

# Former Ed. Paul Boswell Moves

BY KAY WATSON

At the end of the 1966-1967 school year, Paul Boswell was appointed as editor of the weekly Carolina Journal. However, one week later he found out that his family might be moving to Pennsylvania. According to Paul, he was not too worried because his family had been threatened with transfer before, but to no avail. But when his father began to commute each week to Indiana, Pennsylvania, Paul came to realize that what he had imagined would never come true was doing just that.

So now Paul has joined his family in Penn Run, Pennsylvania, where they are living until they can build a home in Indiana, Pennsylvania. Paul said, "The village of Penn Run has an insignificant number of people and Indiana con-

tains about 15,000 souls. So I did not run off to the big city..."

He is hoping to continue his journalism career by working on the staff of the Indiana Penn.

Paul's plans for the future include graduate school. He will be attending Indiana University of Pennsylvania. But right now, he is going through a hectic week of orientation. He misses everybody and wants them to write to him if they have time. His temporary address is P. O. Box 395, Penn Run, Pennsylvania.

When Paul learned of his father's transfer, he says he "informed Dr. McCall to begin a search for a new talent in journalism." The result of that search was Miss Gayle Watts. Gayle is busy learning the ins and outs of the newspaper business. But there is more about Gayle and her new job elsewhere.

PAUL BOSWELL

## Murphy Says UNC-C Will Own Finest Plant

According to Dr. Harvey F. Murphy, head of the physical education program here, the University will have the finest physical education plant in the Southeast by combining two building projects.

The proposal to combine funds for a field house with funds for a health and physical education building was approved at an August 18 meeting of the Advisory Budget Commission.

The 1965 General Assembly had authorized \$250,000 for the field house. However, because of planning delays the structure had not yet been built.

The 1967 General Assembly had cut the authorization for the physical education facility from the \$4,120,000 recommended by the Governor and the Advisory Budget Commission to a final authorization of \$3,620,000. Because architects Cameron, Little and Associates already were in the advanced planning stage for the \$4.1 million structure, the institution faced the expense and delay of redesigning.

Since the Advisory Budget Commission has approved the combination, a total of \$3,858,000 is now available for the physical education facility. The University had already paid \$12,000 in architects fees for the unbuilt field house.

If a complete redesign and been required, architects feared that a vital part of the facility would have had to be cut.

## Burson is Named Prof.

Dr. Sherman L. Burson has become the first Charles H. Stone Professor of Chemistry. He was named so by the Executive Committee of the University of North Carolina Trustees. This appointment means that Dr. Burson will get a salary supplement from the Charles H. Stone Fund in addition to the salary provided by the State of North Carolina.

Dr. Burson took his BS degree at the University of Pittsburgh in 1947 and his Ph.D. there in 1953. From 1952 to 1957 he was employed as a research chemist at Lederle Laboratories Division of the American Cyanamid Company. He left American Cyanamid to become professor and head of chem-

istry at Pfeiffer College. He became a member of our faculty in 1963 and has been acting chairman of the Department of Chemistry.

He is the holder of a National Science Foundation grant, which has been renewed to June 30, 1968.

In naming Dr. Burson to the Stone professorship, Chancellor Colvard said, "We think it especially commendable in Dr. Burson that as he has built a chemistry department and an entirely acceptable program, he has himself continued in active research."

Our University has received three other funds with which to provide named professorships, but they have not yet earned sufficient income to provide substantial salary supplements.

The Charles H. Stone Fund was established with a substantial endowment by Mrs. Stone in memory of her husband. The net income from the endowment is to be used for the payment of salary supplements to a distinguished member or members of our chemistry faculty.

Mr. Stone, a native of Stokes County, North Carolina, was a pioneer in the chemical and dye-stuff industry in the South. Before World War I he was employed by a German chemical company. Later he formed his own company in Charlotte and operated it until 1937 when it was purchased by the American Cyanamid Company. Mr. Stone died October 20, 1963.

## Faculty Promotions

(Continued from page 1)

of Nursing. She holds the RN from the Graduate School of the University of Pennsylvania, the BS in public health, nursing from the University of North Carolina at Chapel Hill, and the AM degree from the University of Chicago. She became a member of this faculty in 1965.

In Philosophy and Religion, Dr. Loy H. Witherspoon, who joined the faculty in 1964. He holds the AB from Duke, the BD from Duke Divinity School and the Ph.D. from Boston University Graduate School. He also fills a chaplaincy position here.

Acting department chairmen who were named are:

## SAT Policy Is Changed

The University has made a substantial change in policy on the admission of special students which will pave the way for an adult education program.

In the past those who did not wish to earn degree credit had to meet the same admission requirements as degree students.

Because of the change, persons who do not wish to earn credit for a degree can enter the University without taking the Scholastic Aptitude Test and without meeting the requirements for a transfer student.

1. The student must be 21 years of age or over.

2. The student must be qualified for the course or courses for which he wishes to enroll, either by previous academic work or by experience in the business world or military service.

3. The student must understand at the time of his registration that no work undertaken while he is classified special student may ever be counted toward a degree.

4. The student must understand that he may not deprive a degree student of a place in class.

The change is in effect now, and persons in the Charlotte area have been invited to take courses for self-improvement or updating skills. For example two courses in speech in particular may appeal to the person who does not want to take them for credit.

Dr. McEniry, vice chancellor for academic affairs, said that the change in policy is in keeping with our University's plan to become an urban university with a full range of services for its community.

Economics and Business Administration, Dr. William D. Wubben, who joined the faculty in 1963. He holds the B.Ph. and MBA degrees from the University of Chicago and the Ph.D. degree from Claremont Graduate School.

Education, Dr. Ben Hall Hackney, Jr., who came to us in 1964 and who holds the AB from Duke University and the M.Ed. and D.Ed. degrees from the University of North Carolina at Chapel Hill.

English, Dr. Robert M. Wallace, who holds the AB from Wofford and the AM and Ph.D. degrees from the University of North Carolina at Chapel Hill. He joined the faculty in 1963.

Geography and geology, Dr. Norman Schul, who is new to the faculty this fall and who holds the BS and MA degrees from Miami University and the Ph.D. degree from Syracuse University.

Health and Physical Education, Dr. Harvey F. Murphy, who holds the BS from Troy State College, the MA from Columbia University and the Ph.D. from the University of Illinois. He joined the faculty in 1965.

Physics, Dr. Robert E. Vermillion, who holds the AB from King College, the MS and Ph.D. degrees from Vanderbilt University, and who joined the faculty in 1965.

Psychology, Dr. Louis Diamant, who became a member of the faculty in 1963. He holds the BS and MA degrees from New York University and the Ph.D. from Yeshiva University.

Sociology, Miss Patricia Ann Harris, who holds the BA from the University of Southwestern Louisiana and the MA from Louisiana State University.

Also approved by the Executive Committee of the UNC Board of Trustees was the appointment of Dr. Edward Samuel Oberhofer as a new assistant professor of physics. Dr. Oberhofer, who has done part-time teaching at N. C. State and who has worked summers at Western Electric and Bell Laboratories in Winston-Salem, holds the BS, MS, and Ph. D. degrees from North Carolina State University.

Dr. Frank DeFelice was promoted from instructor to assistant professor of economics and business administration. He holds the BA from Michigan State University and the MBA and Ph. D. degrees from the University of North Carolina at Chapel Hill. He joined the faculty in 1966.
