market broke quickly. Bulls offered no support at all and shorts showed no great desire for profits. Little attention was paid to weather news, the chief feature of which was that the tropical storm had entered the Gulf of Mexico. Selling was based on good crop reports from nearly all stations of the belt and the theory that offerings of spots would soon greatly exceed the demand. It was claimed by the short side that much of the selling was against actual cotton. At the end of the first half hour of business prices were 20 to 24 points under yesterday's close.

London Stock

London, Sept. 20.—American securities opened weak and from 1-4 to 3-4 below parity today. Later the market improved from 1-2 to 2 3-4 points on Berlin buying, but when this demand subsided the market eased off and became quieter. At noon values ranged from 1-8 to 1-4 higher than yesterday's New York closing. In the late trading values hardened a fraction but the closing was uncertain.

Cotton Makes New Low Records

New York, Sept. 20.—The cotton became active and excited today with prices making new low records under heavy general selling which was supposed to include liquidation by the leading speculative longs as well as heavy offerings from the south against the increasing new crop movement. Unfavorable political and labor conditions abroad were supposed to account for the reports of a very slow spot demand in the primary markets and the decline was accompanied by many private advices from the south indicating that the interior was offering cotton freely at lower prices. October contracts here sold off to 10.75 and December to 10.75 or 30 to 32 points below the closing figures of yesterday and the lowest levels reached since these deliveries were selling above 10 3-4 cents last June.
