New Emporium of Fashion for Charlotte—A Fifth Avenue Atmosphere Throughout the Building—Richest Apparel, Beautiful Decorations.

This evening marks an epoch in Charlotte's mercantile life—the opening of a beautiful emporium of fashion and elegance, the Liles-Nix Co., on West Trade street.

The opening will take place at 7 o'clock and from that hour until 10 o'clock the new firm will keep open house.

The first floor—the stock of which is notions, piece goods, and corset department under Madame McCall, of New York—is lighted with twenty pink paper chandeliers on the sides, and ceiling chandeliers, and set with several hundred palms.

The second floor—millinery, with Miss Loula Deane, of New York, as manager—is the place de resistance. The windows are hung with lace—as they are throughout the building, the walls are dressed in mirrors, and there are a number of mirrored alcoves for the trying on of hats.

The space between the windows on the west side is set with millinery chiffoniers.

The work room and clerk's rest room is on this floor, also a rest room for shoppers. This room is finished in handsome settings of leather—has a lady's writing desk, a telephone, a lounge and everything conducive to rest.

Opening from it is a dressing room handsomely furnished and supplied with all the accessories that a woman wants and needs.

In a corner, on this floor is the French testing room—a room where evening gowns are tested by gas light. The walls are dressed in mirrors 6x2 feet so the gowns can be seen to advantage. The wood-work throughout this floor is curly maple.

On the third floor are the fur—furs that the first old Astor would have been proud to purchase. There are fur coats and fur sets ranging in price from \$100 to \$500.

By the way saw several hats on the hat floor at \$100.

The floor boys and porters will be liveried, their suits being blue with brass buttons.

This evening an orchestra of nine pieces will furnish music, and each visitor will be given a dainty souvenir—a mouchoir sachet on which one reads:

"Kindly accept this as a souvenir of Charlotte's most modern store. Here you'll find everything arranged for your comfort, convenience, safe economy, and the new things that are worth while in suits, coats, dresses, millinery, piece goods, silks, laces, embroideries, white goods, underwear, corsets, notions and novelties."

New Steel Dining Cars for Southern

Two Elegant New Steel Dining Cars on the Yard of the Southern, Being Two of Four New Ones For The System

Standing on the yard of the Southern station here are two new steel dining cars of the Southern, which are the object of curious and interested inspection by the public, the cars being the latest word in dining car service and faultless in every appointment.

There are four of the new cars for the Southern and they will be attached to trains 37, 35, 36 and 38, which announcement will be greatly appreciated by the traveling public.

The new cars, with their equipment, will stand the Southern Railway company a cost of about \$20,000 and the interior design, which is of rathesellar effect, is the work of Mr. George East, superintendent of the dining car service of the service.

The design allows a maximum of convenience with a minimum of space and a wilderness of drawers within draws, lockers within lockers, etc., makes the new car up to the last minute in point of improvement.

The idea of perfect sanitation prevails in the construction of the cars and a system of refrigeration that could scarcely be improved insures the perfect preservation and immunity from dust of the entire stock of supplies.

A neat and handy arrangement is a lattice work floor in the kitchen compartment, which is lifted and cleaned after each meal. The floor of the car is also constructed so that water percolates the refrigerator system drains on out the bottom of the car.

Every compartment is dust proof and most of them air-tight. A strikingly effective device for safety of patrons and one that will be appreciated by the public at large is a system of locks on the cooking range which renders impossible for a spark to escape from the range in case of accident or even the overturning of the car, this minimizing the possibility of fire, which is often so fatal in wrecks.

The cars are lighted both by gas and electricity and has a reserve of candle service, in case of the failure of both gas and electricity. The simplicity and tastefulness of the dining compartment itself is striking, mahogany being the material and the details very artistically arranged. The whole interior lighting system is the latest that has been devised.

The dining room service is of silver, every piece bearing the word "Southern," and much of it being specially designed for the new cars.

The new cars are the regulation length of 72 feet, of steel build, and will be a great addition to the service on the Southern. "Nothing," says Mr. East, "being too good for patrons of the Southern."

Southern Depot in New Suit of Tan

The painting that has been going on at the Southern passenger station is about completed, the outside work being finished. The color is light tan. The inside work will be finished in a few days. The color scheme within is also tan, the woodwork being cream and the walls a delicate shade of tan. The whole interior of the building is being tastefully finished under the direction of the foreman of the paint gang, Mr. J. K. Reynolds.

It was a beautiful tribute that Mrs. John Craig's daughters, Mrs. E. W. Mellon, Mrs. Thos. Shelton and Mrs. Dr. Wilkie (the latter of Gastonia) paid her today on the occasion of her 69th birthday. Cut glass bowls of pink roses, broad pink satin ribbons and bon-bons completed the color effect.

At each plate was a handsome souvenir—a black lace fan on which was printed in silver the name of the guests. The guest of honor—and love—wore a rich black silk with diamond brooch. The tributes paid the lady of the birthday were pretty and sincere.

It gives me pleasure to tell you how much good your "Milam" has done me. I have had more or less uric acid trouble for ten or fifteen years, and at times I had attacks of rheumatic gout that were not only excruciatingly painful, but that laid me up in bed for a week at a time. I used everything the doctors recommended, but obtained only a little relief.

BACK COVERED WITH MASS OF PIMPLES

Burned and Itched So He Could Hardly Stand It. Tried Medicines, Etc., Nearly 3 Years. In External Misery. Started Using Cuticura Remedies. Now Has No Sign of Skin Disease.

"My troubles began along in the summer in the hottest weather and took the form of small eruptions and itching and a kind of smarting pain. It took me mostly all over my back and kept getting worse until finally my back was covered with a mass of pimples which would burn and itch at night so that I could hardly stand it. This condition kept getting worse and worse until my back was a solid mass of big sores which would break open and run. My undeciding would be a clot of blood."

"I tried various blood medicines and other remedies and salves for nearly three years and I was not getting any benefit. It seemed I was in eternal misery and could not sleep on my back or lean back on a chair. I was finally given a set of the Cuticura Remedies by my brother who recommended them to me very highly. I started using the Cuticura Remedies and inside of two weeks I could see and feel a great relief. I kept on using Cuticura Soap, Ointment and also the Resolvent, and in about three or four months' time my back was nearly cured and I felt like a new being. Now I am in good health and no sign of any skin disease and I am fully satisfied that Cuticura Remedies are the best ever made for skin diseases. I will always recommend them to anybody who will use according to directions. I would not be without them." (Signed) W. A. Armstrong, Corolla, N.C., May 20, 1911.

For more than a generation Cuticura Soap and Ointment have afforded the most economical treatment for affections of the skin and scalp of infants, children and adults. Although used by druggists and dealers throughout the world, a liberal sample of each, with the book on the skin, will be sent free, on application to Foster Drug Co., Chem. Corp., Dept. 248, Boston.

Supertion Court

The case of E. L. Mason vs. S. A. L. and C. C. Railway Company, was not pressed in the civil court yesterday, before Judge Adams and was appealed to the higher court.

In the case of J. A. Gardner vs. City of Charlotte et al., the case has resolved itself to the question of who is liable to the plaintiff, the city of Charlotte or Mr. Brown, on whose apartments the work was done, for payment of which the plaintiff sues.

About two years ago the city of Charlotte was having some drains laid on East Eighth street. An old well was under the Brown Apartments unknown to the owners or even the builders of the apartment, it having been covered about twenty or thirty years ago to the depth of about four feet. When the ditch was dug for the drain came near this well, the water broke through carrying away a part of the foundation of the building and letting the wall crumble.

City Engineer Firth gave orders for the well to be repaired and the bill sent to the city. Not being able to decide who should pay neither the city nor Mr. Brown paid and the plaintiff entered suit for \$103, with interest.

Local politicians will remember that this question played an important part in the Hawkins-Bland campaign.
