MAJORITY OF PROFESSORS ARE INFIDELS

By Associated Press. Washington, Sept. 27.—"The American republic is doomed to destruction because the majority of its college professors are infidels."

Such was the prediction made by Rev. Dr. S. T. Willis, president of the Virginia Christian College of Lynchburg, Va., speaking before the thirty-fourth annual convention of the Christian Missions society of Maryland, Delaware, and the District of Columbia last night.

"Unless the college professors of the present day," declared Dr. Willis, "lay more stress upon the teachings of Christianity instead of sending out into the world students and graduates with a great store of book learning and little or no conception of what an upright life should be, this republic will go the way of the French republic, the Roman republic and all others where lack of morals, un-Christian living, an improper understanding of a man's obligations to his neighbors and similar deteriorating elements have led away."

When neighbors heard of the find a small gold nugget was started. They began working in the vicinity and in washing out the sand found several small nuggets.

The gold was probably washed down from the mountains years ago.

FOUND GOLD NUGGETS RATHER THAN GOLD EGGS. By Associated Press. Santa Barbara, Cal., Sept. 27.—Thirty gold nuggets, some as large as peas were taken yesterday from the crabs of six geese raised by Mrs. Israel Altschul of this place.

U. S. Steel Common Stock Higher

By Associated Press. New York, Sept. 27.—Rush to buy U. S. Steel common stock today.

The effect of the U. S. Steel Corporation's announcement that it would not dissolve voluntarily, was electrical.

Trading in U. S. Steel stocks was on an unprecedented scale. The opening transaction was a block of 38,000 shares at 59 1/2 to 62, a maximum gain of 3 1/8.

Within the first 15 minutes 190,000 shares of this stock were traded in.

Dealings in the preferred stock of the steel corporation, resulted in equally large gains. That stock on the first transaction opened at 109 3/4 an advance of 1 1/2 and rapidly rose to 113.

The bonds opened at 108, a gain of 1 1/8.

After twenty minutes of exciting trading the market fell off. The reactions amounted to from 1 to 2 points.

New York, Sept. 27.—Common stock of the United States Steel Corporation at the opening of the stock exchange this morning opened at 59 1/2 to 63, an advance of 5 1/2 points over the close of last night.

The steel, preferred, opened up at an advance of 2 1/4 points.

Throughout the morning session transactions were on an enormous scale. In the first hour they exceeded 600,000 shares and by noon the total was well above 800,000.

"The sharp rise at the opening was used for enormous profit taking sales, but the market soon developed signs of weakness, Durkitt the second hour the decline became rapid and the opening gains were either eliminated or reduced to nominal proportions.

Union Pacific went 4 5/8 to a point under yesterday's close. United States Steel reacted 4 points to 58 and they referred 5 to 108.

There was a sensational break in Wabash securities shortly afternoon. The four per cent debentures tumbled more than ten points to 47. The common lost 1 3/8 and the preferred 1 1/4, both issues reaching new low figures.

E. T. Jeffrey, chairman of the Wabash, authorized the following statement:

"The position of the Wabash is no different today than it was a week ago. Rumors of a receivership are entirely unfounded."

New York Cotton

New York, Sept. 27.—The cotton market opened steady in keeping with better Liverpool cables than due, with first prices 1 point lower on April, but generally 1 to 5 points higher on a continuation of yesterday's late covering and buying for a reaction.

The steadier tone of the stock market was supposed to account for considerable Wall Street buying but the South was a very heavy seller, private crop accounts were more favorable and the market soon weakened, with recent buyers selling out their purchases on a scale down to a net loss of about 8 1/2 points, which carried the market within 8 or 9 points of yesterday's low records.

The early break carried the market off to 10.08 for October and 10.26 for December, a net loss of about 10a15 points. A better demand developed around this level, however, with trade interests good buyers. Prices rallied several points from the lowest, with the market at mid-day steady at a net decline of 5 1/2 points.

Spot, quiet; middling uplands, 10.55, nominal.

Southern offerings increased in the advance of the late forenoon and the market turned easier again after mid-day in a point or two of early low levels.

There seemed to be a good demand under 1030 for December.

Close New York Spots. New York, Sept. 27.—Cotton spot closed quiet, 10 points lower; middling uplands 10.45; do full 10.70; no sales.

New Orleans Cotton

New Orleans, Sept. 27.—Cotton futures opened barely steady, two points off to four points up. Cables were somewhat better than expected, but the weather map was extremely favorable and showed ideal picking and maturing weather all over the cotton country. This stimulated short selling. After the call offerings were more than the market could absorb and prices fell off until at the end of the first half hour of business they were 5 to 7 points under yesterday's close.

The volume of business was small, and professionals did most of the trading.

Bearish private forecasts of the pending government reports on condition and ginning, one of 71 per cent for condition and the other of 3,600,000 bales for ginning, caused heavy selling around the middle of the morning and prices were put 13 to 16 points under yesterday's close.

Telegrams from the Atlantic and also from Texas saying that farmers were more disposed to hold their cotton and were not meeting the market checked the decline and caused traders to take the long side of the market for a turn. At noons price were 8 1/2 points under yesterday's final quotations.
